Character Education Charles E. Germane, Edith Gayton Germane, 1929 Character Education Wouter Sanderse, 2012 Many teachers want to contribute to children's moral development but this desire has not always resulted in a profound grasp of what moral education really means why it would be desirable and how it can best be achieved This book confronts these questions by examining what Aristotelian virtue ethics can illuminate about moral education At the same time it evaluates whether Aristotelian theory can still be useful for contemporary educational practice The argument culminates in a morally justified and psychologically realistic account of how virtue can best be taught in schools The approach called character education sees moral education not as enforcing rules or transferring values in separate subjects Instead it encourages teachers to be a morally exemplary teacher which is revealed through all kinds of small decisions and emotional reactions This philosophical essay takes a constructive but critical stance towards empirical research about the effectiveness of teaching methods and the realism of character traits

Handbook of Moral and Character Education Larry Nucci, Tobias Krettenauer, 2014-04-24 There is widespread agreement that schools should contribute to the moral development and character formation of their students In fact 80% of US states currently have mandates regarding character education However the pervasiveness of the support for moral and character education masks a high degree of controversy surrounding its meaning and methods The purpose of this handbook is to supplant the prevalent ideological rhetoric of the field with a comprehensive research oriented volume that both describes the extensive changes that have occurred over the last fifteen years and points forward to the future Now in its second edition this book includes the latest applications of developmental and cognitive psychology to moral and character education from preschool to college settings and much more

marginal discourse emphasizing attention to the whole environment in which character is developed and enacted and in which reflection on morality rather than didactic instruction in morality is the primary instructional approach By focusing on these two distinct regions and their conceptions of character the authors situate the character education movement at the turn of the twenty first century in the context of historical notions about the nature of character and regional conceptions regarding the nature of societal organization This enlightening volume is relevant to scholars practitioners policymakers and students across the field of education particularly those involved in character education moral development discourse analysis history and cultural foundations of education and related fields and to the wider public interested in character education
