Patterns In The Dust:

Patterns in the Dust Lesley Grant-Adamson, 1989 *Patterns in the Dust* Nancy Bernkopf Tucker, 1983 Chiang Kai shek's Chinese Nationalist government collapsed in 1949 despite United States support for the regime during the anti Communist civil war American policymakers were then forced to choose between rescuing the Nationalists or coming to terms with China's Communist government The Truman Administration caught up in the calculations of cold war diplomacy refused to make a rash decision Secretary of State Dean Acheson likened the Nationalist collapse to a tree falling in the forest the United States would have to wait for the dust settled before it could see ahead clearly *Patterns in the Dust* is a fresh look at a period overwhelmed by later events Drawing on many previously unavailable sources Nancy Bernkopf Tucker assesses the factors that influenced Washington policymakers during the critical few months in which the thirty year estrangement between the two countries began She examines the government's assessment of the chances for accommodation with the Chinese Communists the careful efforts to ascertain American public opinion and the effects of the Korean War which brought reasoned dialogue to an abrupt end *Patterns in the Dust* highlights the flexibility that Dean Acheson retained in American policy toward China Acheson emerges as a highly pragmatic man determined to preserve contacts with China simply because as events have proved that was the realistic way to conduct international relations Practical Sheet Metal

Intercontinental Transport of Air Pollution Andreas Stohl, 2004-06-08 Transboundary transport of air pollution has been a topic of scientific research for several decades and has also been addressed already by environmental policies However the importance of air pollution transport on the largest intercontinental scales has been recognized only recently It was soon found that the meteorological and chemical processes involved in intercontinental pollution transport are distinctly different from those occurring during regional scale transport and thus new scientific methodologies are required for their study In this book leading scientists review the current state of knowledge in this emerging field of research providing the reader with a process understanding of global scale transport and its influence on the atmosphere's chemical composition Long range transport of anthropogenic pollution is contrasted with that of pollution produced by natural processes such as dust storms or forest fires Furthermore the prospects for international management of intercontinental transport of anthropogenic pollution are discussed
