(Re)Nationalization of Memory Kornelia Kończal, A. Dirk Moses, 2023-06-27 This book charts and traces state mandated or state encouraged patriotic histories that have recently emerged in many places around the globe. Such patriotic histories can revolve around both affirmative interpretations of the past and celebration of national achievements. They can also entail explicitly denialist stances against acknowledging responsibility for past atrocities even to the extent of celebrating perpetrators. Whereas in some cases patriotic history takes the shape of a coherent doctrine, in others they remain limited to loosely connected narratives. By combining nationalist and narcissist narratives and by disregarding or distorting historical evidence, patriotic history promotes mythified monumental and moralistic interpretations of the past that posit partisan and authoritarian essentialisms and exceptionalisms. Whereas the global debates in interdisciplinary memory studies revolve around concepts like cosmopolitan, global, multidirectional, relational, transcultural, and transnational memory, to mention but a few, the actual socio-political uses of history remain strikingly nation-centred and one-dimensional. This volume collects fifteen case studies of such nationalizations of history ranging from China to the Baltic states. They highlight three features of this phenomenon: the ruthlessness of methods applied by many state authorities to impose certain interpretations of the past; the increasing discrepancy between professional and political approaches to collective memory and the new post-truth context. This book will be of interest to students and researchers of international politics, the radical right, and global history. It was originally published as a special issue of the *Journal of Genocide Research*.

Patriotic Culture in Russia During World War I Hubertus Jahn, 1998 A cultural history charting the rise and fall of Russian patriotism during the first few years of the Great War. Military Culture and Popular Patriotism in Late Imperial Austria Laurence Cole, 2014 *Military Culture and Popular Patriotism* examines the interplay between popular patriotism and military culture in late imperial Austria. Laurence Cole suggests that two main questions should be asked regarding the western half of the Habsburg Monarchy during the period from the mid-nineteenth century to the outbreak of war in 1914: Firstly, how far did imperial Austrian society experience a process of militarization comparable to that of other European countries? Secondly, how far did the military sphere foster popular patriotism in the multinational state? Various manifestations of military culture, including hero cults and, above all, military veterans' associations, provide the main subject for analysis in this volume. After exploring the historical development of military culture in the Habsburg Monarchy, Cole explains how the long reign of Emperor Franz Joseph I constituted a decisive phase in the militarization of Austrian society, with the dynasty and state emphasizing the military's role as the locus of loyalty. Popular manifestations of military culture, such as the hero

cult surrounding Field Marshal Radetzky and military veterans associations complemented the official agenda in many respects. However, veterans associations in particular constituted a political mobilization of the lower middle and lower classes who asserted their own interests and position in civil society as is shown by case studies of regions of the Austrian state with significant Italian speaking populations. Trentino and the Littoral State attempts to assert greater control of veterans activities led to national and political opposition at a time when tensions over militarism and foreign policy increased. The Black and the Gold thus raises the question of whether the military was really a bulwark of the multinational state or rather a polarizing force in imperial Austrian society.

Culture and Liberty in the Age of the American Revolution Michal Jan Rozbicki, 2011-02-01. In his new book Michal Jan Rozbicki undertakes to bridge the gap between the political and the cultural histories of the American Revolution. Through a careful examination of liberty as both the ideological axis and the central metaphor of the age, he is able to offer a fresh model for interpreting the Revolution. By establishing systemic linkages between the histories of the free and the unfree and between the factual and the symbolic, this framework points to a fundamental reassessment of the ways we think about the American Founding. Rozbicki moves beyond the two dominant interpretations of Revolutionary liberty: one assuming the Founders invested it with a modern meaning that has in essence continued to the present day, the other highlighting its apparent betrayal by their commitment to inequality. Through a consistent focus on the interplay between culture and power, Rozbicki demonstrates that liberty existed as an intricate fusion of political practices and symbolic forms. His deeply historicized reconstruction of its contemporary meanings makes it clear that liberty was still understood as a set of privileges distributed according to social rank rather than a universal right. In fact, it was because the Founders considered this assumption self-evident that they felt confident in publicizing a highly liberal symbolic narrative of equal liberty to represent the Revolutionary endeavor. The uncontrollable success of this narrative went far beyond the circumstances that gave birth to it because it put new cultural capital, a conceptual arsenal of rights and freedoms at the disposal of ordinary people as well as political factions competing for their support, providing priceless legitimacy to all those who would insist that its nominal inclusiveness include them in fact.

Comparative Studies in Modern European History Miroslav Hroch, 2023-05-31. The two main themes of this selection of articles by Professor Hroch are the process of nation formation during the 19th century, especially in the case of smaller European nations, i.e. those without statehood, and the social and political aspects of the transition from a pre-modern feudal and traditional society to a modern capitalist one, and the uneven pace of this change in the West and East of Europe. The author argues that we cannot study the process of nation formation as a mere product of some nebulous nationalism; we have to understand it as a part of social and cultural transformation, as a component of modernization of European societies, even though this modernization did not occur synchronically and had its regional

specificities Many of the papers focus specifically on the Czech case but throughout there is an emphasis on comparative history

Nationalism and History Education Rachel Hutchins, 2016-02-26 History education by nature transmits an official version of national identity National identity is not a fixed entity and controversy over history teaching is an essential part of the process of redefining and regenerating the nation France and the United States have in particular experienced demographic and cultural shifts since the 1960s that have resulted in intense debates over national identity This volume examines how each country's national history is represented in primary schools social studies textbooks and curricula and how they handle contemporary issues of ethnicity diversity gender socio economic inequality and patriotism By analyzing each country separately and comparatively it demonstrates how various groups including academics politicians and citizen activists have influenced education and how the process of writing and rewriting history perpetuates a nation Drawing on empirical studies of the United States and France this volume provides insight into broader nationalist processes and instructive principles for similar countries in the modern world

Sound, Image, and National Imaginary in the Construction of Latin/o American Identities Héctor Fernández L'Hoeste, Pablo Vila, 2017-12-26 Sound Image and National Imaginary in the Construction of Latin o American Identities addresses a gap in the many narratives discussing the cultural histories of Latin American nations particularly in terms of the birth configuration and perpetuation of national identities It argues that these processes were not as gradual or constrained as traditionally conceived The actual circumstances dictating the adoption of particular technologies for the representation of national ideas shifted and varied according to many factors including local circumstances political singularities economic disparities and highly individualized cultural transitions This book proposes a model of chronology that is valid not only for nations that underwent strong processes of nationalism during the early or mid twentieth century but also for those that
