Social Exclusion in Great

Britain Matt Barnes, 2019-06-04 Originally published in 2005 In Great Britain the reduction of social exclusion has been at the forefront of New Labour's social policy since 1997 However there is ambiguity about what the notion of social exclusion actually encompasses caused in part by the limited extent of attempts to measure and understand social exclusion empirically This key work addresses this problem employing data from a nationally representative survey of British households to quantify levels of social exclusion and the composition of the socially excluded population It also incorporates data from a European Commission funded household survey to compare social exclusion in Great Britain with eleven other countries in the European Union In the book Matt Barnes argues that social exclusion refers to enduring disadvantage on a wide range of living standards not just those that reflect economic values As well as looking at standard measures of poverty he looks at more relational measures of disadvantage such as neighbourhood discontent and social isolation in order to determine exclusion from the economic social and cultural systems that determine the integration of a person in society *Social Europe* Richard Berthoud, Maria Iak_vou, 2004-01-01 Social Europe analyses the diverse dynamics of the lives of people across Europe It is the first quantitative analysis of its kind to make a systematic comparison of life chances across the fifteen countries of the EU This wide perspective enables the researchers to illustrate how social policy regimes interact with personal resources and circumstances to affect people's well being Assessing changes in individuals' lives over time the study highlights variations in life opportunities across the EU in the key domains of family employment and income The research is based on a new and powerful survey that has followed a large sample of families in each country over a period of years This longitudinal approach provides insights into the processes by which people acquire their social positions over time The analysis identifies systematic differences between countries and looks for explanations in terms of the welfare regime or other characteristics of the countries concerned Thus the micro dynamics of personal experience are related to macro trends in institutions and policies social norms and economic conditions Identifying the effects of country and of social policy regime on individual outcomes Social Europe will provide new insights for social scientists especially those involved in European comparative research or whose interests lie in the fields of family employment income or social exclusion The book will also appeal to those engaged in the analysis or formulation of social policy whether at national or international level *People and Places* Dorling, Daniel, Thomas, Bethan, 2004-06-30 Providing an at a glance guide to social change in the UK at the start of the new millennium this book offers comparisons with the findings of the previous Census a decade ago Many maps covering different topics illustrate the state of UK society today and how it is changing **Exploring Inequality in Europe** Martin Heidenreich, 2016-06-24 Europe has become a dominant frame for the generation regulation and perception of social inequalities This trend was solidified by the current economic crisis which is characterized by increasing inequalities between central and peripheral countries and groups By analysing the double polarization between winners and losers of the crisis the segmentation of labour markets and the perceived quality of life in Europe this book contributes to a better

understanding of patterns and dynamics of inequality in an integrated Europe The Spanish Welfare State in European Context Ana Marta Guillén, Margarita León, 2016-02-17 Following the death of Franco Spain underwent a transition to democracy in the mid 1970s Although a rapid process of modernization occurred the Spanish welfare state was seen until fairly recently as relatively underdeveloped However given the progressive Europeanization and expansion of Spanish social policy questions arise as to whether the Spanish welfare system should still be considered as peripheral to West European welfare states This volume is divided into three sections The first section deals with broad trends in the evolution of the Spanish welfare state To begin with the consolidation path of social protection policies is explored Attention is also paid to the process of Europeanization Furthermore the analysis explores advances in gender equality policies In the second section attention is turned to governance issues such as collective bargaining the interplay among levels of government the welfare mix and public support for social policies The third and final part of the book addresses five main challenges facing the Spanish welfare state in the 21st century namely the need to enhance flexicurity to achieve a better work family balance to coordinate immigration policies with existing social protection to tackle the persistence of high rates of relative poverty and to face intense population ageing both in terms of increasing needs for care and the reform of the pension system

Territorial and Social Inequalities in Europe Martin Heidenreich, 2022-10-28 This book examines social inequalities in Europe especially those caused by economic factors It starts with the paradox of European inequality where on the one hand even total income inequality in Europe is significantly lower than in most parts of the world but on the other Europe is also characterised by profound and durable inequalities within the continent It discusses inequalities caused by the exclusion of marginalised groups from the labour market with considerable and sometimes increasing differences between central and peripheral regions pronounced wealth and labour market inequalities and significant rates of persistent poverty deprivation educational poverty low wages and unemployment The book also discusses broader territorial inequalities which are the basis for divisions between Northern and Southern Europe East and West between qualified and unqualified employees younger and older people men and women and migrants and non migrants The book raises questions about the winners and losers of the social transformations linked to the introduction of the Euro the Eastern enlargement of the EU and the financial and Eurozone crises It is based on a comprehensive analysis of a European wide microdata set on income and living conditions EU SILC The empirical research material which is the first to deploy this data in a comprehensive manner consists of detailed empirical analyses of social divisions and Europeanisation processes in 30 European countries It analyses and explains the transformation of the previously dominant national spaces into a European social space This topical book is of interest to academics and students in the fields of sociology and comparative social sciences along with those studying European regional geography anthropology international relations and international politics **New Social Policy Agendas for Europe and Asia** Katherine Marshall, Olivier Butzbach, 2003 The East Asia crisis of 1997 98 highlighted the
