Enlightenment Daniel Gordon, 2014-01-14 Why is postmodernist discourse so biased against the Enlightenment Indeed postmodern theory challenges the validity of the rational basis of modern historical scholarship and the Enlightenment itself Rather than avoiding this conflict the contributors to this vibrant collection return to the philosophical roots of the Enlightenment and do not hesitate to look at them through a postmodernist lens engaging issues like anti-Semitism Utopianism colonial legal codes and ideas of authorship Dismissing the notion that the two camps are ideologically opposed and thus incompatible these essays demonstrate an exciting new scholarship that confidently mixes the empiricism of Enlightenment thought with a strong postmodernist skepticism painting a subtler and richer historical canvas Who Owns This Sentence? celebrate its demise and the creation of a democratic digital future or mourn an irreplaceable loss The digital age is revolutionizing the information landscape Already more books have been scanned and digitized than were housed in the great library in Alexandria making available millions of texts for a curious reader at the click of a button and electronic book sales are growing exponentially Will this revolution in the delivery of information and entertainment make for more transparent and far reaching dissemination or create a monopolistic stranglehold In *The Case for Books* Robert Darnton an intellectual pioneer in the field of the history of the book and director of Harvard University's Library offers an in depth examination of the book from its earliest beginnings to its shifting role today in popular culture commerce and the academy As an author editorial advisor and publishing entrepreneur Darnton is a unique authority on the life and role of the book in society This book is a wise work of scholarship one that requires readers to carefully consider how the digital revolution will broadly affect the marketplace of ideas

***The Making of the Dentiste, c. 1650-1760*** Roger King, 2017-07-05

The early decades of the eighteenth century saw the appearance of a completely new type of surgical practitioner in France: the *dentiste*. The use of this title was of the utmost significance, indicating not just the making of a new practitioner but of an entirely new practice. The *dentiste* was quite literally making a name for himself. Appearing on the back of dramatic changes within surgery in general, the practice of the *dentiste*, although it focused only on the teeth, was nevertheless extensive. In addition to extractions, there was also a wide-ranging field of operations on offer, the performance of which had only been hinted at by the surgeon of the seventeenth century. This new sphere of practice represented a radical departure from what had gone before, and as this book reveals, it was all built solidly on sound surgical foundations, with the *dentiste* occupying a respected position within society in general and the medical world in particular. This book places the making of the *dentiste* within social, political, and technical contexts, and in so doing re-contextualises the purely progressive stories told in conventional histories of dentistry. In doing so, it brings surgery back to its central role in this story and reveals for the first time the origins of the *dentiste* in the French surgical profession.

***Censorship in Colonial Indonesia, 1901-1942*** Nobuto Yamamoto, 2019-09-16

In *Censorship in Colonial Indonesia, 1901-1942*, Nobuto Yamamoto examines the institutionalization of censorship and its symbiosis with print culture in the Netherlands Indies. Born from the liberal desire to promote the well-being of the colonial population, censorship was not practiced exclusively in repressive ways but manifested in constructive policies and stimuli, among which was the cultivation of the native press under state patronage. Censorship in the Indies oscillated between liberal impulse and the intrinsic insecurity of a colonial state in the era of nationalism and democratic governance. It proved unpredictable in terms of outcomes, at times being co-opted by resourceful activists and journalists and susceptible to international politics as it transformed during the Sino-Japanese war of the 1930s.

***Celebrating the Nation*** Tony Bennett, 2020-08-29

*Celebrating the Nation* offers the first major critical retrospective on Australia's Bicentenary. The editors have collected a series of essays focusing on the different ways in which 1988 was celebrated. From the soccer Gold Cup to literary commissions, from Expo 88 to the Travelling Exhibition and the Stockman's Hall of Fame, it examines the cultural and ideological frameworks which shaped the discourses and rhetoric of those celebrations. The contributors also put the Australian Bicentenary of 1988 in historical and international perspective, comparing the celebrations of 1988 with earlier Australian anniversary celebrations and with recent national celebrations in France, Canada, and the United States. Drawing on the findings of a major research project organised by the Institute for Cultural Policy Studies at Griffith University, *Celebrating the Nation* provides a provocative and insightful analysis of the cultural and political processes through which modern nations organise and

symbolise their histories and identities      **The Media Environment of Political Thought** Asaf Y. Shamir, 2017-10-11 The Media Environment of Political Thought offers a novel way of looking at the tradition of political thought by reconstructing the historical media landscapes in which great political texts of the past were produced. It brings to light the little charted media environments in which two political innovators, Jean Jacques Rousseau and Karl Marx, operated and analyzes both how writing systems shaped their intellectual growth and how they used those systems to communicate their pioneering ideas. The historical analysis is followed by a critical reflection on the future of political thought in the age of computer-mediated communication. Together, the three studies presented in the book conjure up a view of the tradition of political thought as a highly regulated stream of information shaped by historical writing systems.
