framework of geostrategic psychology this book elucidates the intrinsic law of the rise and fall of great powers and gives insights into the quandary of China's rise and the mechanism behind the strategy. Conflating geopolitics and strategic psychology, geostrategic psychology is rooted in the historical study of strategy and premised on an assumption that human beings bear resemblance in psychology and behavior when facing the same structure of geopolitical circumstance. The book analyzes intriguing phenomena from strategic psychology including trend anxiety and conflict willingness, the Old Man Phenomenon in international politics, the Santa Claus Effect, the Myth of the Sunk Cost Fallacy, Bidder's Myth, Gambler's Game, Philip's Trap, William's Dilemma, Heartland Myth, Domino's Fear, Golden Nation Myth, Alliance Commitment Dilemma, and Corinthian Dilemma among others. The author combines theory, history, and the practice of international politics, revealing how a nation can occupy a favorable position in the field of global strategic competition and prospects for China. The title will be a valuable reference for observers of international politics as well as researchers and students interested in international relations, international politics, geopolitics, strategic psychology, and geostrategic psychology.

Advances in Speech and Music Technology Anupam Biswas, Emile Wennekes, Alicja Wiczorkowska, Rabul Hussain Laskar, 2023-01-01 This book presents advances in speech and music in the domain of audio signal processing. The book begins with introductory chapters on the basics of speech and music and then proceeds to computational aspects of speech and music, including music information retrieval and spoken language processing. The authors discuss the intersection in the field of computer science, musicology, and speech analysis and how the multifaceted nature of speech and music information processing requires unique algorithms, systems using sophisticated signal processing and machine learning techniques that better extract useful information. The authors discuss how a deep understanding of both speech and music in terms of perception, emotion, mood, gesture, and cognition is essential for successful application. Also discussed is the overwhelming amount of data that has been generated across the world that requires efficient processing for better maintenance, retrieval, indexing, and querying, and how machine learning and artificial intelligence are most suited for these computational tasks. The book provides both technological knowledge and a comprehensive treatment of essential topics in speech and music processing.
