Patients Story

Catherine Proot, Michael Yorke

Patients Story:

Christianity and the Brain: Patients Stories RAMSIS F. GHALY MD FACS, 2010-07-21 Dr Ramsis Ghaly is a Christian a physician a surgeon and a humanitarian This is the fourth book by Dr Ghaly bringing his philosophy on patient care and the medical profession to patients their families and healthcare providers This book honors his patients It includes their stories told by them in interviews The book represents the voice of the patients written for fellow patients to give them faith hope and courage as they face their own illness journey It is Dr Ghaly's hope that you will be better prepared to embark on an illness journey with the words for his book As you embark upon the illness journey it is important for the patient and his family to seek quality care asking questions and demanding only compassionate and professional healthcare from all involved Dr Ghaly hopes this book will provide insight into the illness journey comfort for the difficult times hope for the future and faith that with God's help all will be right Here are the stories of 100 of his patients They include many who have gone on to live healthy lives as well as some who have passed on Dr Ghaly has included his comments on most of the cases and on the medical conditions they faced

Doctors' Stories Kathryn Montgomery Hunter, 2020-06-30 A patient's job is to tell the physician what hurts and the physician's job is to fix it But how does the physician know what is wrong What becomes of the patient's story when the patient becomes a case Addressing readers on both sides of the patient physician encounter Kathryn Hunter looks at medicine as an art that relies heavily on telling and interpreting a story the patient's story of illness and its symptoms

The Silicone Breast Implant Story Marsha L. Vanderford, David H. Smith, 2013-11-05 This volume examines one health issue breast implants across a series of contexts often thought to be separate media coverage doctor patient interaction doctor doctor professional communication support group dialogues public relations campaigns and more In so doing it provides a narrative of how communication shapes the individual perceptions of health government and social policy concerning health care At the core of the silicone breast implant controversy is the need for people to act amid uncertainty about the health risks involved This need to weigh action in the midst of uncertain risk characterizes a large number of health issues The attempts of patients physicians drug manufacturers and others to seek and provide both information and influence makes communication central to these issues Consequently the questions explored in this volume will interest a diverse group of readers This audience includes plastic surgeons in particular physicians in general and anyone involved with women's health issues As the medical profession struggles with its identity amid changes in public attitudes government regulations and medical practices this volume's findings concerning media portrayals of doctors and medical devices become even more important Finally this study reveals how interrelated public information and private decisions are and how closely media and interpersonal relationships fit Tracing one medical issue across interpersonal organizational public relations and mediated forums has clearly demonstrated the multiple ways those communication channels overlap and inform one another

Stories of Sickness Howard Brody, 2002-10-31 Our personalities and our identities are intimately bound up with the

stories that we tell to organize and to make sense of our lives To understand the human meaning of illness we therefore must turn to the stories we tell about illness suffering and medical care Stories of Sickness explores the many dimensions of what illness means to the sufferers and to those around them drawing on depictions of illness in great works of literature and in nonfiction accounts The exploration is primarily philosophical but incorporates approaches from literature and from the medical social sciences When it was first published in 1987 Stories of Sickness helped to inaugurate a renewed interest in the importance of narrative studies in health care For the Second Edition the text has been thoroughly revised and significantly expanded Four almost entirely new chapters have been added on the nature complexities and rigor of narrative ethics and how it is carried out There is also an additional chapter on maladaptive ways of being sick that deals in greater depth with disability issues Health care professionals students of medicine and bioethics and ordinary people coping with illness no less than scholars in the health care humanities and social sciences will find much value in this volume Unique Features Philosophically sophisticated yet clearly written and easily accessible Interdisciplinary approach combines philosophy literature health care social sciences Contains many fascinating stories and vignettes of illness drawn from both fiction and nonfiction A new and comprehensive overview of the hot topic of narrative ethics in medicine and health care

