Parliamentary Candidates Between Voters and Parties Lieven De Winter, Rune Karlsen, Hermann Schmitt, 2020-10-27 This book offers the first comprehensive comparative and coherent perspective on parliamentary candidates in contemporary representative democracy Based on the unique database of the Comparative Candidate Survey project which interrogated parliamentary candidates in more than 30 countries it fills a significant lacuna by focusing on the thousands of ordinary candidates that participate in national elections It examines who the candidates are in terms of their socio demographic background and political career patterns how they were selected by their parties what their policy preference are and whether these are congruent to those held by their voters who they seek to represent and how they intend to do so once elected and what their visions are on representative democracy and party government Last but not least it investigates how they go about reaching out to their potential voters during the election campaign This book will be of key interest to scholars and students of political parties and party politics political elites political communication political participation elections theories of democracy and representation legislative studies voting behaviour and more broadly to European politics as well as to political and policy professionals throughout Europe

How German Parties Select Candidates of Immigrant Origin Sara Ceyhan, 2020-10-31 This book analyzes the threshold candidates of immigrant background need to overcome to run for legislative office Understanding whether political parties are able to adapt their selection criteria helps to assess their ability to respond to the underrepresentation of citizens of immigrant origin in parliament Although Germany's ethnic diversity is on a steady rise citizens of immigrant origin remain descriptively underrepresented Despite the pivotal role the intra party candidate selection plays in shaping who runs for election the question of how candidates of immigrant background fare in political parties candidate selection in comparison

to native born candidates remained a blind spot of research Therefore the author presents in depth empirical evidence on the selection of candidates of immigrant background in German political parties The book addresses scholars of political science interested in electoral studies as well as policy makers and party officials interested in a balanced representation of their political representatives

Political Candidate Selection Jeanette Ashe,2019-12-05 The secret garden of politics where some win and others lose their candidate selection bids and why some aspirant candidates are successful while others fail have been enduring puzzles within political science This book solves this puzzle by proposing and applying a universally applicable multistage approach to discover the relationship between selection rules selectors biases aspirants attributes and selection outcomes Rare party and survey data on winning and losing candidates and insider views on what it takes to win a selection contest at multiple selection stages are compared and used to reveal the inner workings of the secret garden With a primary focus on the British Labour party over several elections the findings challenge many long held assumptions about why some aspirant candidate types are successful over others and provides real world and controversial solutions to addressing women s and other marginalised groups descriptive underrepresentation As such it provides a much needed fresh look at party selection processes and draws new conclusions as to why political underrepresentation occurs and should inform policies to remedy it This text will be of key interest to scholars and students of gender and ethnicity in politics political parties and candidate selection and more broadly to the study of political elites comparative politics sociology labour studies gender race and disability studies and to practitioners

The Electoral System in Britain Robert Blackburn,2016-07-27 This excellent new book provides a comprehensive account of the British system of parliamentary elections It contains a description of the current structure and operation of the electoral system and pays special attention to those subjects which have given rise to political concern or controversy in recent years There is extensive analysis and commentary upon the different proposals for reform which are currently in debate and the author puts forward his own conclusions on how the electoral system should be developed in the years ahead to modernise and improve the quality of representative democracy in Britain

Passages to Power Pippa Norris,1997-10-09 Recruitment to legislative office is one of the core functions of political systems yet we know little about how the process varies from one country to another Passages to Power provides a comparative account of legislative recruitment which applies a common analytical framework and new survey data to nineteen advanced democracies Legislative recruitment refers to the critical step as people move from lower levels of politics into parliamentary careers Who succeeds in becoming a politician Who fails And why Based on original research which adopts a new institutionalist perspective this 1997 book compares these issues in a wide range of countries This important study brings together an outstanding group of international scholars to look at recruitment around the world The countries examined in depth include Australia Canada Finland Germany Japan the Netherlands New Zealand the United Kingdom and the United States along with a comparison of all member states in the European Union

Career

Behaviour and the European Parliament William T. Daniel, 2015-04-30 Career Behaviour and the European Parliament seeks to answer the question of how a political institution such as the European Parliament can impact the career ambitions and behaviours chosen by European politicians Long considered a second order legislature in its degree of political importance and prestige the European Parliament is the only directly elected institution within the European Union and is an increasingly important part of the European legislative process Using a major new source of quantitative data and interviews with more than 50 current and former European legislators this book argues that as the institution has become increasingly professionalized and powerful the volatility of its membership has declined However the professional ambitions of its members vary greatly by national background leading to an uneven distribution of legislative seniority and influence within the legislature The book presents a new theory with political careers acting as institutions in themselves and also offers complete background information on all elected Members of the European Parliament from 1979 2014

Political Parties in Western Democracies Leon D. Epstein, What chiefly distinguishes this work is the inclusion of considerable material on American parties in a comparative context to the analysis of British Scandinavian European Canadian Australian and New Zealand political parties

