Long Range Farm Program United States. Congress. House. Committee on Agriculture,1953 **Long Range Shipping Bill** United States. Congress. House. Merchant Marine and Fisheries,1952 **Range Wars** Ryan H. Edgington,2014-07-01 Established in south central New Mexico at the end of World War II White Sands Missile Range is the largest overland military reserve in the western hemisphere It was the site of the first nuclear explosion the birthplace of the American space program and the primary site for testing U S missile capabilities In this environmental history of White Sands Missile Range Ryan H Edgington traces the uneasy relationships between the military the federal government local ranchers environmentalists state game and fish personnel biologists and ecologists state and federal political figures hunters and tourists after World War II as they all struggled to define and productively use the militarized western landscape Environmentalists ranchers tourists and other groups joined together to transform the meaning and uses of this region challenging the authority of the national security state to dictate the environmental and cultural value of a rural American landscape As a result White Sands became a locus of competing geographies informed not only by the far reaching intellectual economic and environmental changes wrought by the cold war but also by regional history culture and traditions

Vietnam United States. Congress. Senate. Committee on the Judiciary. Subcommittee to Investigate Problems Connected with Refugees and Escapees,1972 **Space Warfare** Nordin Yusof,1999 *Joint Force Quarterly* ,1997 Joint Force Quarterly is published for the Chairman Joint Chiefs of Staff by the Institute for National Strategic Studies National Defense University to promote understanding of the integrated employment of land sea air space and special operations forces The journal focuses on joint doctrine coalition warfare contingency planning combat operations conducted by the unified commands and joint force development *De Gruyter Handbook of Drone Warfare* James Patton Rogers,2024-09-02 In 2010 60 states had a military drone program Today at least 113 countries and 65 non state actors now have access to weaponized drone technologies Alongside this established drone powers the U S China Turkey and Iran have expanded their own use of military drones increasing the sale and deployment of drones around the world In the *De Gruyter Handbook of Drone Warfare* drone expert policy adviser and historian Dr James Patton Rogers brings together 37 of the world s leading voices on the growing issues of commercial and military drone technologies From the origins of military drones in the early 1900s and the resurgence of drone use during the War on Terror through to the global proliferation of drones across Europe Africa and the Middle East this handbook explores the moral ethical technological legal military geopolitical social and strategic issues at the heart of drone warfare The first handbook of its kind the volume also addresses Russia s offensive war against Ukraine the rise of Iranian and Houthi drones and provides a focused analysis of the future of drone warfare and the opportunities and perils of AI autonomy and swarming technologies in the coming Third Drone Age **The Scourge of War** Paul Diehl,2010-03-25 J David Singer s legendary Correlates of War project represented the first comprehensive effort by political

scientists to gather and analyze empirical data about the causes of war In doing so Singer and his colleagues transformed the face of twentieth century political science Their work provoked some of the most important debates in modern international relations about the rules governing territory international intervention and the so called democratic peace Editor Paul F Diehl has now convened some of the world s foremost international conflict analysis specialists to reassess COW s contribution to our understanding of global conflict Each chapter takes one of COW s pathbreaking ideas and reevaluates it in light of subsequent world events and developments in the field The result is a critical retrospective that will reintroduce Singer s important and still provocative findings to a new generation of students and specialists Paul F Diehl is Professor of Political Science and University Distinguished Scholar at the University of Illinois Urbana Champaign [Air power and warfare the proceedings of the 8th Military History Symposium United States Air Force Academy 18-20 October 1978](#) ,

Special Operations in World War II Andrew L. Hargreaves, 2013-10-28 British and American commanders first used modern special forces in support of conventional military operations during World War II Since then although special ops have featured prominently in popular culture and media coverage of wars the academic study of irregular warfare has remained as elusive as the practitioners of special operations themselves This book is the first comprehensive study of the development application and value of Anglo American commando and special forces units during the Second World War Special forces are intensively trained specially selected military units performing unconventional and often high risk missions In this book Andrew L Hargreaves not only describes tactics and operations but also outlines the distinctions between commandos and special forces traces their evolution during the war explains how the Anglo American alliance functioned in the creation and use of these units looks at their command and control arrangements evaluates their impact and assesses their cost effectiveness The first real impetus for the creation of British specialist formations came in the desperate summer of 1940 when having been pushed out of Europe following defeat in France and the Low Countries Britain began to turn to irregular forces in an effort to wrest back the strategic initiative from the enemy The development of special forces by the United States was also a direct consequence of defeat After Pearl Harbor Hargreaves shows the Americans found themselves in much the same position as Britain had been in 1940 shocked outnumbered and conventionally defeated they were unable to come to grips with the enemy on a large scale By the end of the war a variety of these units had overcome a multitude of evolutionary hurdles and made valuable contributions to practically every theater of operation In describing how Britain and the United States worked independently and cooperatively to invent and put into practice a fundamentally new way of waging war this book demonstrates the two nations flexibility adaptability and ability to innovate during World War II

