Mites (Acari) for Pest Control Uri Gerson, Robert L. Smiley, Ronald Ochoa, 2008-04-15 Mites Acari for Pest Control is an extremely comprehensive publication covering in depth the 34 acarine families that contain mites useful for the control of pest mites and insects nematodes and weeds. In addition to providing information on each relevant acarine family the book includes essential information on the introduction, culture and establishment of acarine biocontrol agents, the effects of the host plants, agrochemicals and environmental factors on mites used in biological control and discusses commercial and economic considerations in their use. Mites are now used in various ways for biological control with a growing number of species being sold commercially throughout the world. The authors of this landmark publication who have between them a huge wealth of experience working with mites in biological control programs have put together a book that will for many years be the standard reference on the subject. The book will be of great value to all those working in crop protection and biological control both in research as well as in commercial operations including acarologists, entomologists, integrated pest management specialists, agricultural and plant scientists. Libraries in all universities and research establishments where these subjects are studied and taught should all have copies on their shelves. Uri Gerson is at the Department of Entomology, Faculty of Agricultural Food and Environmental Sciences, Hebrew University, Rehovot, Israel. Robert L. Smiley and Ronald Ochoa are at the Systematic Entomology Laboratory, US Department of Agriculture, Agricultural Research Service, Beltsville, MD, USA.

Baker, 1949      **Mites of Australia** R. B. Halliday, 1998-01-01 This Checklist brings together for the first time the names of all 2620 described species of mites that are known to occur in Australia. It gives the correct nomenclature for each species and places every species in the appropriate genus and family using the latest available classification. The Checklist also provides a bibliography of information on biogeography, economic importance and in the case of pests, biology and control. This work is a baseline from which more detailed and specific research projects will draw their fundamental data.      **Agriculture Handbook**, 1949 Set includes revised editions of some nos.      **Urban Insects and Arachnids** William H. Robinson, 2005-04-14 This account provides the first comprehensive coverage of the insect and other arthropod pests in the urban environment worldwide. Presented is a brief description, biology and detailed information on the development, habits and distribution of urban and public health pests. There are 570 illustrations to accompany some of the major pest species. The format is designed to serve as a ready reference and to provide basic information on orders, families and species. The species coverage is international and based on distribution in domestic and peridomestic habitats. The references are extensive and international and cover key papers on species and groups. The introductory chapters overview the urban ecosystem and its key ecological components and a review of the pests' status and modern control strategies. The book will serve as a professional training manual and handbook for the pest control professionals, regulatory officials and urban entomologists. It is organized alphabetically throughout.      Canada
