Ganong's Review Medical Physiology Kim E. Barrett,2019-03-21 In this new edition we have cast a fresh eye on the pedagogical approach taken in each chapter and section and have focused particularly on including only material that is of the highest yield We have thoroughly revised the learning objectives for every chapter reorganized and updated the text to ensure that all objectives are clearly addressed in a logical order aligned chapter summaries so that the take home messages quickly address each learning objective in turn and expanded the number of review questions so that readers also have the ability to check their understanding and retention of every objective covered As a discipline evolves and new information emerges there is a tendency simply to concatenate these concepts such that chapter structure degrades inevitably over time With in depth discussions amongst the author team and significant spring cleaning we believe we have freshened and simplified the volume while also making sure that important new developments are incorporated We are immensely thankful to Erica Wehrwein PhD Assistant Professor of Physiology and an award winning instructor at Michigan State University who took on the task of reviewing the book as a whole and providing specific and detailed feedback to us on each chapter