Political Recruitment Pippa Norris, Joni Lovenduski, 1995 Asking why some politicians succeed in moving into the highest offices of state while others fail this text examines the relative lack of women black and working class Members of Parliament and whether this evident social bias matters for political representation

China's Authoritarian Path to Development Liang Tang, 2017-06-14 This book examines the various

stages of China's development in the economic social and political fields relating theories and models of development to what is actually occurring in China and discussing how China's development is likely to progress going forward It argues that China's modernization hitherto can be characterized as authoritarian development a fusion of mixed economic institutions of varying types of ownership with social stability and political cohesiveness and that the present phase where more emphasis is being given to social issues is likely to lead on to a new phase where a more mature civil society and a more extensive middle class are likely to look for greater democratization It presents an in depth analysis of China's changing social structure and civil society explores the forces for and processes of democratization and assesses the prospects for further democratization in the light of changing social structures Political Representation and Elections in Britain (Routledge Library Editions: Political Science Volume 12) Peter Pulzer, 2013-04-15 Originally published in 1972 this edition includes expanded sections on class and voting and elites and participation in modern democracy Many popular misconceptions about the militancy of party activists the relations between MPs and constituents the role of TV and the fairness of the electoral system are critically examined Equally important is the review of representational theories from Greek to Victorian in the light of what we know today about the workings of Parliament the role of pressure groups and the mixture of rational and irrational motives in human behaviour A range of twentieth century critiques including those of Robert Michels Joseph Schumpeter Robert Dahl and Peter Bachrach is presented Wherever possible British experience is compared with that of the USA continental Europe or the Commonwealth Modernising the Labour Party T. Quinn, 2004-10-14 Few parties have undergone such comprehensive organizational change as the Labour Party since 1983 Labour's organization once institutionalised the political exchange between office seeking politicians and the party's policy seeking trade union paymasters Using accessible rational choice models Thomas Quinn explores how consecutive election defeats prompted party leaders to modernize this structure to regain voters trust reducing union influence in policymaking parliamentary candidate selection and leadership contests The price may be a centralized party vulnerable to membership exit and union funding cuts *Reform in the House of Commons* Michael Jogerst, 2021-10-21 One of the most significant changes in the British House of Commons has been the development in 1979 of a system of select committees charged with monitoring government ministries Unlike previous experiments in parliamentary reform these committees are staffed exclusively with backbench MPs who regularly review executive policies and offer recommendations Michael Jogerst reappraises the relationship between the executive and legislative branches in light of these new circumstances which are likely to affect the entire governmental structure of the United Kingdom *Representing Women in Parliament* Marian Sawer, Manon Tremblay, Linda Trimble, 2006-09-27 Written by a major international team of authors this new study features twelve chapters on both new and established parliaments including Australia Canada New Zealand and the United Kingdom It tests the latest theories about women's political representation within Westminster style assemblies and is clearly organized into three key sections **Democracy within**

Parties Reuven Y. Hazan, Gideon Rahat, 2010-07-01 Can too much participation harm democracy Democratic theory places great importance upon the conduct of elections but it is not often recognized that the electoral game takes place in two arenas not only between parties but also within them This pioneering book presents a new approach to understanding political parties It sheds light on the inner dynamics of party politics and offers the first comprehensive analysis of one of the most important processes any party undertakes its process of candidate selection Candidate selection methods are the mechanisms by which a party chooses its candidates for the general elections It may be the function that separates parties from other organizations For such an important function this field has certainly faced a dearth of serious investigation Hazan and Rahat the leading scholars on this topic conduct an in depth analysis of the consequences of different candidate selection methods on democracy This book is a culmination of almost two decades of research and defines the field of candidate selection Part I of the book delineates candidate selection methods based on four major dimensions candidacy the selectorate decentralization and voting versus appointment systems Part II analyses the political consequences of using different candidate selection methods according to four important aspects of democracy participation representation competition and responsiveness The book ends with a proposed candidate selection method that optimally balances all four of the democratic aspects concurrently and answers the question Is the most participatory candidate selection method necessarily the best one for democracy Comparative Politics is a series for students teachers and researchers of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.essex.ac.uk/ecpr The General Editor is Professor David M Farrell School of Politics and International Relations University College Dublin

The Personalization of Democratic Politics and the Challenge for Political Parties William P Cross, Richard S Katz, Scott Pruyers, 2018-09-16 The implications of the personalization of politics are necessarily widespread and can be found across many different aspects of contemporary democracies Personalization should influence the way campaigns are waged how voters determine their preferences how officials e g MPs and institutions e g legislatures and governments function and the place and operations of political parties in democratic life However in an effort to quantify the precise degree of personalization over time and to uncover the various causes of personalization the existing literature has paid little attention to many of the important questions regarding the consequences of personalization While the chapters throughout this volume certainly document the extent of personalization they also seek to address some fundamental questions about the nature of personalization how it is manifested and its consequences for political parties governance representation and the state of democracy more generally Indeed one of the primary objectives of this volume is to speak to a very broad audience about the implications of personalization Those interested in election campaigns voting gender governance legislative behaviour and political parties will all find something