The Unfolding Covid-19 My Thoughts, Memoirs and Patient's Stories Ramsis F. Ghaly MD, 2021-06-08 There is so much happening as we the people of the world continue to evolve through COVID 19 with it undoubtedly being one of the most catastrophic events of modern times This book is a continuation of my previous book titled Coronavirus The Pandemic of the Century and the Wrath of God It recalls actual stories and memories thus far as mankind continues to evolve from the gloominess of COVID 19 This book represents my thoughts views and various life events that I wish to share with you all As a neurosurgeon and an anesthesiologist working the front lines within three major medical centers of the greater metropolitan area of Chicago I have without hesitancy never closed my doors to my patients My faith in our Lord Jesus and my abounding love to my patients residents and students has kept me going and strengthened my soul During COVID and as the world coming out of COVID it was a good time to flash back in marvelous works of our Lord my patients stories and my achievements performances lessons learned This book is centered in deep Christian rituals and meditations consisting of 115 chapters distributed over 12 sections touching on various topics that have passed through my mind during the evolution of COVID 19 These topics range from what I deem critical COVID all the way to vaccines political COVID and concomitant events as well as my personal memoirs patient care and the living stories of my patients There is so much to share with you from April 2020 until the time of publication so let us open the book and explore my time during COVID 19 **Storytelling Encounters as Medical Education** Sally G. Warmington, 2019-10-08 This innovative volume provides fresh perspectives on how medical students and patients construct identities in relation to each other using stories of their clinical encounters It explores how paying attention to medical students and patients stories in clinical teaching encounters can encourage

empathy and the formation of professional identities that embody desirable values such as integrity and respect Written by an experienced clinician and based on original rigorous research combining ethnography and dialogic narrative analysis

Storytelling Encounters as Medical Education Crafting Relational Identity includes patient stories alongside those of students and clinical teachers This is an important contribution for all those interested in medical education narrative medicine person centred care and identity formation in healthcare It will also be of value to scholars in a range of other disciplines who are using a dialogic approach

Patient-Centered Medicine Moira Stewart, Judith Belle Brown, W. Wayne Weston, Thomas Freeman, Bridget L. Ryan, Carol L. McWilliam, Ian R. McWhinney, 2024-03-06 The Patient Centered Clinical Method PCCM has been a core tenet of the practice and teaching of medicine since the first edition of Patient Centered Medicine Transforming the Clinical Method was published in 1995 This timely fourth edition continues to define the principles underpinning the patient centered clinical method using four major components clarifying its evolution and consequent development and it brings the reader fully up to date It reinforces the relevance of the method in the current much changed realities of health care in a world where virtual care will remain common dependence on technology is rising and societal changes away from compassion equity and relationships toward confrontation inequity and self absorption Fully revised by its highly experienced author team ensuring wide interest and written for those practising now and for the practitioners of the future this new edition will be welcomed by a wide international audience comprising all health professionals from medicine nursing social work occupational therapy physical therapy pharmacy veterinary medicine and other fields

Storytelling in Medicine Colin Robertson, Gareth Clegg, James Huntley, 2023-09-20 Throughout our lives story is the medium each of us uses to make sense of our environment and relationships Stories provide meaning and context enriching our experiences and equipping us with a framework to navigate our existence This unique practical book for healthcare trainees practitioners and educators explores the ideas and practice of narrative and storytelling that lie at the very heart of clinical medicine and the patient experience of care It shows how story and narrative can be used effectively to help convey concepts such as prognosis and the effect of illness upon life and to prepare patients and their relatives for difficult and painful news Offering a particular insight into communication by and between healthcare professionals and how it can be refocused and improved this updated and expanded second edition remains an invaluable teaching aid for educators working in both small and large formats and for under and postgraduate students

Neuropsychological Assessment Muriel Deutsch Lezak, 2004 This revised text provides coverage of research and clinical practice in neuropsychology The 4th edition contains new material on tests assessment techniques neurobehavioral disorders and treatment effects

Living Stories Donald Capps, In Living Stories Donald Capps makes a forceful case for the importance of pastoral counseling in the life of a congregation Arguing convincingly for a paradigmatic revolution Capps offers a radically new model that gives systematic and constructive attention to the way people actually story their lives inspirationally paradoxically or miraculously Through such engagement

pastors can help people discover their own stories discern the shape and direction of those stories and move constructively to find new understandings or more hopeful possibilities in their life situations Health Literacy From A to Z Helen

Osborne,2011-10-07 Clear communication of your health message can make all the difference in effective patient care Health Literacy from A to Z Practical Ways to Communicate Your Health Message Second Edition is an easy to use handbook designed for the busy health professional Filled with ideas and strategies that can be used in everyday practice Health Literacy from A to Z is a first of its kind resource Important Notice The digital edition of this book is missing some of the images or content found in the physical edition **Challenges and Choices for Patient, Carer and Professional at the**

