Subject Guide to Books in Print, 2001 Metals, Fertility, and Reproductive Toxicity Mari S. Golub, 2005-11-10 Environmental endocrine disruptors have been at the heart of discussions about chemicals and their effects on fertility but the focus has been on organic compounds and the role of metals has been largely overlooked until now Taking an organ system based approach *Metals Fertility and Reproductive Toxicity* examines the effects of metals found in the everyday environment on fertility rates in humans and animal populations This volume summarizes and evaluates the literature in the area of metal effects on fertility and reproduction in humans laboratory animals and wildlife International experts have contributed chapters that explore how the ovary testes uterine system and neuroendocrine system among others respond to metal exposure Reviewing both current knowledge and cutting edge data the chapters focus on either a particular metal or a particular population A massive amount of data on this subject has been generated summarized and reviewed over the years While there are many books available on metals toxicity and on reproductive toxicity no current book

explores both in the same volume Culling information from throughout the literature Metals Fertility and Reproductive Toxicity supplies an in depth look at the role of metals in endocrine disruption and the spectrum of mechanisms involving metals that can influence reproduction **Surfactants and Cosolvents for NAPL Remediation A Technology Practices Manual**

Donald F. Lowe,Carroll L. Oubre,C. H. Ward,1999-03-26 A 19 3 million Department of Defense grant to Rice University funds the Advanced Applied Technology Demonstration Facility AATDF One of the project goals is the development of reduction strategies for nonaqueous phase liquids NAPLs in the subsurface Surfactants and Cosolvents for NAPL Remediation records the results of AATDF research The manual is a guide to the practical application of surfactants cosolvent for in situ remediation It is targeted to decision makers and anyone concerned with the design or implementation of these technologies The book discusses the situational viability of surfactants cosolvents the possible results design and operation It includes case studies step by step guidance and project cost work sheets The successful results of the AATDF research as documented Surfactants and Cosolvents for NAPL Remediation are an invaluable contribution to the future of subsurface remediation Without source NAPL reduction the alternative is decades of plume management through pump and treat **Recent Achievements in Environmental Fate and Transport** Fred T. Price,2000 **Herbicides** Mohammed Nagib

Hasaneen,2011-12-22 This volume contains two sections Mechanisms of herbicidal action chapters 1 4 and Mode of action of selected herbicides on controlling diseased weed growth and productivity and or growth and development of field crops chapters 5 10 Topics by chapters are molecular mechanism of action immunosensors laboratory studies molecular modeling weed resistance community response use of herbicides in biotech culture gene flow herbicides and risk herbicides persistence These recurring themes reinforce my view held over a very long time that experience with one crop or problem can sometimes be relevant often to an unexpected extent to an apparently dissimilar situation in a different crop I hope that readers interested in herbicides and pesticides will be satisfied with all the chapters in the book as its content might be of interest and value to them in the future **Bioremediation and Biotechnology, Vol 3** Rouf Ahmad Bhat,Khalid Rehman Hakeem,Najla Bint Saud Al-Saud,2020-07-08 Healthy environment is important for any kind of biota on earth It provides the basic elements of life such as clean water fresh air fertile soil and supports ecosystem of the food chain Pollution drastically alters quality of the environment by changing the physico chemical and biological aspects of these components Accordingly toxic metals combustible and putrescible substances hazardous wastes explosives and petroleum products are all examples of inorganic and organic compounds that cause contaminations Specifically pollution of toxic and heavy metal in the environment is a growing problem worldwide currently at an alarming rate Toxic metals threaten the aquatic ecosystems agriculture and ultimately human health Traditional treatment techniques offer certain advantages such as rapid processing ease of operation and control and flexibility But they could not maintain the quality of the environment due to the high operational costs of chemicals used high energy consumption and handling costs for sludge disposal and overburden of

chemical substances which irreversibly affect and destroy biodiversity which ultimately render the soil useless as a medium for plant growth Therefore bioremediation and biotechnology carried out by living assets to clean up stabilize and restore contaminated ecosystems have emerged as promising environmental friendly and affordable approaches Furthermore the use of microbes algae transgenic plants and weeds adapted to stressful environments could be employed to enhance accumulation efficiency Hence sustainable and inexpensive processes are fast emerging as a viable alternative to conventional remediation methods and will be most suitable for developing countries In the current volume we discuss pollution remediation challenges and how living organisms and the latest biotechnological techniques could be helpful in remediating the pollution in ecofriendly and sustainable ways

Gulf War and Health Institute of Medicine, Board on Health Promotion and Disease Prevention, Committee on Gulf War and Health: Literature Review of Pesticides and Solvents, 2003-12-10 Gulf War and Health Volume 2 is the second in a series of congressionally mandated studies by the Institute of Medicine that provides a comprehensive assessment of the available scientific literature on potential health effects of exposure to certain biological chemical and environmental agents associated with the Gulf War In this second study the committee evaluated the published peer reviewed literature on exposure to

insecticides and solvents thought to have been present during the 1990 1991 war Because little information exists on actual exposure levels a critical factor when assessing health effects the committee could not draw specific conclusions about the health problems of Gulf War veterans However the study found some evidence although usually limited to link specific long term health outcomes with exposure to certain insecticides and solvents The next phase of the series will examine the literature on potential health effects associated with exposure to selected environmental pollutants and particulates such as oil well fires and jet fuels
