Seth,2010-10-16 In this comprehensive yet compact book Michael J Seth surveys Korean history from Neolithic times to the present He explores the origins and development of Korean society politics and its still little known cultural heritage from their inception to the two Korean states of today Telling the remarkable story of the origins and evolution of a society that borrowed and adopted from abroad Seth describes how various tribal peoples in the peninsula came together to form one of the world s most distinctive communities He shows how this ancient culturally and ethnically homogeneous society was wrenched into the world of late nineteenth century imperialism fell victim to Japanese expansionism and then became arbitrarily divided into two opposed halves North and South after World War II Tracing the past seven decades the book explains how the two Koreas with their deeply different political and social systems and geopolitical orientations evolved into sharply contrasting societies South Korea after an unpromising start became one of the few postcolonial developing states to enter the ranks of the first world with a globally competitive economy a democratic political system and a cosmopolitan and dynamic culture North Korea by contrast became one of the world s most totalitarian and isolated societies a nuclear power with an impoverished and famine stricken population Seth describes and analyzes the radically different and historically unprecedented trajectories of the two Koreas formerly one tight knit society Throughout he adds a rich dimension by placing Korean history into broader global perspective and by including primary readings from each era All readers looking for a balanced knowledgeable history will be richly rewarded with this clear and concise book *Communism and Reform in East Asia (RLE Modern East and South East Asia)* David Goodman,2015-04-10 The West no longer regards communism in East Asia as a threat On the contrary

because the communist party states of East Asia appear to be undergoing a process of reform directed primarily at economic modernization it is now regarded as a potential market The West's attitude is reinforced by the recognition of East Asia's economic importance more generally a perception which in itself undoubtedly stimulated reform in the region's communist party states The causes extent and consequences of reform in the East Asian communist party states are the concerns of the contributions to this volume first published in 1988 It includes chapters on the reform process in China North Korea Vietnam and Mongolia as well as examinations of the roles played by both China and the Soviet Union in the Asia Pacific region They demonstrate that a belief in a simple single process of economic and political liberalization brought about by the drive for economic modernization the production imperative is a misleading argument Although the production imperative might act as a stimulus to reform it is neither a sufficient nor even a necessary condition In individual countries the communist party's search for legitimacy a change of leadership or the relationship with the USSR have equally been the spur to reform The drive for economic modernization may even be a consequence of the communist party's desire to reform rather than a cause The absence of a uniform pattern does not detract from the potential consequences of economic and political change These challenge socialist thinking on the nature of collective life ownership and rural society

The Capitalist Unconscious Hyun Ok Park, 2015-09-01 The unification of North and South Korea is widely considered an unresolved and volatile matter for the global order but this book argues capital has already unified Korea in a transnational form As Hyun Ok Park demonstrates rather than territorial integration and family union the capitalist unconscious drives the current unification imagining the capitalist integration of the Korean peninsula and the Korean diaspora as a new democratic moment Based on extensive archival and ethnographic research in South Korea and China The Capitalist Unconscious shows how the hegemonic democratic politics of the post Cold War era reparation peace and human rights have consigned the rights of migrant laborers protagonists of transnational Korea to identity politics constitutionalism and cosmopolitanism Park reveals the riveting capitalist logic of these politics which underpins legal and policy debates social activism and media spectacle While rethinking the historical trajectory of Cold War industrialism and its subsequent liberal path this book also probes memories of such key events as the North Korean and Chinese revolutions which are integral to migrants reckoning with capitalist allures and communal possibilities Casting capitalist democracy within an innovative framework of historical repetition Park elucidates the form and content of the capitalist unconscious at different historical moments and dissolves the modern opposition among socialism democracy and dictatorship The Capitalist Unconscious astutely explores the neoliberal present s past and introduces a compelling approach to the question of history and contemporaneity **Selected Works**

