**Oxford Handbook of Palliative Care** Max Watson, Caroline Lucas, Andrew Hoy, Jo Wells, 2009-03-26 Revised throughout with an additional emphasis on nursing care this handbook is a concise and authoritative guide to modern palliative care An ideal resource for the busy professional management of patients with end of life care needs

**Empathy-Based Ethics** David Ian Jeffrey, 2021-01-05 This book explores a new way of applying clinical ethics Empathy based ethics is based on the patient doctor relationship and seeks to encourage a more humane form of medical practice The author argues that the current emphasis on the biomedical model of medicine and a detached concern form of professionalism have damaged the patient doctor relationship He investigates examples of the dehumanization of patients and demonstrates a contrasting view of humane care The book presents empathy as a relational construct it provides an in depth analysis of the process of empathizing It discusses an empathy based ethics approach underpinned by clinical examples of the practical application of this new approach It suggests how empathy based ethics can be embedded in clinical practice medical education and

research The book concludes by examining the challenges in implementing such an approach and looks to a future which redresses the current imbalance between biomedical and psychosocial approaches to medicine **Palliative Care Nursing** Deborah Witt Sherman, 2010 This textbook has introduced concepts and methods of education which help to move palliative nursing forward as an evidenced based practice of whole person care Betty Ferrell PhD FAAN Research Scientist From the Foreword In this comprehensive textbook on palliative care nursing editors Marianne Matzo and Deborah Witt Sherman succeed in bringing together the heart of nursing and the true meaning of palliative care with the most current evidence based practice GeriPal Palliative care is a philosophy of caregiving that integrates disease modification with supportive compassionate therapies for patients at the end of life Palliative care nurses are responsible for alleviating pain and other physical symptoms along with satisfying the emotional social cultural and spiritual needs of patients who are facing life threatening illness This third edition of Palliative Care Nursing provides more comprehensive newly updated content knowledge attitudes skills and cutting edge teaching and learning strategies to achieve the AACN End of Life nursing competencies providing a lifespan approach Now in its third edition this book continues to emphasize the value of complementary holistic modalities in promoting health wholeness and wellness even as death approaches Key topics discussed Ethical aspects of palliative care Legal aspects of end of life decision making Loss suffering grief and bereavement on the part of patients and their families Symptom specific nursing management of pain anxiety depression fatigue malnutrition and dehydration all common to palliative care How to communicate with the seriously ill and dying patients their families and their health care providers Disease specific aspects of palliative care for those battling cancer heart disease lung disease HIV AIDS end stage renal and liver disease neurological and other disorders **High-Grade Glioma: Pathophysiology, Treatment Strategies, and Holistic Care Approaches** Dr. Spineanu Eugenia, 2025-03-12 Explore comprehensive insights into High Grade Glioma with this treatise delving into its pathophysiology treatment strategies and holistic care approaches From the molecular markers influencing prognosis to advanced surgical techniques and emerging immunotherapy options this resource offers in depth analyses crucial for medical professionals and researchers Discover ethical considerations in treatment decisions patient experiences and palliative care essentials ensuring a compassionate approach throughout Whether navigating diagnostic challenges or optimizing patient outcomes through personalized therapies this treatise provides a nuanced understanding of High Grade Glioma s complexities Stay informed with the latest advancements in neuro oncology and enhance your knowledge base with evidence based practices aimed at improving quality of life and clinical outcomes for patients with this challenging neurological condition Against Physician Assisted Suicide David Jeffrey, 2009 The majority of doctors and nurses involved in specialist palliative care reject the legalisation of physician assisted suicide PAS This book explores the reasons why the healthcare professionals who have the most experience of caring for dying patients should object to a change in the law Debate about euthanasia and PAS often arises in

response to a well publicised tragic case of unrelieved suffering Such heart rending stories do not reflect the fact that the majority of people dying have a dignified death There is a marked disparity between medical intuitions and the philosophers arguments about euthanasia and PAS It seems that part of the moral constitution of a doctor is a commitment not to intend the death of a patient and to protect them from harm The perspective of those who are privileged to care for thousands of dying patients and their families should inform the debate about PAS This book will enable those who are not working within palliative care to gain an insight into the scope of this speciality and to understand why legalisation of PAS should be resisted to maintain and improve care of dying patients **Counselling for Death and Dying** Richard Bryant-Jefferies,2006

Focusing on counselling bereaved clients and those with terminal illness this book contains case studies reflective thoughts and feelings of both the client and counsellor Boxed key points and references to person centred theory aid easy comprehension
