Everyday Lives in the Global City Jörg Dürrschmidt, 2013-04-15 Rejecting simplifying notions of globalisation as a macro economic force this book provides a grounded picture of the various ways in which people's biographies are tied up with the global cultural economy The main argument of the book is that the globalisation of lives is experienced by people as the extension of their milieux both spatially and symbolically

African Philosophy Guttorm Fløistad, 2012-12-06 This publication is a continuation of two earlier series of chronicles Philosophy of the Mid Century Firenze 1958-59 and Contemporary Philosophy Firenze 1968 edited by Raymond Klibansky Like the other series these chronicles provide a survey of significant trends in contemporary philosophical discussion from 1970 to 1985 The need for such surveys has I believe increased rather than decreased over the last years The philosophical scene appears for various reasons more complex than ever before The continuing process of specialization in most branches the emergence of new schools of thought the convergence of interest thought not necessarily of opinion of different traditions upon certain problems the increasing attention being paid to the history of philosophy in discussions of contemporary problems and the growing significance for philosophical discourse of the social political and cultural situation in various regions of the world are the most important contributory factors Surveys of the present kind are a valuable source of knowledge of this complexity and may as such be an assistance in renewing the understanding of one's own philosophical problems The surveys it is to be hoped may also help to strengthen a world wide Socratic element of modern philosophy the dialogue or Kommunikationsgemeinschaft So far five volumes have been prepared for the new series

The Death Café Movement Jack Fong, 2017-07-31 This sociological work examines the phenomenon of the Death Caf a regular gathering of strangers from all walks of life who engage in death talk over coffee tea and desserts Using insightful theoretical frameworks Fong explores the common themes that constitute a death identity and reveals how Caf attendees are inspired to live in light of death because of death Fong examines how the participants embrace of self sovereignty and confrontation of mortality revive their awareness of and appreciation for shared humanity While divisive identity politics continue to foster neo tribalisms and the construction of myriad others Fong makes visible how those who participate in Death Caf's end up building community while being inspired toward living more fulfilling

lives Through death talk unfettered from systemic control they end up feeling more agency over their own lived lives as well as being more conscious of the possibility of a good death According to Fong participants in this phenomenon offer us a sublime way to confront the facticity of our own demise by gathering as one

InTerior Design - Convolute Håkan Gulliksson, The home is under siege both because it is an enormous potential market and because of changing human behaviours It is also interesting as a platform for new technology and for analysis of everyday life as in this essay We will describe the home as a context where the interactors are humans inhabitants things artefacts in the home and information The interactions at home are activities and routines This essay presents and structures quotes and thoughts on the organization and decoration of the home another huge topic To limit the scope somewhat we will look for theory to discuss only related to homes of the western middle class The essay is yet another piece in a puzzle to understand information technology in the future

Dennett Tadeusz Zawidzki, 2014-10-01 A systematic and thorough interpretation of the philosophy of Daniel Dennett this book is a tantalizing entr e into the philosophy of mind Manifestly we human beings are conscious thinking free and responsible agents However science has revealed that we are also natural products of evolution composed of simple biochemical components which are arranged in complex self maintaining configurations How do these two aspects of humanity coincide Tadeusz Zawidzki outlines Dennett s reconciliation of three major components thought consciousness and freedom of the will with what science tells us about human nature In the course of this exposition the book highlights the important role that Darwinian thinking plays in Dennett s proposed reconciliation as well as his innovative proposals regarding the reality of our consciousness and its attributes An insightful introduction to Dennett s thought this work will prove invaluable to interested readers students and scholars alike

The Intentional Stance Daniel C. Dennett, 1989-03-06 How are we able to understand and anticipate each other in everyday life in our daily interactions Through the use of such folk concepts as belief desire intention and expectation asserts Daniel Dennett in this first full scale presentation of a theory of intentionality that he has been developing for almost twenty years We adopt a stance he argues a predictive strategy of interpretation that presupposes the rationality of the people or other entities we are hoping to understand and predict These principles of radical interpretation have far reaching implications for the metaphysical and scientific status of the processes referred to by the everyday terms of folk psychology and their corresponding terms in cognitive science While Dennett s philosophical stance has been steadfast over the years his views have undergone successive enrichments refinements and extensions The Intentional Stance brings together both previously published and original material four of the book s ten chapters its first and the final three appear here for the first time and push the theory into surprising new territory The remaining six were published earlier in the 1980s but were not easily accessible each is followed by a reflection an essay reconsidering and extending the claims of the earlier work These reflections and the new chapters represent the vanguard of Dennett s thought They reveal fresh lines of inquiry into fundamental issues in

psychology artificial intelligence and evolutionary theory as well as traditional issues in the philosophy of mind
