Return of the Black Death Susan Scott, Christopher J. Duncan, 2007-12-10 If the twenty first century seems an unlikely stage for the return of a 14th century killer the authors of Return of the Black Death argue that the plague which vanquished half of Europe has only lain dormant waiting to emerge again perhaps in another form At the heart of their chilling scenario is their contention that the plague was spread by direct human contact not from rat fleas and was in fact a virus perhaps similar to AIDS and Ebola Noting the periodic occurrence of plagues throughout history the authors predict its inevitable re emergence sometime in the future transformed by mass mobility and bioterrorism into an even more devastating killer

The Black Death and Later Plague Epidemics in the Scandinavian Countries: Ole Jørgen Benedictow, 2016-12-19 This monograph represents an expansion and deepening of previous works by Ole I Benedictow the author of highly esteemed monographs and articles on the history of plague epidemics and historical demography In the form of a collection of articles the author presents an in depth monographic study on the history of plaque epidemics in Scandinavian countries and on controversies of the microbiological and epidemiological fundamentals of plague epidemics Interdisciplinary Public Health Reasoning and Epidemic Modelling: The Case of Black Death George Christakos, Ricardo A. Olea, Marc L. Serre, Hwa-Lung Yu, Lin-Lin Wang, 2006-09-24 If you want to achieve something if you want to write a book paint a picture be sure the center of your existence is somewhere else and that it s solidly grounded only then will you be able to keep your cool and laugh at the attacks that are bound to come P Feyerabend This is a book about interdisciplinary public health reasoning and epidemic m the elling in general and the study of the infamous 14 century AD Black Death d aster in particular We focus on the intellectual context in which epidemic mod ling takes place in a way that accounts for the present day interdisciplinary and multicultural trends in scientific inquiry Like most scientific fields public health research defines itself based on knowledge which raises serious epistemic and cognitive issues Therefore we maintain that for public health modellers to fu tion in an often complex environment they should be aware of the divergent c ceptions of knowledge and the technological changes that these imply the mul ple sources of information commonly available and their reliability the different styles of thinking adopted by the disciplines involved and the importance of veloping sound interdisciplinary knowledge integration skills Black Death in London Barnie Sloane, 2011-05-02 The Black Death of 1348 49 may have killed more than 50% of the European population This book examines the impact of this appalling disaster on England's most populous city London Using previously untapped documentary sources alongside archaeological evidence a remarkably detailed picture emerges of the arrival duration and public response to this epidemic and subsequent fourteenth century outbreaks Wills and civic and royal administration documents provide clear evidence of the speed and severity of the plague of how victims many named made preparations for their heirs and families and of the immediate social changes that the aftermath brought The traditional story of the timing and arrival of the plague is challenged and the mortality rate is revised up to 50% 60% in the

first outbreak with a population decline of 40 45% across Edward III's reign Overall The Black Death in London provides as detailed a story as it is possible to tell of the impact of the plague on a major medieval English city Plague in the Early Modern World Dean Phillip Bell, 2019-01-08 Plague in the Early Modern World presents a broad range of primary source materials from Europe the Middle East North Africa China India and North America that explore the nature and impact of plague and disease in the early modern world During the early modern period frequent and recurring outbreaks of plague and other epidemics around the world helped to define local identities and they simultaneously forged and subverted social structures recalibrated demographic patterns dictated political agendas and drew upon and tested religious and scientific worldviews By gathering texts from diverse and often obscure publications and from areas of the globe not commonly studied Plague in the Early Modern World provides new information and a unique platform for exploring early modern world history from local and global perspectives and examining how early modern people understood and responded to plague at times of distress and normalcy Including source materials such as memoirs and autobiographies letters histories and literature as well as demographic statistics legislation medical treatises and popular remedies religious writings material culture and the visual arts the volume will be of great use to students and general readers interested in early modern history and the history **Contesting the Middle Ages** John Aberth, 2018-10-03 Contesting the Middle Ages is a thorough exploration of disease of recent arguments surrounding nine hotly debated topics the decline and fall of Rome the Viking invasions the Crusades the persecution of minorities sexuality in the Middle Ages women within medieval society intellectual and environmental history the Black Death and lastly the waning of the Middle Ages The historiography of the Middle Ages a term in itself controversial amongst medieval historians has been continuously debated and rewritten for centuries In each chapter John Aberth sets out key historiographical debates in an engaging and informative way encouraging students to consider the process of writing about history and prompting them to ask questions even of already thoroughly debated subjects such as why the Roman Empire fell or what significance the Black Death had both in the late Middle Ages and beyond Sparking discussion and inspiring examination of the past and its ongoing significance in modern life Contesting the Middle Ages is essential reading for students of medieval history and historiography **Geographies of Plague Pandemics** Mark Welford, 2018-04-09 Geographies of Plague Pandemics synthesizes our current understanding of the spatial and temporal dynamics of plague Yersinia pestis The environmental political economic and social impacts of the plague from Ancient Greece to the modern day are examined Chapters explore the identity of plague DNA its human mortality and the source of ancient and modern plagues This book also discusses the role plague has played in shifting power from Mediterranean Europe to north western Europe during the 500 years that plague has raged across the continent The book demonstrates how recent colonial structures influenced the spread and mortality of plague while changing colonial histories In addition this book provides critical insight into how plague has shaped modern medicine public health and disease monitoring and what role if any it might play as a

