Pavimentos En La Construcción:

Pavimentos. Nuevos revestimientos Montse Bosch González, Sílvia Escolar Hernández, María del Portal Latas Malet, 2002
El presente volumen tiene por objeto ser un documento de consulta para estudiantes y profesionales relacionados con el mundo de la arquitectura y la construcción. En él se ofrece la información sobre los materiales utilizados como revestimientos de pavimentos de forma bastante similar a como aparece en las Normas Técnicas Españolas NTE lo que facilita su consulta por familiaridad. Incluye aportaciones concretas sobre nuevos conceptos como la reutilización de materiales y su impacto ecológico, la modernización del diseño de los detalles constructivos, la adecuación de las propiedades y características técnicas de los materiales a las normativas europea y española actuales, así como información sobre algunos de los materiales que han aparecido en los últimos años y que no están recogidos en las NTE. Este libro no pretende en ningún caso sustituir a las normas que se utilizan actualmente como documento de consulta para la redacción de proyectos sino más bien ofrecer un material complementario sobre conceptos que se renuevan rápidamente y que necesitan ser actualizados más deprisa de lo que las NTE permiten. Al final de cada capítulo se ofrece un listado de páginas web, documentos de consulta ineludible hoy en día en las que se halla más información complementaria.

Se reportan los mecanismos de diseño de pavimentos y las ecuaciones matemáticas más utilizadas en el mundo para intentar predecir el comportamiento que experimentan los materiales que componen estas estructuras viales. Además se presentan de manera resumida y didáctica las especificaciones técnicas de construcción y los ensayos que se deben ejecutar a la hora de evaluar los requisitos mínimos de calidad de los materiales que conforman pavimentos. En síntesis, el presente documento técnico trata los aspectos más importantes que el ingeniero debe conocer a la hora de diseñar, construir, controlar e investigar pavimentos para carreteras y vías urbanas.
