**Edge of the Sacred - Jung, Psyche, Earth** David Tacey, Does earth have spirit or soul This is a question being asked ever more frequently especially by those interested in the future of the natural world and the development of consciousness The alchemists said the greater part of the soul is outside the body and indigenous cultures have felt that soul or spirit resides in Nature and the physical environment Such notions have been dismissed by modernity as illusions but we are beginning to have second thoughts about the animation of the earth Science and rationality have not taught us how to love or care for the earth and in the modern era the environment has been disrespected The mythic bonds to Nature such as those found in Aboriginal Australian cultures appear to have real survival value because they bind us to the earth in a meaningful way When these bonds are destroyed by excessive rationality or a collapse of cultural mythology we are left alone outside the community of Nature and in an alienated state In this state we do real damage to the environment because it is no longer part of our spiritual body or moral responsibility Jung was one of the first thinkers of our time to consider the psychic influence of the earth and the conditioning of the mind by place Inspired by his writings and those of James Hillman the field of ecopsychology has arisen as a powerful new area of inquiry Edge of the Sacred Jung Psyche Earth contributes to global ecopsychology from an Australian perspective

**Four Overarching Patterns of Culture** Robert Strauss, Christopher Strauss, 2019-08-20 Justice has been the dominant cultural framework of people in the West for two centuries ever since the rise of constitutional democracies Consciously or not most people in the West have a strong awareness of right and wrong Their sense of morality is generally rooted in an obligation to the rule of law In democratic societies the rule of law ultimately relies on constitutional documents ratified by a widely accepted process of development and implementation For millennia honor has been the dominant cultural framework of most people in the East and Middle East Here people know that speech and behavior display respect or disrespect While pervasive in all relationships honor and shame are most important in the family extended family and local community In the East honor is not necessarily an internal feeling as it is in a justice culture Honor is more often an external attribution bestowed by others rather than claimed by oneself Harmony is prevalent globally in indigenous cultures Many indigenous

peoples do not distinguish between the supernatural and natural worlds All aspects of life are connected Interactions with spirit beings are the key to maintaining harmony in order to be secure Reciprocity is a common cultural framework in the Global South Here one learns to develop connections with the right people in given circumstances for needed resources These connections may or may not be characterized as friendships and provide not so much close friendships as reciprocal exchange In some places reciprocity is the means whereby one survives