terror weapon The scope and breadth of Geographies of Plague Pandemics offers geographers historians biologists and public health educators the opportunity to explore the deep connections among disease and human existence **Change and the Course of Global History** John L. Brooke, 2014-03-17 The first global study by a historian to fully integrate the earth system approach of the new climate science with the material history of humanity **Companion to Family and Local History** David Hey, 2010-02-25 The Oxford Companion to Family and Local History is the most authoritative guide available to all things associated with the family and local history of the British Isles It provides practical and contextual information for anyone enquiring into their English Irish Scottish or Welsh origins and for anyone working in genealogical research or the social history of the British Isles This fully revised and updated edition contains over 2 000 entries from adoption to World War records Recommended web links for many entries are accessed and updated via the Family and Local History companion website This edition provides guidance on how to research your family tree using the internet and details the full range of online resources available Newly structured for ease of use thematic articles are followed by the A Z dictionary and detailed appendices which include further reading New articles for this edition are A Guide for Beginners Links between British and American Families Black and Asian Family History and an extended feature on Names With handy research tips a full background to the social history of communities and individuals and an updated appendix listing all national and local record offices with their contact details this is an essential reference work for anyone wanting advice on how to approach genealogical research as well as a fascinating read for anyone interested in the past

**The Black Death, Updated Edition** Louise Slavicek, 2021-04-01 In 1347 Europe was hit by the worst natural disaster in its recorded history the Black Death Now believed to be a combination of bubonic plague and two other rarer plague strains the Black Death ravaged the continent for several terrible years before finally fading away in 1352 Most historians believe that the pandemic which also swept across parts of Western Asia and North Africa annihilated 33 to 60 percent of Europe s population roughly 25 to 45 million men women and children This massive depopulation had a deep impact on the course of European history speeding up or initiating important social economic religious and cultural changes Medicine and Colonialism Poonam Bala, 2015-10-06 Focusing on India and South Africa during the nineteenth and twentieth centuries the essays in this collection address power and enforced modernity as applied to medicine Clashes between traditional methods of healing and the practices brought in by colonizers are explored across both territories Climate Change and the Health of Nations Anthony J. McMichael, Alistair Woodward, Cameron Muir, 2017 When we think climate change we think of man made global warming caused by greenhouse gas emissions But natural climate change has occurred throughout human history and populations have had to adapt to its vicissitudes Tony McMichael a renowned epidemiologist and a pioneer in the field of how human health relates to climate change is the ideal guide to this phenomenon and in his magisterial Climate Change and the Health of Nations he presents a sweeping and authoritative analysis of how human societies have been

shaped by climate events The Truth About Contagion Thomas S. Cowan, Sally Fallon Morell, 2021-02-22 For readers of Plague of Corruption Thomas S Cowan MD and Sally Fallon Morell ask the question are there really such things as viruses Or are electro smog toxic living conditions and 5G actually to blame for COVID 19 The official explanation for today s COVID 19 pandemic is a dangerous infectious virus This is the rationale for isolating a large portion of the world's population in their homes so as to curb its spread From face masks to social distancing from antivirals to vaccines these measures are predicated on the assumption that tiny viruses can cause serious illness and that such illness is transmissible person to person It was Louis Pasteur who convinced a skeptical medical community that contagious germs cause disease his germ theory now serves as the official explanation for most illness However in his private diaries he states unequivocally that in his entire career he was not once able to transfer disease with a pure culture of bacteria he obviously wasn t able to purify viruses at that time He admitted that the whole effort to prove contagion was a failure leading to his famous death bed confession that the germ is nothing the terrain is everything While the incidence and death statistics for COVID 19 may not be reliable there is no question that many people have taken sick with a strange new disease with odd symptoms like gasping for air and fizzing feelings and hundreds of thousands have died Many suspect that the cause is not viral but a kind of pollution unique to the modern age electromagnetic pollution Today we are surrounded by a jangle of overlapping and jarring frequencies from power lines to the fridge to the cell phone It started with the telegraph and progressed to worldwide electricity then radar then satellites that disrupt the ionosphere then ubiquitous Wi Fi The most recent addition to this disturbing racket is fifth generation wireless 5G In The Truth About Contagion Exploring Theories of How Disease Spreads bestselling authors Thomas S Cowan MD and Sally Fallon Morell explore the true causes of COVID 19 On September 26 2019 5G wireless was turned on in Wuhan China and officially launched November 1 with a grid of about ten thousand antennas more antennas than exist in the whole United States all concentrated in one city A spike in cases occurred on February 13 the same week that Wuhan turned on its 5G network for monitoring traffic Illness has subsequently followed 5G installation in all the major cities in America Since the dawn of the human race medicine men and physicians have wondered about the cause of disease especially what we call contagions numerous people ill with similar symptoms all at the same time Does humankind suffer these outbreaks at the hands of an angry god or evil spirit A disturbance in the atmosphere a miasma Do we catch the illness from others or from some outside influence As the restriction of our freedoms continues more and more people are wondering whether this is true Could a packet of RNA fragments which cannot even be defined as a living organism cause such havoc Perhaps something else is involved something that has upset the balance of nature and made us more susceptible to disease Perhaps there is no coronavirus at all perhaps as Pasteur said the germ is nothing the terrain is What Disease was Plague? Ole Benedictow, 2011-01-07 In recent decades alternatives to the established everything bubonic plague theory have been presented as to the microbiological identity and mechanism s of spread of historical plague

