*Meaning and Medicine* Hilde Lindemann Nelson, 1999-07-22 A chief aim of this resource is to rekindle interest in seeing health care not solely as a set of practices so problematic as to require ethical analysis by philosophers and other scholars but as a field whose scrutiny is richly rewarding for the traditional concerns of philosophy **Book Review Digest**, 1998

Paediatric Patient and Family-Centred Care: Ethical and Legal Issues Randi Zlotnik Shaul, 2014-04-16 This book provides the reader with a theoretical and practical understanding of two health care delivery models the patient child centred care and family centred care Both are fundamental to caring for children in healthcare organizations The authors address their application in a variety of paediatric healthcare contexts as well as an understanding of legal and ethical issues they raise Each model is increasingly pursued as a vehicle for guiding the delivery of health care in the best interests of children Such models of health care delivery shape health care policies programs facility design resource allocation decisions and day to day interactions among patients families physicians and other health care professionals To maximize the health and ethical benefits these models offer there must be shared understanding of what the models entail as well as the ethical and legal synergies and tensions they can create This book is a valuable resource for paediatricians nurses trainees graduate students practitioners of ethics and health policy Taking Sides Carol Levine, 1997 Taking Sides Clashing Views on Controversial Bioethical Issues 10th edition is a debate style reader designed to introduce students to controversies in bioethics The readings which represent the arguments of leading philosophers and social commentators reflect a variety of viewpoints and have been selected for their liveliness and substance and because of their value in a debate framework For each issue the editor provides a concise introduction and postscript summary The introduction sets the stage for the debate as it is argued in the yes and no readings and the postscript briefly reviews the opposing views and suggests additional readings on the controversial issue under discussion By requiring students to analyze opposing viewpoints and reach considered judgments Taking Sides actively develops students critical thinking skills It is this development of critical thinking skills that is the ultimate purpose of each of the volumes in the widely acclaimed Taking Sides program Book jacket **Diagnosis and Treatment in Internal Medicine** Patrick Davey, David Sprigings, 2018-08-30 Diagnosis and Treatment in Internal Medicine equips trainee doctors with the essential skills and core knowledge to establish a diagnosis reliably and quickly before

outlining the management of the clinical condition diagnosed Organised into three sections the first provides a vital overview whilst the second focuses on common presentations and diagnoses Uniquely this new book shows readers how to turn symptoms into a list of diagnoses ordered by probability a differential diagnosis Experienced consultants who teach trainees every day demonstrate how to derive an ordered differential diagnosis how to narrow this down to a single diagnosis and if not how to live with diagnostic uncertainty The final section provides a comprehensive account of the management of system based syndromes and diseases Highly structured chapters emphasize how common conditions present how to approach a diagnosis and how to estimate prognosis treatment and its effectiveness An onus is placed on the development of crucial diagnostic skills and the ability to devise evidence based management plans quickly and accurately making this an ideal text for core medical trainees

**The Philosophy and Practice of Medicine and Bioethics** Barbara Maier, Warren A. Shibles, 2010-11-03 This book challenges the unchallenged methods in medicine such as evidence based medicine which claim to be but often are not scientific It completes medical care by adding the comprehensive humanistic perspectives and philosophy of medicine No specific or absolute recommendations are given regarding medical treatment moral approaches or legal advice Given rather is discussion about each issue involved and the strongest arguments indicated Each argument is subject to further critical analysis This is the same position as with any philosophical medical or scientific view The argument that decision making in medicine is inadequate unless grounded on a philosophy of medicine is not meant to include all of philosophy and every philosopher On the contrary it includes only sound practical and humanistic philosophy and philosophers who are creative and critical thinkers and who have concerned themselves with the topics relevant to medicine These would be those philosophers who engage in practical philosophy such as the pragmatists humanists naturalists and ordinary language philosophers A new definition of our own philosophy of life emerges and it is necessary to have one Good lifestyle no longer means just abstaining from cigarettes alcohol and getting exercise It also means living a holistic life which includes all of one's thinking personality and actions This book also includes new ways of thinking In this regard the Metaphorical Method is explained used and exemplified in depth for example in the chapters on care egoism and altruism letting die etc

