Revising Herself Womens Identity From College To Midlife:

Revising Herself Ruthellen Josselson, 1998-04-23 In 1972 Ruthellen Josselson was a young psychologist fascinated by the riddle of how a woman creates an identity and chooses one path over another in life particularly in the face of the nascent feminist movement which challenged as never before the traditional role models of earlier generations Selecting at random thirty young women in their last year of college Josselson undertook a ground breaking study that would follow these women s personal odysseys over the next twenty two years from graduation to midlife What she learned about the ways women reinvent themselves in an ever changing world is the subject of *Revising Herself* a myth shattering look at both a unique generation of American women on the front lines of wrenching social change and at the conflicts and compromises facing women today With stunning candor and hard won insight the ordinary and anonymous women in Josselson s study reveal how much more complex and interesting real women s lives are than the one dimensional stereotypes often portrayed in the media Dismissing a traditional stage theory of development as overly simplistic Josselson identifies four trajectories that women take from adolescence to adulthood Guardians are the good girls high achieving and committed to fulfilling their family s expectations but rigid in outlook and resistant to change Pathmakers are not afraid of risk or commitment striving to balance their own needs with others The often idealistic Searchers are overwhelmed by choice and unable to make commitments while Drifters live only for the moment avoiding choice and an exploration of identity Reflecting the degree to which women take risks make choices and form commitments these paths form a foundation for adulthood but they also lead to surprises at midlife Guardians seem strikingly able to cut loose from earlier traditional patterns while many Drifters have found themselves sometimes in quite traditional ways And coming of age just as the feminist movement gathered momentum the women in Josselson s study were the first to confront many contemporary issues not faced by their mothers or their mothers mothers How does an Irish Catholic contemplate an abortion How does a woman whose parents believe education is wasted on a daughter find the will to apply to medical school In examining these questions and others Josselson shows that the forging of a woman s identity whatever her path is ongoing a balancing of the need for self assertion against the equally compelling need for relationships Women create their identities along the seams of both competence and connection and continually revise what they have made Allowing women to define themselves in their own terms *Revising Herself* holds up a provocative mirror in which readers can reflect upon their own life choices Whether a Guardian Pathmaker Searcher or Drifter readers will recognize themselves in these women s experiences and gain new insight into how we construct our identities over a lifetime

The Psychology of Women at Work Michele A. Paludi,2008-06-30 According to the U S Department of Labor women made up 46.4 percent of the civilian labor force in 2005 and that percentage is expected to reach 47 percent by 2014 Professional and health related occupations are the fastest growing roles for women with computer related environmental and educational fields also drawing increasingly on the female workforce The bottom line at a macro level is

that more and more women are driving the country's economic development. But with that phenomenon come questions, challenges, and concerns on many diverse levels. Debates rage on psychological topics such as the effect the increasing number of women at work has on marriage and divorce, family and children, women's identities and stress levels, and overall their physical and mental health. Psychologist Michele A. Paludi and her team of experts from across fields examine all aspects of women at work: the pros and cons, how it is changing American society, its women, their relationships, partners, and children. The factors that fuel women achievers are also discussed by female scholars and experts in the field who illustrate points with vignettes and their own career development stories. Issues in the workplace affecting women's wellbeing are also discussed, including sexual harassment and related laws, pregnancy-related work policy and regulations, challenges for women bosses and career moms, the glass ceiling, racism, women's relationships with male coworkers, and issues that arise when a woman is the breadwinner. This unique and timely set will appeal to those who are interested in psychology, women's studies, education, law, business, and public policy.