epidemics In this monograph the six important alternative theories are intensively discussed in the light of the historical sources the central primary studies and standard works on bubonic plague and the alternative microbiological agents insofar as they are testable These seven theories are incompatible and at least six of them must be untenable In the author's opinion the arguments against the bubonic plague theory and for all alternative theories are untenable This monograph therefore also has been written also as a standard work on bubonic plaque giving a broad and in depth presentation of the medical epidemiological and historical evidence and the methodological tenets for identification of historical diseases by comparison with modern medical knowledge **Epidemics and Society** Frank M. Snowden, 2019-10-22 A wide ranging study that illuminates the connection between epidemic diseases and societal change from the Black Death to Ebola This sweeping exploration of the impact of epidemic diseases looks at how mass infectious outbreaks have shaped society from the Black Death to today In a clear and accessible style Frank M Snowden reveals the ways that diseases have not only influenced medical science and public health but also transformed the arts religion intellectual history and warfare A multidisciplinary and comparative investigation of the medical and social history of the major epidemics this volume touches on themes such as the evolution of medical therapy plague literature poverty the environment and mass hysteria In addition to providing historical perspective on diseases such as smallpox cholera and tuberculosis Snowden examines the fallout from recent epidemics such as HIV AIDS SARS and Ebola and the question of the world's preparedness for the next generation of Smallpox, Syphilis and Salvation Sheryl Persson, 2010-04 Since ancient times the search for cures for the great diseases scourges that have afflicted humankind has been an ongoing guest but it is only within the last 200 years that major breakthroughs have occurred and the development of modern medicine has accelerated The stories behind these miraculous cures are those of intense rivalries and jealousies bitter public humiliation unswerving dedication subterfuge and great personal struggles Often these medical advances have truly changed the world When Edward Jenner developed the concept of vaccination and with it the cure for smallpox he found a way to defeat a disease that had affected half a billion people more than all those affected by wars and other epidemics combined And while the Black Death still lingers in pockets around the world it no longer threatens to destroy entire civilisations as it once did SMALLPOX SYPHILIS AND SALVATION uncovers the compelling stories of the men and women innovations and accidents that have led to diseases from polio to syphilis diphtheria to diabetes tetanus to leukaemia no longer being the death sentences they once were It also sounds a note of warning for some of these diseases are fighting back It is estimated that tuberculosis now claims one life every fifteen seconds while new superbugs are resistant to penicillin and other antibiotics Diseases may once again threaten to crush the world s population either in the form of biological warfare or simply because they want to survive as much as we do

Plague and Empire in the Early Modern Mediterranean World Nükhet Varlik, 2015-07-22 This is the first systematic scholarly study of the Ottoman experience of plague during the Black Death pandemic and the centuries that followed Using

a wealth of archival and narrative sources including medical treatises hagiographies and travellers accounts as well as recent scientific research N khet Varlik demonstrates how plague interacted with the environmental social and political structures of the Ottoman Empire from the late medieval through the early modern era The book argues that the empire s growth transformed the epidemiological patterns of plague by bringing diverse ecological zones into interaction and by intensifying the mobilities of exchange among both human and non human agents Varlik maintains that persistent plaques elicited new forms of cultural imagination and expression as well as a new body of knowledge about the disease In turn this new consciousness sharpened the Ottoman administrative response to the plaque while contributing to the makings of an early modern state 1722 1348 02-06-2020, חחחח חחחחח חחחחח חחחחח The Complete History of the Black Death Ole Jørgen Benedictow, 2021 Completely revised and updated for this new edition Benedictow's acclaimed study remains the definitive account of the Black Death and its impact on history The first edition of The Black Death collected and analysed the many local studies on the disease published in a variety of languages and examined a range of scholarly papers The medical and epidemiological characteristics of the disease its geographical origin its spread across Asia Minor the Middle East North Africa and Europe and the mortality in the countries and regions for which there are satisfactory studies are clearly presented and thoroughly discussed The pattern pace and seasonality of spread revealed through close scrutiny of these studies exactly reflect current medical work and standard studies on the epidemiology of bubonic plague Benedictow's findings made it clear that the true mortality rate was far higher than had been previously thought In the light of those findings the discussion in the last part of the book showing the Black Death as a turning point in history takes on a new significance OLE J BENEDICTOW is Professor of History at the University of Oslo Payback Margaret Atwood, 2008 Explores debt as a central historical component of religion literature and societal structure while examining the idea of humanity s debt to the natural world
