Erdos,2025-07-23 This book adopting a systemic transdisciplinary perspective explores the sociopsychological and the psychosocial interfaces shaping people's lived experiences of liminality. It is about life's outstandingly chaotic and confusing moments regularly recurring in or under calamitous circumstances pervading our lives in the 21st century. Prospects for constructive change have traditionally been present in transformative liminal settings. The broad context of permanent liminality however is conducive to impasses in the process of change. The resulting liminal hotspots are characterized by a turmoil of negative feelings and increased suggestibility. In the book discursive analyses underpin and illustrate the key points. Part I of the book serves as an introduction exploring the mixed potential inherent in languaging and symbol use in the social construction of transitions and liminal phenomena. Part II comprises sociopsychological analyses of the contexts as labyrinths of meaning of today's globalized and mazed societies where economy, politics, and information communication technologies are closely intertwined to maintain trickster liminality. This part includes explorations on two distinct forms of manipulative discourse characteristic of authoritarian regimes, highlighting the role of double bind relations that permeate a despotic system to perpetuate unpredictability, chaos, and repeated entrapments in liminal hotspots. The author explores the discursive practices altering the traditional patterns of transformative liminality into the absurdity of permanent liminality with its self-destructive power. Part III is about the psychosocial interface focusing on the intersubjective domain of the individual's lived experiences, specifically on the phenomenological connections between rites of transition and psychosocial crises. Further, it comprises explorations on the prospects for transformative liminality inherent in dialogue. As a conclusion, humans' constructive potential must be coupled with care to benefit from transformations. Transitioning from one form of process into the subsequent one remains an intrinsic and mercurial event in human development. Let us embrace these moments but embrace them with care. **Transitions: Liminality as Lived Experience** is primarily intended for scholars as well as students, master's level or PhD in the broad area of social sciences, especially in social communication, discourse studies, counselling, semiotic, cultural psychology, social psychology, and clinical social work.

Laugh out Loud: A User's Guide to Workplace Humor Barbara Plester, Kerr Inkson, 2018-09-24 This book is the first ever authoritative work on the use and management of humor in the workplace. It is a practical guide for everyone involved: the humorists, jokers, the targets, sometimes victims, the observers, audience, and most of all, the managers who have to set the tone and encourage, control, and manage humor. Humor is part and parcel of every workplace. However, while it usually demonstrates and fosters a united, happy workforce, it can at times be deeply damaging and divisive. The authors, academics with vast organizational experience and a research-based understanding of humor at work, bring together state-of-the-art knowledge of the topic, making it fun, accessible, and readable for all humor participants. The topics include how humor works, humor cultures in organizations, the many forms of workplace humor, and their pros and cons; humor rituals at work; digital humor; workplace jokers; the 21st-century issue of political correctness; and both the bright side of humor assisting positive cultures, making work fun, and its dark side where humor
