Vogel, 2014-12-31 Fully updated this ninth edition remains the definitive source on the economics of entertainment in the United States and overseas      Art History W. McAllister Johnson, 1990-01-01 These essays discuss major questions that should arise in courses in bibliography methodology and historiography once the survey courses are left behind      A New Economic Theory of Public Support for the Arts Arnaldo

Barone, 2015-12-14 Should the arts receive public support Can the arts survive in a modern capitalist society Can economics shed light on the nature of public support and whether there is a rationale for public intervention This book undertakes to examine these questions as it explores the ways government and public resources are used to support the arts This book applies a Veblenian approach to understanding economic development to investigate public support for the arts in an effort to determine whether this approach can elucidate economic rationales for public support Divided into three parts the first provides basic information on public support for the arts by surveying support in the United States and Australia Part two includes a neoclassical overview of the topic while part three presents Veblen's ideas on economic development This book will be of interests to researchers concerned with cultural and institutional economics as well as political economy The Nonprofit Sector in International Perspective Estelle James, 1989-03-30 Arising as a market induced improvement on existing governmental services and competing with the government for customers and resources nonprofit organizations are a relatively unexplored area of public policy This collection of essays written by scholars from a variety of disciplines adds new dimensions to the theory of nonprofit organizations and describes the public policies regarding nonprofit organizations that do or should exist in both developing and developed countries The contributors consider why governments subsidize such organizations the problems such subsidies create and the role played from an international perspective by religion and other ideological institutions in the founding and managing of nonprofit services **Research Division Report**, 1976 Who Benefits from the Nonprofit Sector? Charles T. Clotfelter, 1992-10-15 Over a million nonprofit organizations from day care centers and neighborhood churches to major research universities and metropolitan hospitals are currently relied upon to deliver an array of essential social services This is in keeping with a historical conviction that private voluntary action as opposed to government intervention should address as many of the nation's social needs as possible But just how much to rely on the nonprofit sector is the question at the center of a growing debate Critics challenge the assumption that nonprofit organizations have successfully directed much of their benefits toward the poor and disadvantaged an assumption that has to date justified favorable tax treatment for donations and nonprofit operations Who Benefits from the Nonprofit Sector examines all the major elements of the nonprofit sector health services educational and research institutions religious organizations social services arts and cultural organizations and foundations describing each institution and its function and then exploring how their benefits are distributed across various economic classes The book's findings indicate that while few institutions serve primarily the poor there is no evidence of a gross distribution of benefits upwards toward the more affluent The source of an institution's funding is also shown to be an important determinant in how its benefits are distributed They show for example that Nonprofit nursing homes and drug treatment centers have a lower concentration of Medicaid patients than their for profit public counterparts do Twenty seven percent of social service agencies serve primarily the poor and the large majority of these received most of their income from the federal government The effective educational subsidy i.e. cost

of education less tuition per person at both public and private universities increases with income The analysis of this data makes for a book with profound implications for future social and tax policy      **Cultural Pedagogy** David Trend,1992-04-20 In recent years debates over culture and education have entered the public consciousness as never before Politicians bureaucrats and scholars have credited these endeavors with the capacity to influence matters ranging from public morality to national productivity Trend examines points at which art and learning intersect in both traditional and nontraditional settings and offers a variety of alternatives for the construction of a new cultural pedagogy He argues that we need to redefine concepts like art literature and education to integrate them more fully into our lives On one hand Trend uses a critical approach to examine how cultural work and pedagogy intersect within a range of discourses such as Marxist feminist deconstructionist and postcolonial Yet on the other he focuses on the use of specific examples of cultural practice within and outside the classroom to emphasize the importance of action as well as philosophy to bring about social change Trend provides a theoretical overview of the ideological battles over texts and their discursive contexts and then analyzes how cultural education has evolved in such settings as the school the university and the community He concludes with a discussion of pedagogy and democracy which suggests a range of possible resolutions      *Handbook of the Economics of Art and Culture* Victor A. Ginsburgh,David Throsby,2006-09-13 Over the last 30 or 40 years a substantial literature has grown up in which the tools of economic theory and analysis have been applied to problems in the arts and culture Economists who have surveyed the field generally locate the origins of contemporary cultural economics as being in 1966 the year of publication of the first major work in modern times dedicated specifically to the economics of the arts It was a book by Baumol and Bowen which showed that economic analysis could illuminate the supply of and demand for artistic services the contribution of the arts sector to the economy and the role of public policy Following the appearance of the Baumol and Bowen work interest in the economics of the arts grew steadily embracing areas such as demand for the arts the economic functions of artists the role of the nonprofit sector and other areas Cultural economics also expanded to include the cultural or entertainment industries the media movies the publishing industry popular music as well as heritage and museum management property right questions in particular copyright and the role of new communication technologies such as the internet The field is therefore located at the crossroads of several disciplines economics and management but also art history art philosophy sociology and law The Handbook is placed firmly in economics but it also builds bridges across these various disciplines and will thus be of interest to researchers in all these different fields as well as to those who are engaged in cultural policy issues and the role of culture in the development of our societies Presents an overview of the history of art markets Addresses the value of art and consumer behavior toward acquiring art Examines the effect of art on economies of developed and developing countries around the world      Breaking the Boundaries B. Sanyal,2013-03-09 Exploring the complex arena of international planning for development has until now been uniquely the privilege of influential senior