Nature at War Thomas Robertson, Richard P. Tucker, Nicholas B. Breyfogle, Peter Mansoor, 2020-04-02 World War II was the largest and most destructive conflict in human history It was an existential struggle that pitted irreconcilable political systems and ideologies against one another across the globe in a decade of violence unlike any other There is little doubt

today that the United States had to engage in the fighting especially after the Japanese attack on Pearl Harbor on December 7 1941 The conflict was in the words of historians Allan Millett and Williamson Murray a war to be won As the world's largest industrial power the United States put forth a supreme effort to produce the weapons munitions and military formations essential to achieving victory When the war finally ended the finale signaled by atomic mushroom clouds over Hiroshima and Nagasaki upwards of 60 million people had perished in the inferno Of course the human toll represented only part of the devastation global environments also suffered greatly The growth and devastation of the Second World War significantly changed American landscapes as well The war created or significantly expanded a number of industries put land to new uses spurred urbanization and left a legacy of pollution that would in time create a new term Superfund site **Air Corps News Letter**, 1967 **Strategic Planning for Coalition Warfare: 1943-1944** Maurice Matloff, Edwin Marion Snell, 1953

Harper's Pictorial Library of the World War Albert Bushnell Hart, 1920 Disruptive Technology and the Law of Naval Warfare James Kraska, Raul A. Pedrozo, 2022 Introduction Merchant ships Unmanned maritime systems Lethal autonomous weapons Submarine warfare Seabed warfare Missile warfare and nuclear weapons Naval operations in outer space *Victory at Sea* Paul M. Kennedy, 2022-01-01 A sweeping lavishly illustrated one volume history of the rise of American naval power during World War II When he is at his best as he often is in these pages Kennedy can be dazzling Ian W Toll New York Times The book makes for enjoyable reading owing to the author's easygoing style Kennedy is an academic who does not write like one he writes a story not a treatise Robert D Kaplan Washington Post Engrossing Brendan Simms Wall Street Journal In this engaging narrative brought to life by marine artist Ian Marshall's beautiful full color paintings historian Paul Kennedy grapples with the rise and fall of the Great Powers during World War II Tracking the movements of the six major navies of the Second World War the allied navies of Britain France and the United States and the Axis navies of Germany Italy and Japan Kennedy tells a story of naval battles maritime campaigns convoys amphibious landings and strikes from the sea From the elimination of the Italian German and Japanese fleets and almost all of the French fleet to the end of the era of the big gunned surface vessel the advent of the atomic bomb and the rise of an American economic and military power larger than anything the world had ever seen Kennedy shows how the strategic landscape for naval affairs was completely altered between 1936 and 1946 **Eisenhower's Nuclear Calculus in Europe** Gates Brown, 2018-11-30 Through a reliance on nuclear weapons President Eisenhower hoped to provide a defense strategy that would allow the U S to maintain its security requirements without creating an economic burden This defense strategy known as the New Look benefited the U S Air Force with its focus on strategic nuclear weapons The U S also required European missile bases to deploy their intermediate range ballistic missiles while efforts continued to develop U S based intercontinental ballistic missiles Deploying such missiles to Europe required balancing regional European concerns with U S domestic security priorities In the wake of the Soviet Sputnik launch in 1957 the U S began to fear Soviet missile capabilities Using European

missile bases would mitigate this domestic security issue but convincing NATO allies to base the missiles in their countries raised issues of sovereignty and weapons control and ran the risk of creating divisions in the NATO alliance *The Irish and British Wars, 1637-1654* James Scott Wheeler,2003-10-03 With numerous maps and illustrations James Scott Wheeler connects the strategic and tactical levels of war with political actions and reactions and discusses how Britain and Ireland became battlegrounds in the war of three kingdoms The various stages of this period of turmoil are clearly demonstrated right through to the execution of Charles I the conquest of Catholic Ireland and the eventual death of the English Republic and provide students of history with an excellent addition to their studies *Air University Review* ,1973 **Strategic Planning for Coalition Warfare, 1941-1944** Maurice Matloff,Edwin Marion Snell,1959
