*Institutions, Industrial Upgrading, and Economic Performance in Japan* Terutomo Ozawa, 2007-01-01 the book reviewed here will trigger a further interest in this area of research and will invite more researchers to seek empirical evidence in the study of post war industrial growth in Japan Hiroshi Ohashi *Journal of the Japanese and International Economies* This book provides a theoretically informed and empirically illustrative account of modern Japanese industrialization Ozawa's translation of classical political economy to the Japanese context is both original and accessible and is a welcome addition to the literature on the Japanese variety of capitalism Tim Reiffenstein *Pacific Affairs* Ozawa succeeds in extending building up and joining the Akamatsu Kojima lineage of this unique Japan born theory of economic development from a fresh unconventional and discerning perspective From the foreword by Kiyoshi

Kojima Terutomo Ozawa examines Japan's once celebrated post war economic success from a new perspective. He applies a flying geese model of industrial upgrading in a country that is still catching up to explore the rise, fall and rebound of Japanese industry with its evolving institutions and policies. The book brings together and expands upon theories developed in the author's work over many years using them as building blocks for his flying geese model. Concepts explored include economics of hierarchical concatenation, increasing factor incongruity, comparative advantage or market recycling, the Ricardo-Hicksian trap of industrial production, Smithian growth, *elan triumvirate*, pro-trade structural transformation, knowledge creation versus knowledge diversion, the price-knowledge industry flow mechanism à la David Hume, the syndrome of institutional incongruity and socially justifiable moral hazard versus degenerative moral hazard. The dynamic process of industrial upgrading is analysed in detail and important lessons for both developing and transition economies are highlighted. This fascinating book will attract a wide-ranging readership encompassing practitioners and academics interested in international business, economic development, trade and political science. In addition, sociologists focussing on business and industry and researchers on and policymakers in developing and transition economies will also find this book of immense interest.

**Southeast Asia** Lim Chong Yah, 2001-04-30 Latest Edition. Southeast Asia: The Long Road Ahead 3rd Edition. Southeast Asia is going through tremendous changes economically. The market-oriented economies of Brunei, Indonesia, Malaysia, the Philippines, Singapore and Thailand have been showing robust growth since the 1960s. The transitional economies of Cambodia, Laos, Myanmar and Vietnam are exhibiting signs of economic awakening and revival after years of internal political and social turmoil. Despite these encouraging signs, the region still has a long road ahead in its efforts to achieve developed nation status. This book is a serious and concise study of various important economic aspects of Southeast Asia. The existing economic studies of the region are mainly topical in nature. Most books attempt to offer only a partial treatment of the issues and fail to examine these issues in a holistic manner. The objective of this book is to provide a more complete cross-country discussion on the economic issues and problems facing Southeast Asia. Besides critically examining the multiple facets of changes and problems that have been and will be encountered by Southeast Asia, the book presents a lucid exposition of the prospects of the region. However, it does not stop there but moves on to provide pointers and suggestions on how Southeast Asian countries should proceed with their development options and processes. The book should be of interest to economists and graduate students researching on Southeast Asia. It will also be extremely useful to those who want to have a better understanding of the Southeast Asian region.
