Neurology is one of the most fascinating areas of medical science and general biology but it has traditionally been limited to some dedicated aspects only. However, modern neuroscience has embarked on exciting and diverse frontiers related to the causes, diagnosis, and treatment of neurological disease, and nowadays, neurology has become multidisciplinary. There are many books available that deal with only one key concept of neurology, but a book with a multidisciplinary approach is lacking so far. This book emphasizes all the conventional and applied divisions associated with neurology in reference to medical physiology and general biology and covers all aspects to integrate the topics of inter-related approaches. It provides complete information on each aspect of neurodegenerative disorders and brain injury, including autonomic nervous system, neuro-oncology, cerebellar ataxias, spinal cord disorders, neuro-ophthalmic disorders, and neuro-otological disorders such as dizziness, vertigo, imbalance, and hearing impairments in a concise and informative way. It highlights the challenges related to neurological disorders along with their ongoing molecular mechanisms and treatments. The book provides simple and reader-friendly representations and artwork that will help in understanding the concepts. **Multiple**

of Phytochemicals in Neurological Disorders Tahira Farooqui, Akhlaq A. Farooqui, 2017-01-03. Phytochemicals are naturally occurring bioactive compounds found in edible fruits, plants, vegetables, and herbs. Unlike vitamins and minerals, phytochemicals are not needed for the maintenance of cell viability but they play a vital role in protecting neural cells from inflammation and oxidative stress associated with normal aging and acute and chronic age-related brain diseases. Neuroprotective Effects of Phytochemicals in Neurological Disorders explores the advances in our understanding of the potential neuroprotective benefits that these naturally occurring chemicals contain. Neuroprotective Effects of Phytochemicals in Neurological Disorders explores the role that a number of plant-based chemical compounds play in a wide variety of neurological disorders. Chapters explore the impact of phytochemicals on neurotraumatic disorders such as stroke and spinal cord injury alongside neurodegenerative diseases such as Alzheimer's and Parkinson's Disease, as well as neuropsychiatric disorders such as depression and schizophrenia. The chapters and sections of this book provide the reader with a big picture view of this field of research. Neuroprotective Effects of Phytochemicals in Neurological Disorders aims to present readers with a comprehensive and cutting-edge look at the effects of phytochemicals on the brain and neurological disorders in a manner useful to researchers, neuroscientists, clinical nutritionists, and physicians. **Brain connectivity in**
