Returning To The Body:

Anacarnation and Returning to the Lived Body with Richard Kearney Brian Treanor, James L. Taylor, 2022-10-26 This edited collection responds to Richard Kearney's recent work on touch, excarnation and embodiment as well as his broader work in carnal hermeneutics which sets the stage for his return to and retrieval of the senses of the lived body. Here fourteen scholars engage the breadth and depth of Kearney's work to illuminate our experience of the body. The chapters collected within take up a wide variety of subjects from nature and non-human animals to our experience of the sacred and the demonic and from art's account of touching to the political implications of various types of embodiment. Featuring also an inspired new reflection from Kearney himself in which he lays out his vision for anacarnation, this volume is an important statement about the centrality of touch and embodiment in our experience and a reminder that despite the excarnating tendencies of contemporary life, the lived body remains a touchstone for wisdom in our increasingly complicated and fragile world. Written for scholars and students interested in touch, embodiment, phenomenology and hermeneutics, this diverse and challenging collection contributes to a growing field of scholarship that recognizes and attempts to correct the excarnating trends in philosophy and in culture at large.

Returning Home to Our Bodies Abigail Rose Clarke, 2024-01-09 For readers of Adrienne Maree Brown, Staci K. Haines and Robin Wall Kimmerer, a body-based healing model that interrogates what we've been wrongly taught about hierarchies of nature and the body and pushes back against the white supremacy, colonialism, patriarchy and capitalism embedded in modern embodiment practices. Pushing back against a consumerist, pleasure-centric somatics industry that privileges product over process, Abigail Rose Clarke reminds us that truly meaningful embodiment practice nurtures our relationships among self, nature and community. Combining the rigor of the scientific method with the poetry and lyricism of movement and somatic studies, Clarke's somatic learning system, The Embodied Life Method, centers the body as a guide through today's most seemingly intractable social and environmental challenges, reclaiming the body as a source of liberatory comfort in times of great uncertainty and yet possibility. With tools and practices to help us better understand and dismantle the many ways our bodies are weaponized to serve domination systems, topics covered include: Harnessing the vitality of curiosity and experimentation; Using nature as a guide to possibility; Embracing the necessity of difference; Exposing the lie of universal isolation; Dismantling the fallacy of hierarchy; Uncovering the truth of endless capacity; Awe as a driving force for transformation. With methods honed over decades of inquiry, teaching and practice, *Returning Home to Our Bodies* provides a lucid, body-based model of healing and restoration, one that imagines a world beyond systems of domination, marginalization and isolation to nurture embodied whole, community liberation.
