Germany and Russia perpetrators of historical crimes today cast themselves as victims by pointing to national suffering In this theoretically sophisticated and empirically rich book Jie Hyun Lim offers a new way to understand nationalism and its political instrumentalization of suffering developing the concept of victimhood nationalism and exploring it in a range of global settings He examines relations among Poland Germany Israel Korea and Japan focusing on how memories of colonialism the Holocaust and Stalinist terror have converged and intertwined in transnational spaces With an emphasis on memory formation Lim scrutinizes how perpetrators in Germany and Japan transformed themselves into victims as well as how nationalists in Poland Korea and Israel portray themselves as hereditary victims in order to rebut external criticism He considers the construction of nations as victims and perpetrators tracing the interaction of history and memory Ultimately the book contends challenging victimhood nationalism is necessary to overcome the endless competition over national suffering and instead promote reconciliation mutual understanding and transnational solidarity **American**

International law is no longer a sufficient rubric to describe the complexities of law in an era of globalization Accordingly this collection situates cross border norm development at the intersection of interdisciplinary scholarship on comparative law conflict of laws civil procedure cyberlaw legal pluralism and the cultural analysis of law as well as traditional international law It provides a broad range of seminal articles on transnational law making governmental and non governmental networks

judicial influence and cooperation across borders the dialectical relationships among national international and non state legal norms and the possibilities of bottom up and plural law making processes The introduction situates these articles within the framework of law and globalization and suggests four important ways in which such a framework enlarges the traditional focus of international law This book therefore provides a crucial reference for scholars and practitioners seeking to understand the varied processes of norm development in the emerging global legal order **Vietnam** John Prados,2009 The first major synthesis of the war since 2001 drawing upon a host of newly declassified documents presidential tapes and overlooked foreign sources to give the most comprehensive look to date of the war that still haunts America **A Violent Peace** Christine Hong,2020-08-11 A Violent Peace offers a radical account of the United States transformation into a total war state As the Cold War turned hot in the Pacific antifascist critique disclosed a continuity between U S police actions in Asia and a rising police state at home Writers including James Baldwin Ralph Ellison and W E B Du Bois discerned in domestic strategies to quell racial protests the same counterintelligence logic structuring America s devastating wars in Asia Examining U S militarism s centrality to the Cold War cultural imagination Christine Hong assembles a transpacific archive placing war writings visual renderings of the American concentration camp Japanese accounts of the atomic bombing of Hiroshima black radical human rights petitions Korean War era G I photographs Filipino novels on guerrilla resistance and Marshallese critiques of U S human radiation experiments alongside government documents By making visible the way the U S war machine waged informal wars abroad and at home this archive reveals how the so called Pax Americana laid the grounds for solidarity imagining collective futures beyond the stranglehold of U S militarism
