*Patty's Toxicology: Alcohols ; Esters ; Epoxy compounds ; Organic peroxides ; Glycols and glycol ethers ; Synthetic polymers ; Organic sulfur compounds ; Organic phosphates*, 2012 **Patty's Toxicology, 8 Volume + Index Set** Eula Bingham, Barbara Cohrssen, Charles H. Powell, 2001-02-05 PATTY S has become one of Wiley's flagship publications in occupational health and safety and the toxicology volumes give proof to the growth and development of the field of toxicology. What began as a single volume devoted to the field with the first edition 1948 of Patty's has now mushroomed into eight. This Fifth Edition will permit us to bring about many badly needed changes to the format and organization of the toxicology volumes. In addition to standardizing the format and sequence in which toxicologic data is presented for all of the compounds, the compounds will be organized according to logical groupings. e.g. the metals will be covered in 23 separate chapters making up Volumes II and III. Vol IV will contain four chapters on aromatic hydrocarbons and 7 chapters on organic nitrogen compounds. Vol V will contain eight chapters on organic halogenated hydrocarbons and four on aliphatic carboxylic acids. Vol VI will feature three chapters on ketones, two on alcohols and five on esters, and Vol VII will include four chapters on epoxy compounds, two on glycol ethers and eight on synthetic polymers. The reorganization of chapters in Volumes II through VI by itself will vastly facilitate information searching and retrieval. Volume VIII, like Volume I, does not cover compounds but rather other major issues in toxicology assessment or other forms of toxic agents. *Acute Exposure Guideline Levels for Selected Airborne Chemicals* National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Toxicology, Committee on Acute Exposure Guideline Levels, 2013-09-26 *Acute Exposure Guideline Levels for Selected Airborne Chemicals* Volume 15 identifies reviews and interprets relevant toxicologic and other scientific data for ethyl mercaptan, methyl mercaptan, phenyl mercaptan, tert octyl mercaptan, lewisite, methyl isothiocyanate and selected monoisocyanates in order to develop acute exposure guideline levels (AEGLs) for these high priority acutely toxic chemicals. AEGLs represent threshold exposure limits, exposure levels below which adverse health effects are not likely to occur for the general public and are applicable to emergency exposures ranging from 10 minutes min to 8 h. Three level AEGL 1, AEGL 2 and AEGL 3 are developed for each of five exposure periods: 10 min, 30 min, 1 h, 4 h and 8 h and are distinguished by varying degrees of severity of toxic effects. This report will inform planning response and prevention in the community, the workplace, transportation, the military and the remediation of Superfund sites. *Guide to Reference in Medicine and Health* Christa Modschiedler, Denise Beaubien Bennett, 2014-04-26 Drawn from the extensive database of *Guide to Reference*, this up to date resource provides an annotated list of print and electronic biomedical and health related reference sources including internet resources and digital image collections. Readers will find relevant research, clinical and

consumer health information resources in such areas as Medicine Psychiatry Bioethics Consumer health and health care Pharmacology and pharmaceutical sciences Dentistry Public health Medical jurisprudence International and global health Guide to Reference entries are selected and annotated by an editorial team of top reference librarians and are used internationally as a go to source for identifying information as well as training reference professionals Library staff answering health queries as well as library users undertaking research on their own will find this an invaluable resource