[of] Kim Il Sung Il-söng Kim, 1971 A Concise History of Modern Korea Michael J. Seth, 2024-03-12 Now in a fully revised and updated edition including new primary sources and illustrations this comprehensive and balanced history of modern Korea explores the social economic and political issues it has faced since being catapulted into the wider world at the end of the nineteenth century Placing this formerly insular society in a global context Michael J Seth describes how this ancient culturally and ethnically homogeneous society first fell victim to Japanese imperialist expansionism and then was arbitrarily divided in half after World War II Seth traces the postwar paths of the two Koreas with different political and social systems and different geopolitical orientations as they evolved into sharply contrasting societies South Korea after an unpromising start became one of the few postcolonial developing states to enter the ranks of the first world with a globally competitive economy a democratic political system and a cosmopolitan and dynamic culture By contrast North Korea became one of the world s most totalitarian and isolated societies a nuclear power with an impoverished and famine stricken population Considering the radically different and historically unprecedented trajectories of the two Koreas Seth assesses the insights they offer for understanding not only modern Korea but the broader perspective of world history All readers looking for a balanced knowledgeable history will be richly rewarded with this clear and concise book Revolution and Socialist Construction in Korea Sung Kim Il, 1971 *State Capitalism and Development in East Asia since 1945*, 2023-08-28 During the second half of the twentieth century the countries of East Asia saw one of the most remarkable transformations in human history from relatively poor societies to global powerhouses of accumulation proletarianisation and mega urbanisation This

volume features Marxist scholars from East Asia and Europe who are pioneering a new approach to this transformation using the theory of state capitalism. The essays analyse the histories of countries on either side of the Cold War divide within the broader framework of twentieth century global capitalist expansion while at the same time offering a sophisticated critique of Developmental State Theory. Contributors are Tobias ten Brink, Gareth Dale, Jeong Seongjin, Michael Haynes, Kim Ha young, Kim Yong uk, Lee Jeong goo and Owen Miller. Routledge Library Editions: Modern East and South East Asia Various Authors, 2022-07-30. This 7 volume set reissues a range of classic out of print texts that cover a host of issues that have contributed to the development of modern East and South East Asia. A transnational academic research venture, it interrogates mass dictatorship in a broad historical context, focusing on the emergence of modernity through interactions of center and periphery, empire and colony, and democracy and dictatorship on a global scale.

Kim Jong-il's Leadership of North Korea Jae-Cheon Lim, 2008-11-24. Kim Jong Il came to power after the death of his father Kim Il Sung in 1994. Contrary to expectations, he has succeeded in maintaining enough political stability to remain in power. Kim Jong Il's Leadership of North Korea is an examination of how political power has been developed, transmitted from father to son, and now operates in North Korea. Using a variety of original North Korean sources as well as South Korean materials, Jae Cheon Lim pieces together the ostensibly contradictory and inconsistent facts into a conceptual coherent framework. This book considers Kim and his leadership through an analytical framework composed of four main elements: i. Kim as a leader of a totalitarian society, ii. as a politician, iii. as a Korean, and iv. as an individual person. This illuminating account of what constitutes power and how it is used makes an important contribution to the understanding of an opaque and difficult regime. It will be of interest for upper level undergraduate, postgraduates, and academics interested in North Korean politics and also those in Political theory.

North Korea and the Geopolitics of Development Kevin Gray, Jong-Woon Lee, 2021-04-15. Kevin Gray and Jong Woon Lee focus on three geopolitical moments that have been crucial to the shaping of the North Korean system: colonialism, the Cold War, and the rise of China, to demonstrate how broader processes of geopolitical contestation have fundamentally shaped the emergence and subsequent development of the North Korean political economy. They argue that placing the nexus between geopolitics and development at the centre of the analysis helps explain the country's rapid catch up industrialisation, its subsequent secular decline followed by collapse in the 1990s, and why the reform process has been markedly more conservative compared to other state socialist societies. As such, they draw attention to the specificities of North Korea's experience of late development but also place it in a broader comparative context by understanding the country not solely through the analytical lens of state socialism but also as an instance of post colonial national development.
