Handbook of Proximity Relations Torre, André, Gallaud, Delphine, 2022-01-18 This Handbook is a state of the art analysis of proximity relations offering insights into its history alongside up to date scientific advances and emerging questions Its broad scope from industrial and innovation approaches through to society issues of living and working at a distance territorial development and environmental topics will ensure an in depth focus point for researchers in economics as well as geography organizational studies planning and sociology

Everyday Fashion Bethan Bide, Jade Halbert, Liz Tregenza, 2023-12-28 Ordinary clothes have extraordinary stories In contrast to academic and curatorial focus on the spectacular and the luxurious *Everyday Fashion* makes the case that your grandmother's wardrobe is an archive as interesting and important as any museum store From the moment we wake and get dressed in the morning until we get undressed again in the evening fashion is a central medium through which we experience the world and negotiate our place within it Because of this the ways that supposedly ordinary and everyday fashion objects have been designed manufactured worn cared for and remembered matters deeply to our historical understanding Beginning at 1550 the start of an era during which the word fashion came to mean stylistic change rather than the act of making each chapter explores the definition of everyday fashion and how this has changed over time demonstrating innovative methodologies for researching the everyday The variety and significance of everyday fashion cultures are further highlighted by a series of illustrated object biographies written by Britain's leading fashion curators showcasing the rich diversity of everyday fashion in British museum collections Collectively this volume scratches below the glossy surface of fashion to expose the mechanics of fashion business the hidden world of the workroom and the diversity and role of makers and the experiences of consuming wearing and caring for ordinary clothes in the United Kingdom from the 16th century to the present day In doing so it challenges readers to rethink how fashion systems evolve and to reassess the boundaries between fashion and dress scholarship

International Comparisons of Vocational Education and Training for Intermediate Skills Paul Ryan, 2019-07-23 Paul Ryan has brought together the writings of the most prominent British research into vocational preparation in Britain in comparison to the other advanced economies primarily within the EEC The book originally published in 1991 documents various aspects of inadequacy in British practice at the time concentrating upon intermediate skills which are of crucial importance for economic performance The introduction outlines the strengths and weaknesses of comparative research Part 1 discusses the use which has been made of it by policy makers in Britain and various aspects of comparative methods in practical comparisons including an Anglo Scottish one Part 2 concerns vocational preparation in connection with productivity and produce markets noting its importance for economic performance and its

dependence upon companies product choices Part 3 contains studies of the organization of skills and work and the finance of training within the EEC as a whole Part 4 comprises studies of training in relation to labour market structures each of which indicates similar alternatives for training policy in Britain alternatives whose relevance and political prospects can only be enhanced by the demise of Thatcher government deregulatory policies ICICKM2011-Proceedings of the 8th International Conference on Intellectual Capital, Knowledge Management & Organisational Learning Vincent Ribiere,Lugkana

Worasinchai,2011 **Industrial Relations in the Privatised Coal Industry** Emma Wallis,2018-02-06 This title was first published in 2000 This book describes and accounts for the patterns of industrial relations which have emerged in the UK coal industry since privatization in 1994 In so doing it also addresses wider issues relating to industrial relations and ownership Labour relations practices currently evident within the industry are compared with those which prevailed during the final years of nationalization and a series of case studies demonstrates that both continuity and change are visible Whilst continuity with the patterns of labour relations established during the final decade of public ownership is shown to have had negative implications for organized labour within the industry however the changes associated with privatization are demonstrated to have been a more ambivalent force This book concludes that privatization has had a significant influence upon industrial relations within the industry and that organized labour has in general been detrimentally affected by these developments **The Oxford Handbook of Comparative Institutional Analysis** Glenn Morgan,John Campbell,Colin Crouch,Ove Kaj Pedersen,Richard Whitley,2010-04-09 It is increasingly accepted that institutions matter for economic organization and outcomes The last decade has seen significant expansion in research examining how institutional contexts affect the nature and behaviour of firms the operation of markets and economic outcomes Yet institutions conceal a multitude of issues and perspectives Much of this research has been comparative and followed different models such as varieties of capitalism national business systems and social systems of production This Handbook explores these issues perspectives and models with the leading scholars in the area contributing chapters to provide a central reference point for academics scholars and students **Britain's Economic Performance** Tony Buxton,Paul Chapman,Paul G Chapman,Paul

Temple,2005-08-08 This new and substantially revised edition of Britain s Economic Performance provides a unique assessment of the current state of the supply side of the economy Written by a team of highly experienced policy oriented applied economists this volume will be a valuable source of reference analysis and guidance for students and policy makers

