The Encyclopedia of Best Films Jay Robert Nash,2019-10-23 This all inclusive A Z encyclopedia by one of the

world's foremost experts on cinema provides comprehensive annotations of the best films produced from 1914 on. The work offers more than 5,000 three to five star entries: three stars good, four stars excellent, five stars masterpiece, and yes, author Jay Robert Nash has viewed every single one of them as well as many more that did not make the cut. In addition to a precis, each film's entry also includes a listing of the cast as well as the key principles involved in production from the director to the hair stylist. Especially unique to this book is a rating system that helps parents determine whether or not a film is appropriate for their children. Unlike the industry rating system which can be influenced by studio lobbying, Nash objectively evaluates each film and confers upon it one of four recommendations for viewing: recommended, acceptable, cautionary, and unacceptable. Backmatter includes a list of top films by genre, i.e. animated, drama, sports, mystery, adventure, etc. as well as an annotated name index listing all persons mentioned along with their dates of birth and death. Rounding out this essential volume for the film buff are over 500 still photos from the author's private collection.

Hollywood Presents Jules Verne
 Brian Taves, 2015-05-26 An illuminating look at how filmmakers have taken us around the world under the sea and to the center of the earth over the course of a century. *Milwaukee Express*. Even for those who have never read Jules Verne, the author's very name conjures visions of the submarine in *Twenty Thousand Leagues Under the Sea*, the epic race in *Around the World in Eighty Days*, the spacecraft in *From the Earth to the Moon*, and the daring descent in *Journey to the Center of the Earth*. One of the most widely translated authors of all time, Verne has inspired filmmakers since the early silent period and continues to fascinate audiences more than a century after his works were first published. His riveting plots and vivid descriptions easily transform into compelling scripts and dramatic visual compositions. In *Hollywood Presents Jules Verne*, Brian Taves investigates the indelible mark that the author has left on English language cinema. Adaptations of Verne's tales have taken many forms: early movie shorts, serials, feature films, miniseries, and television shows, and have been produced as both animated and live action films. Taves illuminates how, as these stories have been made and remade over the years, each new adaptation looks back not only to Verne's words but also to previous screen incarnations. He also examines how generations of actors have portrayed iconic characters such as Phileas Fogg and Captain Nemo, and how these figures are treated in pastiches such as *Journey 2: The Mysterious Island*. Investigating the biggest box office hits as well as lower budget productions, this comprehensive study will appeal not only to fans of the writer's work but also to readers interested in the ever-changing relationship between literature, theater, and film.
