A Research Agenda for Urban Tourism van der Borg, Jan, 2022-01-14. This timely Research Agenda explores and proposes critical lines of research to support understanding of the conditions under which urban tourism contributes to the development of urban systems and what can be done to create and conserve these conditions. Chapters highlight conceptual discussions, concrete case studies and policy reviews to address the issues surrounding the economic, environmental and social impacts of tourism on cities. Urban Tourism in the Developing World Gustav Visser, 2017-07-28. Over the past decade, the field of urban tourism has consolidated with the appearance of several books that concentrate upon the Western European and North American experience. Recently, the scope and range of urban research has widened considerably, including the welcome appearance of studies that examine the tourism phenomenon in cities outside the Euro-American heartland. Despite this growing international body of debate and scholarship on tourism and cities, particularly in the developed North, literature that relates to the developing world as a whole and to Africa in particular remains sparse. The task of *Urban Tourism in the Developing World: The South African Experience* is to augment the current international scholarship concerning urban tourism in the developing world. More especially, the contributors draw attention to a range of case studies from South Africa that provide some starting points to address the uneven scholarly coverage of urban tourism in the African context. The research material presented here seeks to contribute toward raising the South African and indeed the African profile within growing international scholarship concerning issues of

urban tourism and development This collection aims to expand an emerging South African and African tourism research voice concerning the tourism and development nexus as well as to stem critiques that this body of research appears to have developed in a theoretical vacuum divorced from broader international tourism research discourses This collection of essays not only further develops an independent South African tourism perspective but also presents research that is closely tied to international urban tourism research debates In addition this analysis of urban tourism in the South African context enriches the rather Western oriented theories of urban tourism discourse through its emphasis on how urban tourism is evolving in urban Africa

Understanding Urban Tourism Martin Selby, 2003-12-18 Despite the formidable growth of urban tourism there has been little of the critical engagement that one would expect from the social sciences the rich potential of contemporary social science for urban tourism has yet to be realized Martin Selby's textbook makes available to practitioners and students seeking to understand the phenomenon of tourism in towns and cities the methods and concepts that are currently enhancing and transforming our understanding of society in other areas of the social sciences With an emphasis on image culture and experience the author draws upon the cultural turn to explain the human aspects of the urban tourism phenomenon The discussions emphasize the significance of urban tourism within debates upon the contemporary city postmodernity and the pursuit of social science Clearly written with case studies and further reading this book should be welcomed by students and lecturers in geography tourism planning and sociology
