Munene,2014-08-27 In the face of increasing social demand and cutbacks in state budgetary support universities in African countries are now turning towards a multicampus system strategy As African governments have adopted neoliberal education policies that place premium on entrepreneurialism profit making privatization and markets as drivers of university development a reshaping of the academic work and organizational framework have taken place However little is known about the impact of this paradigm shift on access quality and governance in higher education This book fills the void in research and academic knowledge about the impact of the emerging university configurations in Africa It analyzes the paradox surrounding the performance of multicampus university systems as avenues of broadening university access but whose structural success may be qualitatively contested This book offers a refreshing examination of the African multicampus university system from both an African and global perspective It makes use of empirical data from Kenya collected during extensive fieldwork along with substantive library and documentary resources on the rest of the continents to fortify arguments and demonstrate important conclusions This allows for a comparative analysis of policies and strategies used in the establishment of campuses both within and beyond national boundaries in the continent and will be a welcome contribution to the existing repertoire on African universities

Tools, Methodologies and Techniques Applied to Sustainable Supply Chains Jorge Luis García-Alcaraz,2020-02-21 Supply chains are currently

globalized and companies operate internationally owing to the fact that raw materials production processes and the consumption of the final products are carried out in different countries This implies high material and information flow which incurs high costs associated with the supply chain and logistics sometimes up to 60% of the total cost of the product Therefore companies seek to optimize their resources to reduce these costs and improve sustainability in a globalized market

This book entitled Tools Methodologies and Techniques Applied to Sustainable Supply Chains contains 15 chapters that report case studies applied to industrial and service sectors The authors come from areas such as Mexico Colombia Italy Sweden Slovakia China and Australia They indicate how managers make use of tools and techniques to solve problems associated with supply chains to reduce their cost and remain competitive A great effort has been made to analyze this problem and the methodologies are clearly described here to facilitate the reproducibility of each technique and tool This was done in the hope that hoping that they may one day be applied in more companies