Beyond the Regulation Approach Bob Jessop,Ngai-Ling Sum,2006 Every now and then a book comes along that you positively want to be asked to read and review and this is one of them a major work of scholarship in its own right while at the same time a ground clearing exercise for what is to follow This it should be emphasized is a hugely impressive body of work an expansive statement of Jessop s contribution as a major figure within the world of regulation approaches Ray Hudson Economic Geography This book presents a detailed and critical account of the regulation approach in institutional

and evolutionary economics Offering both a theoretical commentary and a range of empirical examples it identifies the successes and failures of the regulation approach as an explanatory theory and proposes new guidelines for its further development Although closely identified with heterodox French economists there are several schools of regulation theory and the approach has also been linked to many topics across the social sciences Bob Jessop and Ngai Ling Sum provide detailed criticisms of the various schools of the regulation approach and their empirical application and have developed new ways of integrating it into a more general critical exploration of contemporary capitalism The authors go on to describe how the regulation approach can be further developed as a progressive research paradigm in political economy Also presented is a detailed philosophical as well as theoretical critique of the regulation approach and its implications for the philosophy of social sciences and questions of historical analysis especially periodization Addressing the implications of the regulation approach for both the capitalist economy and the changing role of the state and governance this book will be of great interest to a wide ranging audience including institutional and evolutionary economists economic and political sociologists and social and political theorists

Advances in Economics and Econometrics: Theory and Applications Econometric Society. World Congress, 1997-02-20 These books comprise papers examining the latest developments in economic theory applied economics and econometrics presented at the Seventh World Congress of the Econometric Society in Tokyo in August 1995 The topics were carefully selected to represent the most active fields in the discipline over the past five years Written by the leading authorities in their fields each paper provides a unique survey of the current state of knowledge in economics Designed to make the material accessible to a general audience of economists these volumes should be helpful to anyone with a good undergraduate training in economics who wishes to follow new ideas and tendencies in the subject

Theorizing Cultural Work Mark Banks, Rosalind Gill, Stephanie Taylor, 2014-04-11 In recent years cultural work has engaged the interest of scholars from a broad range of social science and humanities disciplines The debate in this turn to cultural work has largely been based around evaluating its advantages and disadvantages its freedoms and its constraints its informal but precarious nature the inequalities within its global workforce and the blurring of work life boundaries leading to self exploitation While academic critics have persuasively challenged more optimistic accounts of converged worlds of creative production the critical debate on cultural work has itself leaned heavily towards suggesting a profoundly new confluence of forces and effects *Theorizing Cultural Work* instead views cultural work through a specifically historicized and temporal lens to ask what novelty can we actually attach to current conditions and precisely what relation does cultural work have to social precedent The contributors to this volume also explore current transformations and futures of work within the cultural and creative industries as they move into an uncertain future This book challenges more affirmative and proselytising industry and academic perspectives and the pervasive cult of novelty that surrounds them to locate cultural work as an historically and geographically situated process It will be of interest to students and scholars of sociology cultural studies human geography

urban studies and industrial relations as well as management and business studies cultural and economic policy and development government and planning Industrial Transition Martina Fuchs, Martina Fromhold-Eisebith, 2016-05-23

Recently the international division of labour in industrial production has grown increasingly more volatile The separation between high end tasks undertaken in the traditional core economies and low end tasks undertaken in newly emerging economies has become increasingly blurred The new dynamics and unpredictability of actor and process configurations in internationalized production bring new challenges for research in economic geography regional economics and management sciences The allocation of R and how can regional resilience and response capacities be built and enhanced **Price, Quality and Trust** Mari Sako, 1992-10-08 The management of buyer supplier relations has come to be regarded as a key to achieving manufacturing competitiveness particularly in sectors facing global competition based on both price and quality This book is a theoretical and empirical exploration of the link between the type of buyer supplier relations and corporate performance Dr Sako examines how British and Japanese companies in the electronics industry manage their relationships with buyers and suppliers the empirical study comprising a three way comparison of a Japanese customer company a British customer company and a Japanese company in Britain and an analysis of 36 supplier companies in Britain and Japan Variations of the companies business practices are assessed in terms of technology the nature of market competition the national legal framework financial structures employment systems and the mode of entrepreneurship The author identifies two distinct approaches in the two countries the arm s length contractual relation ACR in Britain and the obligational contractual relation OCR in Japan and argues that the trust and interdependence present in the latter can be a powerful springboard from which to achieve corporate success The Oxford Handbook of Work and Organization Stephen Ackroyd, 2005 The Oxford Handbook of Work and Organization discusses what is currently known about work and organization and their connection to broader economic change in Europe and America Issues of conceptualization are not neglected but the emphasis is firmly on what is known and what has been observed by researchers **Business Innovation in Asia** Dennis McNamara, 2009-09-10 The central concept of this volume knowledge networks refers to interactive linkages around nodes of tacit and codified knowledge embedded in Global Value Chains Such networks can be distinguished by the process or format of information exchange the organization of the networks within firms and by target market or product

The Cambridge Economic History of the United States Stanley L. Engerman, Robert E. Gallman, 1996 Volume III surveys the economic history of the United States and Canada during the twentieth century Industrial Relations Paul Edwards, 2009-02-09 This is a completely revised and updated second edition of the acclaimed Industrial Relations The new book gives particular attention throughout to the effects of international and European developments on British Industrial Relations *Public Interest and Market Pressures* David G. Mayes, 1993-06-01 Tackles the criticism that the European Community is an unbalanced arrangement where the path to closer integration may involve an inequitable distribution of the

benefits to large firms rather than to the public at large the less well off parts of the Community and those in employment

Industrial Economic Regulation Roger Sugden, 1993-03-11 Exploring key current issues leading economists focus on the government processes which influence industrial economic activity and its role within the European Community as a positive instrument promoting industrial development
