N. Eisenstadt, 1973 **Comparative civilizations and multiple modernities : [a collection of essays]. 2(2003)** Shemu'el Noah Aizenshtadt, 2003 **Revolution and the Transformation of Societies** Shemu'el Noah Aizenshtadt, 1978

*Religion, Rebellion, Revolution* Bruce Lincoln, 1985-07-22 Papers from a symposium on Religion and revolution held at the University of Minnesota 6 8 Nov 1981 *Handbook of Revolutions in the 21st Century* Jack A. Goldstone, Leonid Grinin, Andrey Korotayev, 2022-05-19 The 21st century has witnessed a considerable and increasing number of political revolutions around the world This contradicts the popular belief of many experts in the 1970s that revolutions occurred mainly in monarchies and empires Instead the revolutions of this century have several new characteristics which call for a renewed analysis of the subject This handbook offers a comparative perspective on the new wave of revolutions of the last decade Presenting case studies on the color revolutions the Arab revolutions of 2010 2011 and the global wave of revolutions in 2013 2018 that spanned regions ranging from Africa to the Caucasus it offers a better understanding of the varied forms features and historical backgrounds of revolutions as well as their causes Accordingly it highlights recent revolutions in their historical and world systems contexts The handbook is divided into seven parts the first of which examines the history of views on revolution and important aspects of the theory of revolution The second part analyzes revolutions within long term historical trends and in their world system contexts In turn the third part explores specific major revolutionary waves in history The fourth part analyzes the first revolutionary wave of the 21st century 2000 2009 the so called color revolutions while the fifth discusses the second wave the Arab Spring 2010 2013 as an important turning point The sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the Arab Spring and some revolutionary events from the third wave that began in 2018 The seventh and final part offers forecasts on the future of revolutions Given its scope the book will appeal to scholars and students from various disciplines interested in historical trends sociopolitical change contentious politics social movements and revolutionary processes involving both nonviolent campaigns and political violence Once again this volume demonstrates the kind of open minded systematic analysis that the field of revolutionary studies requires Prof George Lawson Department of International Relations Australian National University Canberra *Retelling the Nicaraguan Revolution as a Dionysian Ritual* Martina Handler, 2010 Uncountable books have been written on the Nicaraguan revolution in 1979 due to the fascination connected with the idea of revolution in general and with its realization in Nicaragua in particular This book retells the story of the Nicaraguan revolution with the words of women aiming to show how a high level of transformative energy was accumulated in the Nicaraguan society over time based on a common utopian

vision of a better future for all The energetic upheaval can be analyzed as a Dionysian ritual However the book also follows up on the Apollonian aftermath of the revolution Martina Handler is a social scientist and a graduate of the Master Program in Peace Development Security and International Conflict Transformation in Innsbruck Austria *Radicals, Revolutionaries, and Society* R. G. Williams, 2025-04-17 This book is a study of radicals revolutionaries and society Specifically it tries to look at the historical social and political struggles of radicals in modern politics since the emergence of modern politics after the French Revolution of 1789 While the book is a political study the main focus is that of a socialist study as a Socialist argument for the vital political role of radicals and revolutionaries in creating modern society The main focus of the book is on how radicals and revolutionaries usually change modern society for the better through their struggle for democracy freedom and socialism Origins of Stalinism: From Leninist Revolution to Stalinist Society Pavel Campeanu, 2016-07-08 By adopting the ecological process as their major theme the contributors of this volume show how the process of human interaction with the natural environment unfolded in the past and offer perspective on the ecological crises in our world at the beginning of the 21st century *Proceedings of the American Society of International Law at the Meeting of Its Executive Council* American Society of International Law, 1917 **The History of the Fabian Society** Edward Reynolds Pease, 1926 *The Global Resistance Reader* Louise Amoore, 2005 The Global Resistance Reader provides the first comprehensive collection of work on the phenomenal rise of transnational social movements and resistance politics from the visible struggles against the financial economic and political authority of large international organizations such as the World Trade Organization World Bank and International Monetary Fund to the much less visible acts of resistance in everyday life The conceptual debates substantive themes and case studies have been selected to open up the idea of global resistance to interrogation and discussion by students and to provide a one stop orientation for researchers journalists policymakers and activists *Revolution and the Millennium* James F. Rinehart, 1997-10-30 An interdisciplinary cross cultural cross historical analysis of three 20th century non Western revolutionary societies China Mexico and Iran that were profoundly impinged upon by European and American imperialism The study explores the role of apocalyptic beliefs in radical movements bent on sociopolitical transformation It concludes that millennial expectations performed important and similar preparatory leadership and therapeutic functions in each case Millenarian movements are powerful and emotional social movements that expect an immediate collective total this worldly supernatural salvation and transformation of society They anticipate the complete destruction of the existing sociopolitical and economic order which they assert will be followed by a new and perfect society This study provides an interdisciplinary cross cultural cross historical analysis of three 20th century non Western revolutionary societies that were profoundly impinged upon by European and American imperialism It seeks to explore the functional role of millenarianism in these three revolutions In all three cases millenarianism prepared the way for revolutionary transformation It acted as a catalyst for action among that group of the most ardent revolutionists who were

