Looking At Criminal Law:

The Criminal Law's Person Claes Lernestedt, Matt Matravers, 2022-02-10 The state's use of the threat and imposition of punishments to regulate conduct is thought or at least said by many to be legitimised by the idea that the criminal law's burdens only fall on those who are blameworthy for their conduct. However, the formal concept of blameworthiness needs to be made substantive. This puts various ideas regarding the criminal law's person at the heart of debates about blame, guilt, and responsibility. How is the criminal law's person constructed by whom and with what disciplinary norms? How is it threatened by new knowledge and how do those threats play out amongst the various stakeholders who claim the criminal law's person as theirs? To address these and cognate questions, this volume brings together an international group of academics to engage with the criminal law's person from a range of disciplinary perspectives. *The Oxford Handbook of Criminal Law* Markus Dirk Dubber, Tatjana Hörnle, 2014 Providing scholars with a comprehensive international resource, a common point of entry into cutting edge contemporary research, and a snapshot of the state and scope of the field, *The Oxford Handbook of Criminal Law* takes a broad approach to its subject matter, disciplinarily, geographically, and systematically.

The Boundaries of the Criminal Law R. A. Duff, Lindsay Farmer, S. E. Marshall, Massimo Renzo, Victor Tadros, 2010-11-11 Criminalization is a new series arising from an interdisciplinary investigation into criminalization, focussing on the principles and goals that should guide decisions about what kinds of conduct are to be criminalized and the forms that criminalization should take. Developing a normative theory of criminalization, the six volumes will tackle the key questions at the heart of the issue. By reference to what principles and goals should legislations decide what to criminalize, how should criminal wrongs be classified and differentiated, and how should law enforcement officials apply the law's specification of offences. *Boundaries of the Criminal Law* is the first book in this series, examining the scope and boundaries of the criminal law. Investigations into the scope of the criminal law have often focused on the harm principle, the principle that conduct can be justifiably criminalized only if it is harmful, or other master principles that might determine the proper scope of the criminal law. This collection of original essays by some of the leading scholars in criminal law and philosophy from the UK and the US makes significant advances in the development of a broader range of ideas that might inform criminalization decisions. A range of issues are discussed, including the significance for criminalization of ideas of moral wrongdoing and of using a person as a means, the distinction between criminal law and other forms of legal regulation, the role of new technology in our understanding of the evolving scope of the criminal law, and the role of criminal justice officials in decision making about criminalization. The authors draw on legal and philosophical sources but also on history, sociology, and social psychology in their investigations for a truly interdisciplinary approach. This is a groundbreaking set of essays which will help to reorient legal and philosophical discussion about the proper scope of the criminal law. **Making the Modern Criminal Law** Lindsay Farmer, 2016-01-21 The Criminalization series arose from an interdisciplinary investigation into criminalization.

focussing on the principles that might guide decisions about what kinds of conduct should be criminalized and the forms that criminalization should take Developing a normative theory of criminalization the series tackles the key questions at the heart of the issue what principles and goals should guide legislators in deciding what to criminalize How should criminal wrongs be classified and differentiated How should law enforcement officials apply the law s specifications of offences This the fifth book in the series offers a historical and conceptual account of the development of the modern criminal law in England and as it has spread to common law jurisdictions around the world The book offers a historical perspective on the development of theories of criminalization It shows how the emergence of theories of criminalization is inextricably linked to modern understandings of the criminal law as a conceptually distinct body of rules and how this in turn has been shaped by the changing functions of criminal law as an instrument of government in the modern state The book is structured in two main parts The first traces the development of the modern law as a distinct and conceptually distinct body of rules looking in particular at ideas of jurisdiction codification and responsibility The second part then engages in detailed analysis of specific areas of criminal law focusing on patterns of criminalization in relation to property the person and sexual conduct
