Administrative Reform in Post-Mao China Stephen K. Ma,1996 This book analyzes China's bureaucratic behavior since the inauguration of administrative reform in the late 1970s Although bureaucratic behavior in China in the past decade was increasingly corrupted this aspect of China's post Mao reform has not been subjected to a rigorous scrutiny This book explores the gulf between desired and the actual bureaucratic behavior among China's public administrators The author argues that this behavioral gap in China's modernization stems from several factors including the nation's cultural heritage the ruling party's approach to government and the absence of trusted full fledged academic groups assigned to advise on administrative reform The book then probes one of the gravest consequences of the behavioral gap reform corruption a phenomenon which seems to be a mixed blessing of modernization *Handbook of Public Administration* B Guy Peters,Jon Pierre,2007-05-23 The past two decades have been marked by a period of substantial and often fundamental change in public administration Critically reflecting on the utility of scholarly theory and the extent to which government practices inform the development of this theory the Handbook of Public Administration was a landmark publication which served as an essential guide for both the practice of public administration today and its on going development as an academic discipline The Concise Paperback Edition provides a selection of 30 of the original articles in an accessible paperback format and includes a new introduction by B Guy Peters and Jon Pierre It is an essential point of reference for all students of public administration

**Administrative Reform** Gerald E. Caiden,2017-07-05 What is administrative reform How is it differentiated from other kinds of social reform Who are administrative reformers and how do they approach their task And who benefits and who suffers from it Does a theory of administrative reform exist A survey of published research on administrative reform reveals that satisfactory answers to these questions are handicapped by methodological and theoretical shortcomings There are no common definitions no agreement over content no selected boundaries no clear links with the wide phenomenon of social reform no firm hypothesis tested by empirical findings and no continuous dialogue between practitioners and theorists This book is the first comprehensive and systematic treatment of the subject for professionals and students in the fields of public and private administration It carefully examines the diverse interdisciplinary literature on the subject and identifies and develops the most promising approaches towards a unified theory Caiden shows how the study of administrative reform can contribute substantially to the development of administrative theory and constructs a working definition of the phenomenon of administrative reform distinguishing it from social change and from administrative change The practical use of this definition is tested by the analysis of various case histories of administrative cultures of different periods in history from which a common cycle of reform processes is discerned The author follows with a detailed examination of the processes themselves The book concludes with a discussion of the obstacles to reform and a review of the author's findings and conclusions

**Towards A New Executive Order In Europe?** Deirdre Curtin, Morten Egeberg, 2013-09-13 The executive branch of government in Europe is being gradually transformed in several significant respects First executive power has been continuously strengthened at the EU level in the form of the European Commission EU level agencies and diplomatic and military staff in the Union Council secretariat Second EU executive bodies relate directly to regulatory authorities at the national level in charge of applying and partly preparing EU laws and programmes partly circumventing ministerial departments Thus parts of national administrations become parts of an integrated and multi level Union administration as well as parts of national executives Such a system with multiple political masters raises delicate questions about political steering and accountability This book focuses on this fascinating development both from a political science and a legal perspective encompassing the consolidation of the supranational executive as well as its relationships with its partners at the national level This book was published as a special issue of *West European Politics*      *Administrative Reform in the Jordanian Ministry of Education* Kayed M. Salameh, 1986      **The Rush to Policy** Peter William House, Roger Roger Don Shull, *Rush to Policy* explores the appropriate role of technical analysis in policy formulation The authors ask when and how the use of sophisticated analytic techniques in decision making benefits the nation They argue that these techniques are too often used in situations where they may not be needed or understood by the decision maker where they may not be to answer the questions raised but are nonetheless required by law House and Shull provide an excellent empirical base for describing the impact of politics on policies policy analysis and policy analysts They examine cost benefit analysis risk analysis and decision analysis and assess their ability to substitute for the current decision making process in the public sector They examine the political basis of public sector decision making how individuals and organizations make decisions and the ways decisions are made in the federal sector Also they discuss the mandate to use these methods in the policy formulation process The book is written by two practicing federal policy analysts who in a decade of service as policy researchers developed sophisticated quantitative analytic and decision making techniques They then spent several years trying to use them in the real world Success and failures are described in illuminating detail providing insight not commonly found in such critiques The authors delineate the interaction of politics and technical issues Their book describes policy analysis as it is not how it ought to be Peter W House is the director of policy research and analysis at the National Science Foundation He is the

author of ten books on multidisciplinary science and technology policy research and analyses in government private and university sectors including *The Art of Public Policy Analysis* and with Roger D Shull *Regulatory Reform Politics and the Environment and Regulations and Science Management of Research on Demand* Roger D Shull is a senior analyst at the Division of Policy Research and Analysis National Science Foundation      *Policymaking Under Adversity* Yehezkel Dror, 2017-09-29 This groundbreaking study systematically treats recent policymaking trends starting with a reconsideration of salient theoretical issues of policymaking and its study and culminating with a survey of current policy related predicaments in various countries Dror proposes that the task for social science research is to uncover underlying causes of policymaking inadequacies Standard research methods Dror states have been unable to uncover the realities of important decisions made inside governments In order to gain an understanding of pressing predicaments he believes that policymakers need to examine the foundations of contemporary practices of present assumptions and that they need a multiplicity of approaches to policymaking After prescribing a set of requirements that policymaking must satisfy in order to adequately respond to challenges Dror posits several improvements needed in education and in policy decision making The book concludes with an extensive bibliography including numerous important German works not found in other English language studies This book supplements the earlier basic theory and models propounded in Dror's *Public Policymaking* Reexamined by dealing with current trends As a guide to public policy literature and related works it will be invaluable to students and practitioners      *Aid Relations and State Reforms in the Democratic Republic of the Congo* Stylianos Moshonas, 2018-06-12 Since 2001 The Democratic Republic of Congo has been engaged in a three fold transition process towards liberalisation democratisation and peace Throughout this process external actors donors international financial institutions the UN system aid agencies have played a leading role effectively setting the orientations and modalities of this transition including their institutional dimension Congolese actors have not been passively subjected to this process however but have potently shaped it in various ways This book investigates the relationship between international aid partners and various Congolese actors since 2001 It examines this relationship as an aspect of the state reform process with particular reference to the administration Stylianos Moshonas argues that the pace and nature of reform has been compromised by the contradictions inherent within the process itself as advocated by international partners and by the ability of Congolese power holders to accommodate and co opt such reforms in line with their own political strategies Rather than framing aid relations as the outcome of the oppositional points of view of donors and Congolese actors this book presents a systematic focus on the compromises and accommodative characteristics that aid politics have coalesced around as well as the contradictory positions donors have found themselves in      *Education Policy and Reform in China* Guangli Zhou, Xiang Zhou, 2019-05-11 This book examines educational development and reform in contemporary China and focuses on some of the major issues facing education in both rural and urban areas across the spectrum of primary secondary higher adult and vocational

educational pathways The book reflects on Chinese educational strategies at a time of rapid development of the market economy and the need to promote the modernization of education It also considers how social reform and educational changes go hand in hand and discusses the right to education irrespective of gender nationality particularly examining the case of children from migrant families From the rapid development of preschool and compulsory education to the modernization of the university system this book highlights China's ambition to create a top tier education system fostering talent to match its requirements in a fast moving employment market and knowledge economy **Core-Periphery**