End of Life Catherine Proot,Michael Yorke,2021-03-17 Living with Uncertainty gives a broad perspective on the complexities and challenges of the practice of end of life care as well as the perceived benefits and limitations of medical intervention Drawn from research and clinical and pastoral experience the book examines the feelings associated with the end of life highlighting the demands that people are faced with and their consequences It moves into the difficult area of people who feel defeated by their illness and can or want to live no longer as well as the family caregivers and professionals who surround them These perspectives have been built upon around a hundred narratives of lived experience combined with the wider clinical and practical range of voices A topical post script Lessons from Covid 19 captures the choices and challenges on a personal professional and systemic level which the pandemic acutely revealed with a multiplicity of examples This will be essential reading for students and professionals in palliative and end of life care Families and friends will also benefit from this book as they try to come to terms with the delicate but universal issues of death and dying **Stories**

Matter Rita Charon,Martha Montello,2004-04-16 First published in 2002 The doctor patient relationship starts with a story Doctors notes a patient s chart the recommendations of ethics committees and insurance justifications all hinge on written and verbal narrative interaction The practice of narrative profoundly affects decision making patient health and treatment and the everyday practice of medicine In this edited collection the contributors provide conceptual foundations practical guidelines and theoretical considerations central to the practice of narrative ethics Integrating Health Humanities, Social Science, and Clinical Care Anna-leila Williams,2018-12-07 The health humanities are widely understood as a way to cultivate perspective compassion empathy professional identity and self reflection among health professional students This innovative book links humanities themes social science domains and clinical practice to invite self discovery and recognition of universal human experiences Integrating Health Humanities Social Science and Clinical Care introduces critical topics that rarely receive sufficient attention in health professions education such as cultivating resilience witnessing suffering overcoming unconscious bias working with uncertainty understanding professional and personal roles and recognizing interdependence The chapters encourage active engagement with a range of literary and artistic artefacts and guide the reader to question and explore the clinical skills that might be necessary to navigate clinical scenarios Accompanied by a range of pedagogical

features including writing activities discussion prompts and tips for leading a health humanities seminar this unique and accessible text is suitable for those studying the health professions on both clinical and pre clinical pathways Narrative Ethics in Public Health: The Value of Stories Drue H. Barrett, Leonard W. Ortmann, Stephanie A. Larson, 2022-04-12 This Open Access book illustrates the power of stories to illuminate ethical concerns that arise in public health It complements epidemiological or surveillance evidence and reveals stakeholder perspectives crucial for public health practitioners to develop effective and ethical public health interventions Because it relies on the natural and universal appeal of stories the book also serves to introduce the field of public health to students considering a career in public health The opening section of the book also serves as a more didactic introduction to public health ethics and the field of narrative ethics It describes the field of public health ethics including ethical principles relevant to public health practice and research and the advantages of a narrative ethics approach That approach explores the problems and the ethical challenges of public health from the inside from the perspective of those experiencing health problems to the challenges of those who must address these problems The later sections consist of 14 chapters that present the actual stories of these public health problems and challenges In narrative style they range from first person narratives of both practitioners and citizens to analysis of published short stories The problems and challenges they address include issues relating to justice concerns surveillance and stigma community values and the value of community trust and the value of information and freedom and responsibility Specific public health topics include resource allocation restricting liberty to protect the community from health threats and the health impact of trauma addiction obesity and health disparities **Claiming Power in Doctor-Patient Talk** Nancy

Ainsworth-Vaughn, 1998-06-25 Nancy Ainsworth Vaughn studied stories topic control true questions and rhetorical questions in 101 medical encounters in US private practice settings In exceptionally lucid and accessible style Ainsworth Vaughn explains how power was claimed by and co constructed for both patients and doctors previous studies have focused upon doctors power The discourse varied along a continuum from interview like talk to conversational talk Six chapters are organized around data and include extended examples of actual talk in detailed transcription four of these data oriented chapters focus upon dynamic moment to moment use of speech activities in emerging discourse such as doctors and patients stories that co constructed selves and a patient s sexual rhetorical questions Two more chapters offer non statistical quantitative data on the frequency of questioning and sudden topic changes in relation to gender diagnosis and other factors Contributing to discourse theory Ainsworth Vaughn significantly modifies previous definitions for topic transitions and rhetorical questions and discovers the role of storytelling in diagnosis The final chapter provides implications for physicians and medical educators **Palliative Care Nursing** Kathleen Ouimet Perrin, 2011-02-14 Palliative Care Nursing Caring for Suffering Patients explores the concept of suffering as it relates to nursing practice This text helps practicing nurses and students define and recognize various aspects of suffering across the lifespan and within various patient populations while

