## Patients Rights:

**Patients' Rights** Amnon Carmi, Harry Wax, 2002      **Protecting Patients' Rights?** Stephen Mackenney, Lars Fallberg, 2004 Ombudsman has been adopted in a number of countries over the years as a term for an administrative system that aims to protect the interests of individuals who complain against the system. However, this protection varies considerably from country to country. With an eminent list of international contributors, this book provides an overview of the role of the Ombudsman in relation to healthcare in countries with substantial cultural and historical differences. It demonstrates practical ways to protect patients' rights, looking at how each system operates, identifying the best components from each, as well as proposing future reforms. All healthcare professionals, including policy makers and shapers, will find this essential reading, gaining valuable lessons and insights to incorporate into their own organisations and systems. Focusing on principles of law and including clear outlines of the essential legal precedent, the author lays a solid foundation for understanding the intersection of law and ethics.

**Patients' Rights, Law and Ethics for Nurses: A practical guide** Paul Buka, 2008-02-29 Understanding the legal and ethical rights of any patient in their care is essential to good clinical practice. *Patients' Rights, Law and Ethics for Nurses: A Practical Guide* is a comprehensive pocket size book for nurses, midwives and allied health professionals that integrates health care law and ethics in relation to patient rights and in the context of everyday nursing and health care practice.      **Transposition of the Patients' Rights Directive**

**2011/24/EU** Goscinska, Daria, 2014-07-21 The Directive on the application of patients' rights in cross border healthcare was adopted by the Council of the European Union and the European Parliament on March 9th 2011. In the context of the adoption deadline on October 25th 2013, as well as considering the national positioning towards the Directive and the interpretational leeway, it is interesting to see how and to what extent national legislators transpose the Directive's implications. This paper will focus on the process of transposition, specifically domestic public consultations. The analysis is a two level comparison: on the one hand, it presents an intrastate study of the various stakeholders involved in the discourse during the transposition process, whereby a country specific picture of diverse proposals, opinions and challenges can be drawn. On the other hand, the paper marks an inter country comparison, offering a sample of European adaptational patterns. The healthcare systems of the analysed countries, Germany, Poland and Austria, are characterised by a Statutory Health Insurance (SHI) system; nevertheless, they differ concerning systemic specifics of healthcare, their voting behaviours towards

the Directive and initial situations regarding transposable provisions The study of domestic discourses from an actor centred perspective concludes on the most critical points of the Directive which reflect on prior authorisation reimbursement information provision and National Contact Points and on transposition patterns in the member states Hypotheses on the goodness of fit the scope of patients rights and difficult interpretational areas of the Directive were tested and partly verified The intrastate study and cross national comparison revealed considerable differences among a small sample of EU states with only some analogies regarding stakeholder and governmental behaviour The contrast is visible in the number and type of stakeholders timing of public consultations the emphasis set in the discourse frequency of discussed articles and accurateness of implementation This results not only from the difficult and debated area of health policy but also from country specific characteristics Overall the analysis indicates how important the process of transposition as part of EU law making is for the correctness and success of European policies An emphasis on the implementation phase is required to closely understand analyse and improve the functioning of the Acquis Communautaire