western planners This book calls into question many of their hallowed principles and much of the conventional wisdom still evident in the halls of academe At a time of increasing enrollment of foreign students in North American planning programs the emergence of a new voice has coincided with a growing skepticism worldwide about old notions of planning and development in poorer and ex colonial countries Now there is a need for brave innovations to reshape our understanding of the global crisis and the potential for progressive and democratic local solutions in both rich and poor nations alike This new voice is given expression by academics and professionals from Third World nations who received their planning education in the west and who now hold posts in major western planning schools Breaking the Boundaries presents their views and those of concerned colleagues about the need for a radically changed curriculum based on a comparative one world approach to planning education Their personal experiences as young expatriate scholars and later as teachers of both Third World and First World students in western planning schools are seen as crucial to this need for change Through candid reflections and perceptive critiques of their own field the spatial environmental social design and communications disciplines the contributors explore crucial issues in development planning from theoretical and professional practice perspectives

*Managing Culture* Victoria Durrer, Raphaela Henze, 2019-11-12 This book provides new insights into the relationship of the field of arts and cultural management and cultural rights on a global scale Globalisation and internationalisation have facilitated new forms for exchange between individuals professions groups localities and nations in arts and cultural management Such exchanges take place through the devising programming exhibition staging marketing and administration of project activities They also take place through teaching and learning within higher education and cultural institutions which are now internationalised practices themselves With a focus on the fine visual and performing arts the book positions arts and cultural management educators and practitioners as active agents whose decisions actions and interactions represent how we as a society approach relate to and understand ourselves and others This consideration of education and practice as socialisation processes with global political and social implications will be an invaluable resource to academics practitioners and students engaging in arts and cultural management cultural policy cultural sociology global and postcolonial studies

The Overlooked Pillar Alisa V. Moldavanova, 2024-08-01 Offering an original perspective on the sustainable development discourse by emphasizing the importance of culture and cultural institutions in facilitating societal sustainability goals The Overlooked Pillar conceptualizes sustainability as an institutional logic that develops in organizations and is enacted by managers of such organizations who make decisions and engage in sustainable thinking on a daily basis leading them to reconcile current organizational realities and the need to adapt to those realities with considerations of the needs of future generations Drawing on more than five years of research conducted on a variety of organizations within the domain of the arts and humanities Alisa V Moldavanova provides a framework for organizational sustainability based on the dynamic interplay of two narratives institutional resilience and institutional distinctiveness and identifies mechanisms and

strategies adopted by managers of cultural organizations that maintain and enhance intergenerational sustainability The broader intellectual implication of the insights offered here encompasses the critical notion that genuine long term sustainability the kind that secures the rights of future generations requires sustainable stewardship today **Mark Blaug: Rebel with Many Causes** Marcel Boumans,Matthias Klaes,2013-11-29 This collection of eminent contributions discusses the ideas and works of Mark Blaug who has made important and often pioneering contributions to economic history economic methodology the economics of education development economics cultural econo *Economics and Culture* C. D. Throsby,2001 In an increasingly globalised world economic and cultural imperatives can be seen as two of the most powerful forces shaping human behaviour This book considers the relationship between economics and culture both as areas of intellectual discourse and as systems of societal organisation Adopting a broad definition of culture it explores the economic dimensions of culture and the cultural context of economics The book is built on a foundation of value theory developing the twin notions of economic and cultural value as underlying principles for integrating the two fields Ideas of cultural capital and sustainability are discussed especially as means of analysing the particular problems of cultural heritage drawing parallels with the treatment of natural capital in ecological economics The book goes on to discuss the economics of creativity in the production of cultural goods and services culture in economic development the cultural industries and cultural policy
