This book examines the crisis of democracy that has arisen in Hungary since the election of the Fidesz government in 2010 After moving swiftly to transform the Hungarian constitution Fidesz created a new political system which has led its critics to argue that the era of democracy in Hungary is over US Senator John McCain has gone so far as to describe Hungary as an illiberal democracy on a path toward fascism The author argues that Fidesz has sought to challenge the capitalist and democratic transformation that shaped Hungary for 20 years after the fall of communism by increasing the power of the state over crucial aspects of the economy society and the political system In so doing Fidesz actions resemble those undertaken by many authoritarian states that have emerged since the end of the Second World War all aiming to build up a national capitalism and protect their economies whilst undertaking nation building To make sense of this the author draws upon two traditions of thought world systems analysis which situates Hungary in the context of its incorporation in the modern capitalist world system after the fall of communism and anarchist social thought which provides a unique way of seeing the actions of states and political elites In so doing the book argues that the events unfolding in Hungary cannot be explained on the basis of Hungarian exceptionalism but must be situated in the broader political and economic context that has shaped the development of Hungary since 1990 The form of capitalism introduced in Hungary and across the region of East and Central Europe has systematically undermined the strong state and social security that had existed under communism and when added to the failure of the left and liberals in the region it has paved the way for far right and neo fascist political movements to emerge claiming the mantle of defenders of society from the market This represents a fundamental threat to the enlightenment traditions that have shaped dominant modern political ideologies and raises profound problems for both the EU and NATO **Central and Eastern Europe, 1944-1993** Tibor Iván Berend, 1996 An ambitious comparative analysis of Eastern Bloc economies during a period of revolutionary change *Central Europe Since 1945* Paul G. Lewis, 2014-01-14 Central Europe here Poland the German Democratic Republic Czechoslovakia and Hungary is at the centre of international

attention since the Soviet collapse An understanding of its postwar history is critical to an appreciation of the challenges facing its present rulers This is an engrossing account of the installation development operation and eventual downfall of its very different communist regimes and the transition to the freedoms and uncertainties of the post Soviet world The book covers political economic social and cultural change emphasising the crucial relationships with the USSR throughout

*Britain's International Role, 1970-1991* Michael J Turner, 2010-10-06 How does one of the world's greatest powers preserve its status and influence when international conditions are unfavourable and its resources do not match its commitments This was Britain's burden in the 1970s and 1980s when the international order was transformed Much became unsettled and Britain had to adapt policy to suit new needs and opportunities Michael J Turner elucidates the efforts that were made to maximise Britain's role on those matters and in those parts of the world that were of special importance to British strategy prosperity and security He examines key decisions and their consequences and places British policy making in an international context suggesting that British leaders were more successful in preserving power and prestige on the world stage than has sometimes been appreciated
