## **Patterns For America:**

Patterns for America Susan Hegeman, 1999 In recent decades historians and social theorists have given much thought to the concept of culture its origins in Western thought and its usefulness for social analysis In this book Susan Hegeman focuses on the term s history in the United States in the first half of the twentieth century She shows how during this period the term culture changed from being a technical term associated primarily with anthropology into a term of popular usage She shows the connections between this movement of culture into the mainstream and the emergence of a distinctive American culture with its own patterns values and beliefs Hegeman points to the significant similarities between the conceptions of culture produced by anthropologists Franz Boas Edward Sapir Ruth Benedict and Margaret Mead and a diversity of other intellectuals including Randolph Bourne Van Wyck Brooks Waldo Frank and Dwight Macdonald Hegeman reveals how relativist anthropological ideas of human culture which stressed the distance between modern centers and primitive peripheries came into alliance with the evaluating judgments of artists and critics This anthropological conception provided a spatial awareness that helped develop the notion of a specifically American culture She also shows the connections between this new view of culture and the artistic work of the period by among others Sherwood Anderson Jean Toomer Thomas Hart Benton Nathanael West and James Agee and depicts in a new way the richness and complexity of the modernist milieu in the United States *Patterns of Migration and Population Change in America's Heartland*, 1978

**America** Stanley Cavell, 2022-12-22 Stanley Cavell is a titan of the academic world his work in aesthetics and philosophy has shaped both fields in the United States over the past forty years In this brief yet enlightening collection of lectures Cavell investigates the work of two of his most tried and true subjects Emerson and Wittgenstein Beginning with an introductory essay that places his own work in a philosophical and historical context Cavell guides his reader through his thought process when composing and editing his lectures while making larger claims about the influence of institutions on philosophers and the idea of progress within the discipline of philosophy In Declining Decline Cavell explains how language modifies human existence looking specifically at the culture of Wittgenstein's writings He draws on Emerson Thoreau and many others to make his case that Wittgenstein can indeed be viewed as a philosopher of culture In his final lecture Finding as Founding Cavell writes in response to Emerson's Experience and explores the tension between the philosopher and language that he or she must embrace language as his or her form of life while at the same time surpassing its restrictions He compares finding new ideas to discovering a previously unknown land in an essay that unabashedly celebrates the power and joy of
