Revamping The Examination System:

Revamping the Examination System Beena Shah, 1988 Most of the Educational Institutions are following the old pattern of examination based on rote memorization A national discussion was aimed to suggest practically implementable reform related to examination system paper setting evaluation techniques and conduct of examination and particularly to comprehensive and continuous evaluation The National Policy on Education NPE and Programme of Action POA 1986 have also emphasized this theme

Changing the Puerto Rico Public Education System from Ground Up Dr. Edgar León, 2014-10-23 The book is a report of all the issues conditions and real testimony found in the public school system during a two year period

Secondary School External Examination Systems Barend Vlaardingerbroek, Neil Taylor, 2009

Summative assessment has been a contentious issue in educational circles for several decades particularly high stakes assessment events which arise at various junctures of the school cycle especially those at the end of it The French Baccalaureat and English A Levels and their numerous clones throughout the francophone and anglophone worlds are household names and represent milestone events in people's lives as their outcomes are principal determinants of young people's future prospects These examinations are external they are devised conducted and processed by agencies outside the schools usually ministerial examination units As such they act as blind arbiters of student achievement providing the proverbial level playing field which ensures the comparability of outcomes In the pyramidal school structures of yesteryear examinations acted as filters regulating the progression of pupils to subsequent tiers of formal education Exit points occurred from primary school level up from where unsuccessful candidates could enter the labour force and or embark on occupationally specific further education and training With the modernisation of the labour market and an ever higher social demand for access to higher levels of formal education the filtering function of examinations at lower levels of schooling has been gradually eroded while burgeoning numbers of students at the upper secondary level have brought about reforms that include curricular diversification and sometimes radical overhauls of terminating assessment systems including the modification and in some instances abandonment of external examinations This edited volume brings together the experiences of twenty examination systems from around the world to show how these dynamic entities have adapted over time to the changing context of schooling Following an introduction by Stephen P Heyneman of World Bank repute there are sixteen chapters presenting Country Case Studies which have been written up under common subheadings thereby highlighting the comparative nature of the work and facilitating cross referencing The subsequent four chapters elaborate on the theme of external examinations beyond national borders including a contribution by the International Baccalaureate Organisation A defining feature of the work is the attention it pays to what it calls the nuts and bolts of external examinations from question setting to grading procedures These are it is argued instrumental in nurturing and maintaining public confidence in external examinations The book will be of immense value to people involved in educational policy studies

especially strategic educational planning as well as those directly concerned with formal assessment The work has been written to appeal to a wide audience of informed persons it is accessible to teachers and interested laypeople as well as to academics

Revamping Architectural Education Rajesh Sharma, 2018-06-08 The book that you hold in your hands is a treasure trove of ideas to set into motion a new generation of learning for architects As the author is a practitioner of this technology called architecture he has often felt that globally it is the last field of knowledge that still displays vestiges of a holistic renaissance attitude of mind It has not fallen victim to our global love for economic development above all other considerations and is not always a handmaiden of consumerist culture Architects are somewhat obsessed with form Despite this or in spite of it they combine and harmonize the field of applied arts with the sciences the attitudes of engineering optimization with the expression of the visual arts covering subjects as diverse as chemistry and history India is possibly the world's largest future market for private sector architects today If we do not adapt our architectural practice starting with our architectural teaching practices we run the clear and present danger of becoming extinct in the race for economic development and urbanization which is truly sustainable resilient sufficient and equitable In reading this little gem of a book the author would urge the reader to look beyond formulae and descriptions and generate an agenda for reform beyond just the curriculum and towards transformation As Indian society struggles to understand its architects the profession owes a duty to itself to remain relevant to social needs and aspirations to create a nation of our dreams And the author hopes that the beginning of that agenda can be found in the pages of this book interpreted by every reader individually
