Transatlantic Politics and the Transformation of the International Monetary System Michelle Frasher, 2013-09-05 With original archival documents and interviews from the US and Europe Michelle Frasher brings the reader into the negotiating room with American German and French officials as they confronted the collapse of the Bretton Woods monetary system and made decisions that affected the course of European integration and the contemporary neoliberal order She identifies crisis as the catalyst for change in international monetary policies but argues that the causes

of crisis originated from a multitude of factors such as market speculation American hegemony institutional flaws and ideational conflicts among the leaders themselves Far from a planned and consensual process this book shows that the transformation to neoliberalism was riddled with discord and fret with trial and error She argues that the resulting currency regime allowed governments to entrench themselves in national interests and facilitated the marketization of the state where states have become both clients and participants in the financialized global economy to the detriment of international stability Frasher s is the first work to connect the 1960s and 1970s to the difficulties of inter state and inter market cooperation that have plagued the system in the last decades and it puts the 2008 debacle into historical perspective

Presenting a sweeping analysis of the legal foundations institutions and substantive legal issues in EU monetary integration The EU Law of Economic and Monetary Union serves as an authoritative reference on the legal framework of European economic and monetary union The book opens by setting out the broader contexts for the European project historical economic political and regarding the international framework It goes on to examine the constitutional architecture of EMU the main institutions and their legal powers the core legal provisions of monetary and economic union and the relationship of EMU with EU financial market and banking regulation The concluding section analyses the current EMU crisis and the main avenues of future reform Europe United Sebastian Rosato, 2010-12-16 The construction of the European Community EC has widely been understood as the product of either economic self interest or dissatisfaction with the nation state system In Europe United Sebastian Rosato challenges these conventional explanations arguing that the Community came into being because of balance of power concerns France and the Federal Republic of Germany the two key protagonists in the story established the EC at the height of the cold war as a means to balance against the Soviet Union and one another More generally Rosato argues that international institutions whether military or economic largely reflect the balance of power In his view states establish institutions in order to maintain or increase their share of world power and the shape of those institutions reflects the wishes of their most powerful members Rosato applies this balance of power theory of cooperation to several other cooperative ventures since 1789 including various alliances and trade pacts the unifications of Italy and Germany and the founding of the United States Rosato concludes by arguing that the demise of the Soviet Union has deprived the EC of its fundamental purpose As a result further moves toward political and military integration are improbable and the economic community is likely to unravel to the point where it becomes a shadow of its former self
