They refute postmodernist arguments that Frye's literary criticism is obsolete and propose his wide ranging and non linear ways of thinking as a model for twenty first century readers searching for innovative ways of understanding literature and its relevance to contiguous disciplines The volume provides an in depth examination of Frye's work on a range of literary questions periods and genres as well as a consideration of his contributions to literary theory philosophy and theology The portrait that emerges is that of a writer who still has much to offer those interested in literature and the ways it represents and transforms our world The book s overall argument is that Frye s case for the centrality of the imagination has never been more important where understanding history reconciling science and culture or reconceptualizing social change is concerned
