**The Photographic Atlas of the Stars** H.J.P Arnold, Paul Doherty, Patrick Moore, 1999-05-01 The Photographic Atlas of the Stars contains 50 high quality full color photographs of the entire night sky of the northern and southern hemispheres. Each plate is accompanied by a star map of the identical area which identifies the main stars of the constituent constellations as well as other interesting astronomical objects. In addition to this detail Sir Patrick Moore has written a commentary for each plate that highlights the stars and objects of interest to observers equipped with binoculars and that includes detailed tabular information on astronomical objects of the region. The resulting double page spread provides an invaluable reference for the amateur astronomer detailing the constellations and other heavenly bodies of interest that are observable with the naked eye, binoculars or a small telescope.

**Philip's Atlas of the Universe** Patrick Moore, 2003-01-01 Philip's Atlas of the Universe is a classic and highly readable account of the stars, the planets and the Universe together with practical advice on observing the night sky. This fully revised new edition has been updated to include the latest information from current space missions including Cassini. **Aurora** Neil Bone, 2007-06-05 This new book addresses a gap in the literature offering an explanation of the aurora's causes, how the occurrence of major events may now be predicted and how amateur observers can go about recording displays. This is the first serious book about aurora written for practical but non professional observers. It provides a concise accessible description of the various auroral forms and how to record them, illustrated with color images of recent displays. It contains details of Space Weather forecasting websites, how to interpret and use the information given on these and how to anticipate auroral activity.

**Atlas of the Universe** Patrick Moore, 1994 This atlas contains the most recent developments in astronomy with sections on space research, practical astronomy and cosmology and complete coverage of earth, the planets, stars and galaxies. **Patrick Moore's Color Atlas** Patrick Moore, 1973

**Firefly Atlas of the Universe** Patrick Moore, 2005 The new edition of a critically acclaimed bestseller. A beautiful up to date oversized volume that is the equivalent of a small astronomy library, a superb visual reference. Terence Dickinson SkyNews Highly recommended Booklist of the 2nd Edition. Firefly Atlas of the Universe is the ultimate reference to the stars, planets and celestial objects using the most comprehensive information currently available. The book features the latest images from the Hubble Space Telescope, the Very Large Telescope, Mars Express, the Cassini spacecraft and 2004 Huygens probe of Saturn and Titan. The stunning images are explained with clear and detailed text. The full color book illustrates and explains Exploring the Universe, the history and current state of astronomy and space exploration, The Solar System, Earth and other planets mapped and imaged with data from the most recent mission probes, The Sun, astrophysical phenomena from sunspots to eclipses, The Stars, movements and life cycles, novae and supernovae, black holes and more, The Universe, the origin and nature of the universe, our galaxy, local and remote galaxies, quasars and the question of alien life, Star Maps, whole sky maps.

with 22 alphabetized chapter listings of stars and constellations and seasonal charts for both northern and southern hemispheres Firefly Atlas of the Universe is a fascinating and encyclopedic reference illustrated with spectacular color photographs and illustrations      **New Imperial Atlas of the World** Rand McNally and Company,1912      **Rand McNally and Co.'s New Imperial Atlas of the World Containing Large Scale Colored Maps of Each State and Territory in the United States, Provinces of Canada, the Continents and Their Subdivisions** Rand McNally and Company,1918
