getting attention as sightseeing locales and emigration regions attracting those who prefer country life an image of the islands that has been created by the romanticized gaze from the Japanese mainland The authors describe the various forms of the outlying Japanese islands and at the same time discover their common regional characteristics as defined by the view from the mainland Migrants, Refugees, and Foreign Policy Rainer Münz, Myron Weiner, 1997 Now faced with growing resistance to admitting foreigners into their countries both governments have once again been using foreign policy instruments in an effort to change the conditions in the refugees countries of origin that forced them to leave *Family Planning Services, Hearing Before the Subcommittee on Public Health and Welfare ... 91-2, on H.R. 15159, 9107, 9108, 9109, and 15691, August 3, 4, and 7, 1970* United States. Findley, Calvin Goldscheider, 2019-10-16 Perhaps because I grew up on a farm in Ohio I have long been interested in rural development Although I first became a migrant at the age of 17 when I left the farm to continue my studies in a city college I was not aware of the relation between rural development and migration until many years later when I began studying patterns of urban and rural poverty This research has grown out of my continuing investigation of the ways that migration has been seen as both a response to chronic conditions of rural poverty and a factor potentially exacerbating urban poverty conditions If governments wanted to deal with urban poverty they would want to restrict urban in migration yet if they reduced urban in migration this would remove one of the important means available to persons seeking to raise themselves out of rural impoverishment This would clearly be a no win situation for the rural poor the only way to deal fairly with both urban and rural poverty would be to foster socio economic development of rural areas Thus I became interested in studying the patterns of rural development which actually have had an effect on the migration decisions of rural families **TEXTBOOK OF ANIMAL BEHAVIOUR** FATIK BARAN MANDAL, 2012-01-17 This well accepted book now stands in its second edition is a time honoured revision and extension of the previous edition Beginning with an introduction to the study of animal behaviour the book explains the various aspects of behavioural biology incorporating a wealth of information from molecular biology neurobiology and socio biology with a new approach It describes different kinds of innate and learned behaviours animal communications defensive behaviours such as camouflage and mimicry with suitable illustrations The book incorporates the introductory concepts of biomimicry in an attractive manner Further it discusses biorhythms migration in fish and birds in addition to evolution and physiological basis of migration The text also presents the important aspects of socio biology and social behaviours such as feeding adaptation prey defence territoriality aggression altruism sexuality and parental care Finally it provides discussions on behavioural ecology in the context of conservation biology and human behaviour The book presents the basic principles of animal behaviour with the aid of carefully selected examples from both the recent and classic literature along with an emphasis on readability In the present edition topics like eusociality and behavioural theories have been incorporated This edition also includes as many as 11 published articles by the author on different topics related to the subject matter in box format to further strengthen the text The book is primarily intended for the students of B Sc M Sc Zoology Life Science for their courses It would be useful for the researchers in the field of animal behaviour and conservation biologists It would also attract readership studying Sociology and Anthropology **KEY FEATURES** Presents a well balanced view of ethology Discusses the current development in the field Includes a glossary of important terms Offers end of chapter questions to check the students understanding of the concepts **Labour Mobility and Rural Society** Arjan de Haan, Ben Rogaly, 2015-12-22 Comprising seven edited pieces of

detailed empirical work drawn from recent research this title reveals the dynamics behind the movements of poor people in South and South East Asia and Africa      *Human Evolutionary Genetics* Mark Jobling,Matthew Hurles,Chris

Tyler-Smith,2013-06-25 Human Evolutionary Genetics is a groundbreaking text which for the first time brings together molecular genetics and genomics to the study of the origins and movements of human populations Starting with an overview of molecular genomics for the non specialist which can be a useful review for those with a more genetic background the book shows how data from the post genomic era can be used to examine human origins and the human colonization of the planet richly illustrated with genetic trees and global maps For the first time in a textbook the authors outline how genetic data and the understanding of our origins which emerges can be applied to contemporary population analyses including genealogies forensics and medicine      **Artificial Intelligence-Driven Geographies** Seyed Navid Mashhadi Moghaddam,Huhua
