**Whitaker's Cumulative Book List** ,1983      *International Books in Print* ,1986      Literary Performances of Post-Religious Memory in the Netherlands Jesseka M. Batteau,2021-10-11 This book offers an in depth study of iconic literary narratives and images of religious transformation and secularisation in the Netherlands during the 1960s and 1970s Jesseka Batteau shows how Gerard Reve Jan Wolkers and Maarten t Hart texts and performances can be understood as instances of religious and post religious memory with a broad public impact They contributed to a widely shared perspective on the Dutch religious past and a collective understanding of what secularisation consists of This uniquely interdisciplinary approach combines insights from literary studies memory studies media studies and religious studies and traces the complex dynamics of the circulation of memory and meaning between literary texts mass media and embodied performances within a post religious society      *Standard Catalog for Public Libraries; an Annotated List of L2,300 Titles with a Full Analytical Index; Supplement* H.W. Wilson Company,1954      Chandragupta Maurya Sushma Jansari,2023-06-01 We take it for granted that some historical figures become heroes and others do not Chandragupta Maurya evolved from obscure ruler to contemporary national icon The key moment in the making of this Indian hero was a meeting by the banks of the River Indus between Chandragupta and Seleucus founder of the Seleucid empire and one of Alexander the Great s generals in c 305 3 BC This significant event was a moment of peace making at the end of conflict But no reliable account exists in early sources and it is not even clear which ruler was victorious in battle This uncertainty enabled British and Indian historians of the nineteenth and twentieth centuries to interpret the sources in radically different ways With Chandragupta representing India and

Seleucus standing in for Britain British scholars argued that Seleucus defeated Chandragupta while Indian academics contended the opposite The writing and reception of history fundamentally influences how we engage with the past and the evolving colonial and post colonial relationship between Britain and India is crucial here In India the image of Chandragupta as an idealised hero who vanquished the foreign invader has prevailed and found expression in contemporary popular culture In plays films television series comic books and historical novels Chandragupta is the powerful and virtuous Hindu ruler par excellence The path to this elevated standing is charted in this book Whitaker's Books in Print ,1998 Forthcoming Books Rose Army,2001-08 **Masonic Standard** ,1917 Corpus Juris, Being a Complete and Systematic Statement of the Whole Body of the Law as Embodied in and Developed by All Reported Decisions William Mack,William Benjamin Hale,1920

**The Molecular Pathology of Cognitive Decline: Focus on Metals** Paul A. Adlard,Roger Chung,2016-02-02 In the past two decades there have been significant advances made in understanding the cellular and molecular alterations that occur with brain ageing as well as with our understanding of age related brain diseases Ageing is associated with a mid life decline in many cognitive domains eg Attention working memory episodic memory that progresses with advancing age and which may be potentiated by a variety of diseases However despite the breadth of attempts to explain it the underlying basis for age related memory impairment remains poorly understood Both normal and pathological ageing as in age related neurodegenerative disorders such as Alzheimer's disease may be associated with overlapping and increased levels of abnormal pathology and this may be a potential mediator of cognitive decline in both populations An emerging hypothesis in this field is that metal ion dys homeostasis may represent a primary unifying mechanism to explain age and disease associated memory impairment either indirectly via an effect on disease pathogenesis or by a direct effect on signaling pathways relevant to learning and memory There remains a concerted worldwide effort to deliver an effective therapeutic treatment for cognitive decline associated with ageing and or disease which is currently an unmet need There have been numerous clinical trials conducted specifically testing drugs to prevent cognitive decline and progression to dementia but to date the results have been less than impressive highlighting the urgent need for a greater understanding of the neurobiological basis of memory impairment in ageing and disease which can then drive the search for effective therapeutics