**Brocklehurst's Textbook of Geriatric Medicine and Gerontology E-Book** Howard M. growing patient population Consistent discussions of clinical manifestations diagnosis prevention treatment and more make reference quick and easy More than 250 figures including algorithms photographs and tables complement the text and help you find what you need on a given condition Clinical relevance of the latest scientific findings helps you easily apply the material to everyday practice A new chapter on frailty plus an emphasis on frailty throughout the book addresses the complex medical and social issues that affect care and the specific knowledge and skills essential for meeting your patients complex needs New content brings you up to date with information on gerontechnology emergency and pre hospital care HIV and aging intensive treatment of older adults telemedicine the built environment and transcultural geriatrics New editor Professor John Young brings a fresh perspective and unique expertise to this edition      *Cases in Pediatric Acute Care* Andrea Kline-Tilford,Catherine Haut,2020-03-30 *Cases in Pediatric Acute Care* presents over 100 real world pediatric acute care cases each including a brief patient history a detailed history of present illness presenting signs and symptoms vital signs and physical examination findings Ideal for developing a systematic approach to diagnosis evaluation and treatment this resource provides students and advanced practitioners with the tools required to deliver comprehensive care to acute chronic and critically ill children The cases encompass a wide range of body systems medical scenarios professional issues and general pediatric concerns and feature laboratory data radiographic images and information on case study progression and resolution Develops the essential skills necessary to provide the best possible pediatric acute care Discusses the most appropriate differential diagnoses diagnostic evaluation and management plans for each case Presents cases related to pulmonary cardiac neurologic endocrine metabolic musculoskeletal and other body systems Highlights key points in each case to quickly identify critical information *Cases in Pediatric Acute Care* is an excellent resource for advanced practice provider students and pediatric healthcare providers managing acutely ill children      *Is There a Duty to Die?* John Hardwig,2014-05-01 Amid the controversies surrounding physician assisted suicides euthanasia and long term care for the elderly a major component in the ethics of medicine is notably absent the rights and welfare of the survivor s family for whom serious illness and death can be emotionally and financially devastating In this collection of eight provocative and timely essays John Hardwig sets forth his views on the need to replace patient centered bioethics with family centered bioethics Starting with a critique of the awkward language with which philosophers argue the ethics of personal relationships Hardwig goes on to present a general statement on the necessity of family centered bioethics He reflects on proxy decisions the effects of elder care on the family the financial and lifestyle consequences of long term care and physician assisted suicide from the perspective of the family His penultimate essay *Is There a Duty to Die* carries the idea of family centered ethics to its logical controversial conclusion comments upon this essay from Daniel Callahan Larry Churchill Joanne Lynn and journalist Nat Hentoff offer differing views on this highly charged subject As advances in medicine prolong patient s lives the welfare of those ultimately responsible for medical care the family must be addressed Hardwig s courageous and illuminating

essays set forth a new direction in bioethics one that considers the welfare of everyone concerned      Families in the Intensive Care Unit Ashlee J. Vance, Deena Kelly Costa, Giora Netzer, 2025-05-09 This first edition of this text was the first book to comprehensively survey the challenges in understanding and working with families whose loved ones are critically ill The comprehensive nature of that book served as a state of the art reference in this sphere for a broad spectrum of researchers and clinicians All chapters were authored by established experts in the respective fields providing an overview that has been used both in theory and practice Since the first edition's publication the public recognition of the importance of families has increased dramatically as a consequence of the COVID 19 pandemic Most major decisions in the intensive care unit ICU are shared by clinicians and someone other than the patient Improving communication between clinicians and these surrogate decision makers has proven hard in multiple clinical trials Families suffer too when their loved ones are critically ill Anxiety stress and depression are common and post traumatic stress disorder may occur while their loved ones are still in the ICU Families struggle to understand prognoses and conflicts with the care team occur frequently These conflicts not only injure families but also contribute to health care provider burnout Now in its fully revised and expanded second edition Families in the Intensive Care Unit reflects lessons learned during the COVID pandemic response as well as knowledge gained about family support when families cannot be at the bedside The chapter subjects again reflect a combination of breadth and depth Physical and psychological morbidity are explored as barriers to effective decision making as are cognitive challenges The full array of the interdisciplinary and interprofessional team is represented emphasizing the multimodal approach This edition includes administrative considerations for health care management and approaches for training members of the health care team Similarly family voices are also represented The complete trajectory of needs of care are addressed including survivorship and end of life care      **Pediatric Critical Care Medicine** Derek S. Wheeler, Hector R. Wong, 2007 This new textbook is the definitive evidence based resource for pediatric critical care It is the first ostensibly evidence based pediatric critical care textbook and will prove an invaluable resource for critical care professionals across the globe
