Levitin,2019-11-19 Winner of the National Business Book Award From the New York Times bestselling author

of *The Organized Mind* and *This Is Your Brain on Music* a primer to the critical thinking that is more necessary now than ever. We are bombarded with more information each day than our brains can process especially in election season. It's raining bad data, half truths and even outright lies. New York Times bestselling author Daniel J. Levitin shows how to recognize misleading announcements, statistics, graphs and written reports revealing the ways lying weasels can use them. It's becoming harder to separate the wheat from the digital chaff. How do we distinguish misinformation, pseudo facts and distortions from reliable information? Levitin groups his field guide into two categories: statistical information and faulty arguments, ultimately showing how science is the bedrock of critical thinking. Infoliteracy means understanding that there are hierarchies of source quality and bias that variously distort our information feeds via every media channel including social media. We may expect newspapers, bloggers, the government and Wikipedia to be factually and logically correct but they so often aren't. We need to think critically about the words and numbers we encounter if we want to be successful at work, at play and in making the most of our lives. This means checking the plausibility and reasoning, not passively accepting information, repeating it and making decisions based on it. Readers learn to avoid the extremes of passive gullibility and cynical rejection. Levitin's charming, entertaining, accessible guide can help anyone wake up to a whole lot of things that aren't so. And catch some weasels in their tracks.

Is Gwyneth Paltrow Wrong About Everything? Timothy Caulfield, 2016-05-10. An exploration of the effect our celebrity dominated culture has on our ideas of what it means to live the good life. What would happen if an average Joe tried out for American Idol, underwent a professional makeover, endured Gwyneth Paltrow's Clean Cleanse and followed the outrageous rituals of the rich and famous? Health law policy researcher Timothy Caulfield finds out in this thoroughly unique, engaging and provocative book about celebrity culture and its iron grip on today's society. Over the past decade, our perceptions of beauty, health, success and happiness have become increasingly framed by a popular culture steeped in celebrity influence and ever more disconnected from reality. Research tells us that our health decisions and goals are influenced by celebrity culture and endorsements; our children's ambitions are now overwhelmingly governed by the fantasy of fame and the ideals of beauty and success are mediated through a celebrity dominated worldview. But while much has been written about the cause of our obsession with the rich and famous, Caulfield argues that not enough has been done to debunk celebrity messages and promises about health, diet, beauty or happiness. From super thin models to Gwyneth Paltrow's endorsement of a gluten free diet for almost anyone, celebrity opinions have the power to dominate our conversations and outlooks. In this book, Caulfield provides an entertaining look into the celebrity world, including vivid accounts of his own experiences trying out for American Idol, having his skin resurfaced and doing the cleanse interviews with actual celebrities, thought provoking facts and a practical and evidence based reality check on our own celebrity ambitions.
