Congress. House. Committee on Public Works. Subcommittee on Water Resources,1973      *Complex Contracting* Trevor L. Brown,Matthew Potoski,David M. Van Slyke,2013-08-08 Complex Contracting draws on core social science concepts to provide wide ranging practical advice on how best to manage complex acquisitions Using a strong analytical framework the authors assess contract management practices suggesting strategies for improvement and ways to avoid the pitfalls of managing contracts for large and sophisticated projects An in depth analysis of the US Coast Guard s Deepwater program is included to illustrate ways to respond to real world contracting challenges This high profile and controversial case consisted of a projected 25 year 24 billion contract through which the US Coast Guard would buy a system of new boats aircraft communications and control architecture to replace its aging fleet The authors explore the reasons why this program launched with such promise turned out so poorly and apply the lessons learned to similarly complex contracting scenarios This engaging and accessible book has broad applicability and will appeal to policymakers practitioners scholars and students      **Return to Deepwater** Lucy Gillen,1975      *UK deepwater drilling - implications of the Gulf of Mexico oil spill* Great Britain: Parliament: House of Commons: Energy and Climate Change Committee,2011-01-06 On 20 April 2010 a blowout of BP s Macondo well in the Gulf of Mexico led to the deaths of 11 workers on Transocean s Deepwater Horizon drilling rig and the release of an estimated 4 9 million barrels of oil The European Commission called for a moratorium but the UK government decided its regulatory controls were fit for purpose However a full review of the oil and gas environmental regulatory regime would be undertaken The Committee believes that the UK has high regulatory standards as exemplified by the Safety Case regime that was set up in response to the 1988 Piper Alpha tragedy in 1988 The blowout in the Gulf of Mexico could have been prevented if the last line of defence the blind shear ram on the blowout preventer had activated and crushed the drill pipe Given the importance of this equipment the committee recommends prescribing specifically that blowout preventers should have two blind shear rams and that simple potential failures mustn t be left unchecked The Committee also recommends that the Bly report conclusions BP s internal investigation be considered alongside observations of other companies involved They believe that should an oil spill resulting from drilling activities occur in the UK there needs to be an absolute clarity as to the identity of the responsible party and that liability legislation needs to ensure prompt compensation They conclude that any calls for increased oversight of the UK offshore industry should be rejected in favour of multilateral approaches to regulation and oil spill response      Appendix A, Coastal engineering.
