## **Pathways To Social Class A Qualitative Approach To Social Mobility:**

Pathways to Social Class Daniel Bertaux, Paul Richard Thompson, 2006-01-01 Calling for a broader new approach to social mobility research *Pathways to Social Class A Qualitative Approach to Social Mobility* moves beyond pure statistics to use qualitative techniques such as life stories and family case studies to examine more closely the dynamics of mobility and address more fundamental sociological questions Up to now the extensive sociological literature on mobility has been based around the survey method As a result we have access to abundant statistical data but there is little information available to explain how and why people follow particular life paths To overcome these limitations Bertaux and Thompson have developed an alternative complementary approach using life stories case histories of whole families over several generations or case studies of local communities Employing the case study approach does not prevent the identification of structural trends on the contrary it allows us to analyze those collective processes through their local effects restoring the links with classics of sociological thought Bertaux and Thompson tackle such problems as What exactly is transmitted between generations is it wealth or land occupational models or skills social networks or values and orientations What kinds of assets can immigrants draw on How can a social elite survive the upheaval of a popular revolution What is the impact of marriage on the mobility of men and women How far can belonging to one locality rather than another or choosing a particular house shape mobility paths and aspirations Do dreams of mobility matter This volume promises to inspire other sociologists towards the richly revealing and highly significant findings that a broader based approach to social mobility will enable Daniel Bertaux is the director of research at the Centre d'étude des Mouvements Sociaux of the CNRS and EHESS in Paris His many publications on social mobility and on life stories include *Destins Personnels et Structure de Classe* and *Biography and Society* Paul Thompson is a research professor in sociology at the University of Essex His books include *The Edwardians The Voice of the Past I Don't Feel Old* and *The Myths We Live By* His is co editor with Bertaux of *Between Generations Family Models Myths and Memories*

building social and symbolic capital or reshaping gender relations all elements contributing to the process of economic and social mobility Much of the existing literature examining the links between migration and education focuses either on the investment of migrant remittances in the education of their children back home or on brain drain that refers to the migration of skilled workers from the developing to the developed world Most of these discussions are firmly rooted in materialist arguments and while undeniably important tend to underplay the social processes through which migration and education interact to shape people's lives identities and status in society Along with economic security people also aspire to social mobility and status enhancement The ideas presented in this book take a more varied and nuanced view of the relationship between education and migration This book was originally published as a special issue of *Compare: A Journal of Comparative and International Education*

matter what does belonging look like in the twenty first century The book critically explores the concept of belonging and how it can respond to contemporary problems in not only the traditional domains of citizenship and migration but also in detention practices queer and feminist politics Australian literature and fashion technology housing and rituals Drawing on examples from Australia Europe the United Kingdom and the United States each topic is examined as a different kind of problem for the future as a toil an intensity or a promise Ultimately the collection argues that creating new ways to belong in contemporary times means reimagining the traditional terms on which belonging can happen as well as the social itself Read on their own each chapter presents a compelling case study and develops a set of critical tools for encountering the empirical epistemological and ontological challenges we face today Read together they present a diverse imagination that is capable of answering the question of belonging in to and with the future Social Beings Future Belongings shows how belonging is not a static and universal state but a contingent emergent and ongoing future oriented set of practices Balancing empirical and theoretical work this book will appeal to researchers students and practitioners alike