providing guidance in alleviating suffering In addition it examines spiritual and ethical perspectives on suffering and discusses how witnessing suffering impacts nurses ability to assume the professional role Further the authors discuss ways nurses as witnesses to suffering can optimize their own coping skills and facilitate personal growth Rich in case studies pictures and reflections on nursing practice and life experiences Palliative Care Nursing Caring for Suffering Patients delves into key topics such as how to identify when a patient is suffering whether they are coping sources of coping facades what to do to ease suffering and how to convey the extent of suffering to members of the health care team *Patient Safety and Healthcare Improvement at a Glance* Sukhmeet Panesar,Andrew Carson-Stevens,Sarah Salvilla,Aziz Sheikh,2014-06-16

Patient Safety and Healthcare Improvement at a Glance is a timely and thorough overview of healthcare quality written specifically for students and junior doctors and healthcare professionals It bridges the gap between the practical and the theoretical to ensure the safety and wellbeing of patients Featuring essential step by step guides to interpreting and managing risk quality improvement within clinical specialties and practice development this highly visual textbook offers the best preparation for the increased emphasis on patient safety and quality driven focus in today's healthcare environment *Healthcare Improvement and Safety at a Glance* Maps out and follows the World Health Organization Patient Safety curriculum Draws upon the quality improvement work of the Institute for Healthcare Improvement This practical guide covering a vital topic of increasing importance in healthcare provides the first genuine introduction to patient safety and quality improvement grounded in clinical practice **Mental Patient** Abigail Gosselin,2022-12-13 A philosopher who has experienced psychosis argues that recovery requires regaining agency and autonomy within a therapeutic relationship based on mutual trust In *Mental Patient* philosopher Abigail Gosselin uses her personal experiences with psychosis and the process of recovery to explore often overlooked psychiatric ethics For many people who struggle with psychosis she argues psychosis impairs agency and autonomy She shows how clinicians can help psychiatric patients regain agency and autonomy through a positive therapeutic relationship characterized by mutual trust Patients she says need to take an active role in regaining their agency and autonomy specifically by giving testimony constructing a narrative of their experience to instill meaning making choices about treatment and deciding to show up and participate in life activities Gosselin examines how psychotic experience is medicalized and describes what it is like to be a patient receiving mental health care treatment In addition to mutual trust she says a productive therapeutic relationship requires the clinician's empathetic understanding of the patient's experiences and perspective She also explains why psychotic patients sometimes feel ambivalent about recovery and struggle to stay committed to it The psychiatric ethics issues she examines include the development of epistemic agency and credibility epistemic justice the use of coercion therapeutic alliance the significance of choice and the taking of responsibility *Mental Patient* differs from straightforward memoirs of psychiatric illness in that it analyses philosophic issues related to psychosis and recovery and it differs from other books on psychiatric ethics in that its analyses are drawn from the author's

first person experiences as a mental patient **The Oxford Handbook of Social Neuroscience** Jean Decety, John T. Cacioppo, 2015-04-15

The complexities of the brain and nervous system make neuroscience an inherently interdisciplinary pursuit one that comprises disparate basic clinical and applied disciplines Behavioral neuroscientists approach the brain and nervous system as instruments of sensation and response cognitive neuroscientists view the same systems as a solitary computer with a focus on representations and processes The Oxford Handbook of Social Neuroscience marks the emergence of a third broad perspective in this field Social neuroscience emphasizes the functions that emerge through the coaction and interaction of conspecifics the neural mechanisms that underlie these functions and the commonality and differences across social species and superorganismal structures With an emphasis on the neural hormonal cellular and genetic mechanisms underlying social behavior social neuroscience places emphasis on the associations and influences between social and biological levels of organization This complex interdisciplinary perspective demands theoretical methodological statistical and inferential rigor to effectively integrate basic clinical and applied perspectives on the nervous system and brain Reflecting the diverse perspectives that make up this field The Oxford Handbook of Social Neuroscience brings together perspectives from across the sciences in one authoritative volume

Getting the books **Patients Story** now is not type of challenging means. You could not abandoned going later than books addition or library or borrowing from your associates to entry them. This is an definitely simple means to specifically acquire lead by on-line. This online statement Patients Story can be one of the options to accompany you taking into account having extra time.

It will not waste your time. receive me, the e-book will very look you further event to read. Just invest little grow old to approach this on-line message **Patients Story** as well as review them wherever you are now.
