*Placing Nature on the Borders of Religion, Philosophy and Ethics* Dr Forrest Clingerman, Mr Mark H Dixon, 2013-06-28 The natural world has been humanized even areas thought to be wilderness bear the marks of human impact But this human impact is not simply physical At the emergence of the environmental movement the focus was on human effects on nature More recently however the complexity of the term nature has led to fruitful debates and the recognition of how human individuals and cultures interpret their environments This book furthers the dialogue on religion ethics and the environment by exploring three interrelated concepts to recreate to replace and to restore Through interdisciplinary dialogue the authors illuminate certain unique dimensions at the crossroads between finding value creating value and reflecting on one's place in the world Each of these terms has diverse religious ethical and scientific connotations Each converges on the ways in which humans both think about and act upon their surroundings And each radically questions the damaging conceptual divisions between nature and culture human and environment and scientific explanation and religious ethical understanding This book self consciously reflects on the intersections of environmental philosophy environmental theology and religion and ecology stressing the

importance of how place interprets us and how we interpret place In addition to its contribution to environmental philosophy this work is a unique volume in its serious engagement with theology and religious studies on the issues of ecological restoration and the meaning of place

**Learning from Failure** Luigia Binda, 2008 On March 17 1989 the Civic Tower of Pavia collapsed without apparently any warning sign killing four people After an experimental and analytical investigation lasted nine months the collapse cause was found in a progressive damage dating back many years and due mainly to the heavy dead load put on top of the existing medieval tower when realising a massive bell tower in granite Other case histories have been collected as the collapse of the St Marco bell tower in Venice in 1902 of the Sancta Maria Magdalena bell tower in 1992 in Dusseldorf the damages of the bell tower of the Monza Cathedral and of the Torrazzo in Cremona Later on in 1996 the collapse of the Noto Cathedral showed that similar progressive damages can take place in pillars of churches and cathedrals The experimental research aimed to show the reliability of this interpretation went on and it is still continuing since 1989 and it is described in the book After a careful interpretation of the experimental results also based on experiences from rock mechanics and concrete the modelling of the phenomenon for massive structures as creep behaviour of masonry was implemented The book has the scope of helping architects and engineers to deal with the continuous damage of heavy structures and to understand the signs of the phenomenon while proposing some modelling but also to give guidelines for the on site investigation monitoring and repairing of the damaged structures

**Bodies and Ruins** David F. Crew, 2017-05-19 *Bodies and Ruins* explores changing German memories of World War II as it analyzes the construction of narratives in the postwar period including the depiction of the bombing of individual German cities The book offers a corrective notion rising in the late 1990s notion that discussions of the Allied bombing were long overdue because Germans who had endured the bombings had largely been condemned to silence after 1945 David Crew shows that far from being marginalized in postwar historical consciousness the bombing war was in fact a central strand of German memory and identity Local narratives of the bombing war including photographic books had already established themselves as important vectors of memory in the late 1940s and early 1950s The bombing war had allowed Germans to see themselves as victims at a time when the Allied liberation of the concentration

camps and the Nuremberg trials presented Germans to the world as perpetrators or at least as accomplices. The bombing war continued to serve this function even as Germans became more and more willing directly to confront the genocide of European Jews which by the 1960s was beginning to be referred to as the Holocaust. *Bodies and Ruins* examines a range of local publications that carried photographic images of German cities destroyed in the air war, images that soon entered the visual memory of World War II. Despite its obvious importance, historians have paid very little attention to the visual representation of the bombing war. This book follows the search for what were considered to be the right stories and the right pictures of the bombing war in local publications and picture books from 1945 to the present and is intended for historians as well as general readers interested in World War II, the Allied bombing of German cities, the Holocaust, the history of memory and photographic visual history.

*Exploring Bach's B-minor Mass* Yo Tomita, Robin A. Leaver, Jan Smaczny, 2013-10-17 The B minor Mass has always represented a fascinating challenge to musical scholarship. Composed over the course of Johann Sebastian Bach's life, it is considered by many to be the composer's greatest and most complex work. The fourteen essays assembled in this volume originate from the International Symposium Understanding Bach's B minor mass at which scholars from eighteen countries gathered to debate the latest topics in the field. In revised and updated form, they comprise a thorough and systematic study of Bach's Opus Ultimum, including a wide range of discussions relating to the Mass's historical background and contexts, structure and proportion, sources and editions, and the reception of the work in the late eighteenth and early nineteenth centuries. In the light of important new developments in the study of the piece, this collection demonstrates the innovation and rigour for which Bach scholarship has become known.
