Ancient Near Eastern History and Culture William H. Stiebing Jr., 2016-07-01 This introduction to the Ancient Near East includes coverage of Egypt and a balance of political social and cultural coverage Organized by the periods kingdoms and empires generally used in Near Eastern political history the text interlaces social and cultural history with the political narrative This combination allows students to get a rounded introduction to the subject of Ancient Near Eastern history An emphasis on problems and areas of uncertainty helps students understand how evidence is used to create interpretations and allows them to realize that several different interpretations of the same evidence are possible This introduction to the Ancient Near East includes coverage of Egypt and a balance of political social and cultural coverage
Where Do We Come From? Jan Klein, Naoyuki Takahata, 2013-03-09 From the moment it first began to contemplate the world three questions have occupied the human mind Where do we come from What are we Where are we going Artists notably Paul Gauguin religious thinkers philosophers and most recently scientists have all searched for answers Here the authors describe how scientists decipher human origin from the record encrypted in the DNA and protein molecules After explaining the nature of descent and the methods available for studying genealogical relationships they summarize the information revealed by the molecular archives about the Tree of Life and our location on one of its branches The knowledge thus gleaned allows them to draw conclusions about our identity our place in the living world our future and the ethical implications of the changed perspective
Ride of the Second Horseman Robert L. O'Connell, 1997-10-23 In *Ride of the Second Horseman* Robert L O Connell probes the distant human past to show how and why war arose concluding that it is an invention an institution that formed due to very specific historical circumstances an institution that now verges on extinction He begins with a definition that distinguishes between war and mere feuding and draws on anthropology and archeology to locate the rise of war sometime after the human transition from nomadic hunting and gathering to agriculture when society split between farmers and pastoralists O Connell explores the histories of the civilizations of ancient Sumeria Egypt Assyria China and the New World showing how war came to each and how it adapted to varying circumstances Studying societies based on trade he finds that they employed war much more selectively and pragmatically Thus Minoan Crete long protected from marauding pastoralists developed a wealthy mercantile society marked by unmilitaristic attitudes equality between men

and women and a relative absence of class distinctions In Assyria by contrast war came to be an end in itself in a culture dominated by male warriors Despite the violence in the world today O Connell finds reason for hope The industrial revolution broke the old patterns of subsistence war no longer serves the demographic purpose it once did Fascinating and provocative Ride of the Second Horseman offers a far reaching tour of human history that suggests the age old cycle of war may now be near its end
