**Immortality (Everlasting Life)** Michael Soh, 2018-02-01 This book is the only book that runs forward to tackle the biggest mystery facing us today. Michael Soh combines facts, charts and Bible verses to give readers a deep understanding that death is already destroyed two thousand years ago. Readers can now make a difference with this victory in their life by staying as immortals in this world, tending to His fields. There are many revelations with Bible references to discover renewal, youth and immortality. Immortality starts in the spiritual realm and manifests into the physical realm. This book inspires readers of all ages to turn the tide against the spirit of death that has robbed the human race of immortality. It helps to make our world that we live in live up to its majestic name, the kingdom of God. In addition to inspiring readers to overcome sickness, it encourages everyone to get going with immortality. You will find lots of road maps that show immortality is achievable and is in accordance with God's will. Readers can be confident to remain alive till rapture comes.      **A New Ethic of 'Older'** Bridget Garnham, 2016-10-04 Through its themes of subjectivity, surgery and self-stylization, this book critically examines the cultural constraints and incitements that shape the practice of cosmetic surgery by older people. The book problematizes anti-ageing discourses to provide a nuanced descriptive, ethical and political reading of older identity politics nested within the contemporary ethico-political terrain of self-care. A New Ethic of Older aims to de-territorialize the older subject from normative discourses of ageing and theorize becoming older. Evidence of an active cultural politics of older emerges from the critically reflexive engagement of older people with cosmetic surgery. This engagement constitutes a cutting critique of ageing discourses enmeshed in an aesthetic mode of subjectivation that underpins a new ethics of old age. The book will appeal to those in the fields of Cultural Gerontology, Ageing Studies, Critical Psychology, Sociology and Cultural Geography.

The methodological approach will be of interest to academics and students exploring the application of Foucault's work on care of the self to contemporary contexts and practices      Breakthrough Anti-Ageing Cure Nishant Patnaik, 2018-07-10 The book deals with anti ageing How to reach the Fountain of Youth      Epigenetics and Health Michelle McCulley, 2024-02-28 An incisive and contemporary discussion of epigenetic phenomena applied to human health and disease Epigenetics and Health A Practical Guide delivers a thorough and insightful exploration of the basic principles of gene function gene regulation and gene expression The author explains how epigenetic modifications alter gene expression and demonstrate the role played by environmental factors including nutrition exercise toxins and stress in gene regulation as well as their potential health consequences The book presents current methods for analyzing epigenetic variation including NGS applications and bioinformatic analysis Readers will be encouraged to question analyze and critically appraise the literature on epigenetics to further develop their understanding They'll also find Explorations of epigenetic mechanisms homeostasis and the potential for manipulating the epigenome Practical discussions of methods for epigenetic analyses How to address cancer epigenetics mental health epigenetics and guidance on developing an epigenetics research project Epigenetics and Health A Practical Guide will benefit practicing geneticists and medical geneticists seeking insights into epigenetic phenomena applied to human health and disease This book successfully conveys that we are in the early stages of understanding epigenetic phenomena and McCulley admirably explains why this new discipline is important even if significant hurdles remain before we understand enough about epigenetics to use that information when designing medical or nutritional lifestyle interventions David S Moore The Quarterly Review of Biology March 2025 Volume 100 Number 1 pp 43 44      **Borrowed Time** Sue Armstrong, 2019-01-24 As featured on BBC Radio 4's Start the Week A rich timely study for the era of global ageing Nature The ageing of the world population is one of the most important issues facing humanity in the 21st century up there with climate change in its potential global impact Sometime before 2020 the number of people over 65 worldwide will for the first time be greater than the number of 0 4 year olds and it will keep on rising The strains this is causing on society are already evident as health and social services everywhere struggle to cope with the care needs of the elderly But why and how do we age Scientists have been asking this question for centuries yet there is still no agreement There are a myriad competing theories from the idea that our bodies simply wear out with the rough and tumble of living like well worn shoes or a rusting car to the belief that ageing and death are genetically programmed and controlled In Borrowed Time Sue Armstrong tells the story of science's quest to understand ageing and to prevent or delay the crippling conditions so often associated with old age She focusses inward on what is going on in our bodies at the most basic level of the cells and genes as the years pass to look for answers to why and how our skin wrinkles with age our wounds take much longer to heal than they did when we were kids and why words escape us at crucial moments in conversation This book explores these questions and many others through interviews with key scientists in the field of gerontology and with people who have

interesting and important stories to tell about their personal experiences of ageing
