working with children and adolescents **Handbook of Hope** C. Richard Snyder, 2000-06-07 Hope has previously been a construct more of interest to philosophy and religion than in psychology. New research has shown, however, that hope is closely related to optimism, feelings of control, and motivation toward achieving one's goals. The Handbook of Hope presents a comprehensive overview of the psychological inquiry into hope, including its measurement, its development in children, how its loss is associated with specific clinical disorders, and therapeutic approaches that can help instill hope in those who have lost theirs. A final section discusses hope in occupational applications, how the use of hope can make one a better coach, teacher, or parent. Defines hope as a construct and describes development of hope through the lifespan. Provides multiple instruments for measuring hope. Guides professionals in how to assess hope levels, discusses the importance of hope to relationships, achieving goals, and success at work.

Promoting Resilience in Child Welfare Robert John Flynn, Peter M. Dudding, James G. Barber, 2006 Since the beginnings of its development in Britain in 1987, the Looking After Children (LAC) initiative has had a profound influence in Canada as well as in Australia and across Europe in sharpening the developmental focus and improving the quality of services for children and adolescents who, because of abuse, neglect, extreme poverty, or other circumstances, live in out-of-home care. Promoting Resilience in Child Welfare presents reviews of research, new empirical findings, and useful practice and policy suggestions derived from the perspectives of LAC and resilience theory by an array of international voices. Practitioners, out-of-home care providers, youths in care, in-service trainers, students, researchers, and many others will find much in this book that speaks to more effective ways of improving the lives of young people being looked after in out-of-home care.

Midwest *Hope in Counselling and Psychotherapy* Denis O'Hara, 2013-06-04 This book represents a major contribution to the literature of several professions. Presenting an account both rich and broad, the author provides a summary and overview of hope from philosophical, nursing, psychotherapeutic, and research perspectives. Ian Townsend, Associate Lecturer in Counselling, Blackburn College. Engendering hope is at the heart of counselling and psychotherapy, but until now little attempt has been made to actually explain how and why it may be fostered. Understanding the central role of hope in healing and personal growth is an essential element of counsellor training and practice. It forms the basis of the therapeutic relationship and is integral to the very aims and motivation of counselling. Keeping theory firmly grounded in real-life practice, this book explores the nature of hope and how it is conceptualised from different theoretical perspectives. The common psychotherapeutic practices which engender hope and how they translate into effective practice. The role of the counsellor in the process. How to manage expectations and work effectively with clients suffering with severe and enduring psychological challenges. Hope measures and how to be a research-informed practitioner. Packed full of case examples, practical exercise, and points for reflection, this book is essential reading for any training or practising healthcare professional looking to understand the role of hope in the process of change.