willing to pay any price to achieve what they were convinced was the inevitable goal of a utopian society Millenarianism created the potential for charismatic leadership to emerge It functioned as a doctrinal platform that awaited the opportunity to elevate a prophetic revolutionary leader to take control Finally millenarianism performed a therapeutic identity and cathartic function by providing the doctrinal foundation and an effective organization for a social healing process to take place A challenge to conventional arguments on the origins and outcomes of revolutions this study will be of great interest to scholars and researchers in comparative politics sociology and religion **Writers, Writing, and Revolution** R. G.

Williams,2022-07-13 This book is a study of the role of writers in social revolutions It explores how writing and writers have shaped revolutions and how they continue to do so It also investigates the connection between writers and radicals outlining some of the historical political social and intellectual connections between writers and revolution Overall this is a book of political theory literary theory and political action it is a call for writers to work towards Socialism *Marx and We* Sun Zhengyu,2024-08-01 Marxist ideology is the only fully scientific ideology the only one able to guide mankind toward the settlement of fundamental social problems and to point out the royal road for the proletariat to take in its march toward socialism and communism Without Marxism modern people cannot establish true social ideals nor can they engage in the rational pursuit of values Without Marxism modern people cannot choose the correct path of development nor can they build up new forms of civilizations Without Marxism modern people would never base their commitments to schedule the consensus building effort and support the consensus building process on any irrefutably and sufficiently sound theoretical foundations *Society and History* G. L. Ulman,2011-06-01 No detailed description available for Society and History

**Society, Theory and the French Revolution** Brian Singer,1986-09-08 This is a very different book about the French Revolution of 1789 94 The concern is less with a change in society than a change in the relation that a society establishes with itself Here the focus is on society s presentation and representation considered not simply from the perspective of a few privileged intellectuals but as a social and historical process inseparable from the institution of society s political dimension Through a close reading of the revolutionary texts of the period the author is able to trace behind the surface of events and conflict themes of a more abstract fundamental character themes relative to the discovery of society the construction of the nation state and what for the revolutionaries was the scandal of their separation While retaining a fidelity to the eighteenth century this book opens up new theoretical perspectives that illuminate the character of both a certain revolutionary heritage and a more general political modernity [The Social Question and the Democratic Revolution](#) Douglas Moggach,Paul Leduc Browne,2000-10-18 The revolutionary movements of 1848 viewed the political cataclysm of continental Europe as an explosion of liberty a new age of freedom and equality This collection focuses on the relationship between democratic and socialist currents in 1848 seeking to reassess the relevance of these currents to the present era of global economic liberalism

**Revolutions in Modern German History** Andrew G. Bonnell,2025-05-29 Andrew G Bonnell s innovative survey

examines the history of revolution in modern Germany by focusing on key revolutionary developments in the German states. There is coverage of Germany and the French Revolution, the 1848 revolutions, the Industrial Revolution, the 1918/19 revolution, the Nazi revolution of 1933, the revolution from above in Eastern Germany 1945/49, and the revolution in East Germany in 1989/90. *Revolutions in Modern German History* sheds new light on the subject by stressing the continuity of conflicts between revolution and counter revolution in German history, thereby restoring a sense of the dramatic social conflicts that punctuated the history of the country. It also reveals the significance of wider European and transnational developments of revolutionary and counter revolutionary movements and events. Bonnell even reconstructs a sense of the participants' changing horizon of expectations during these events by looking in depth at the lives of men and women who lived and experienced these tumultuous times.
